Table (15)	Per 1000 distribution for persons of various age groups by educational classification and broad activity according to Usual Principal Status (ps) Approach	43-79

Foreword

India has the world's largest youth population despite having a smaller population than China as per the recent UN report. The youth population has an important role to play as potential demographic dividend by constituting skilled stock of human capital. However, the magnitude of this benefit depends on the ability of the economy to absorb and productively employ the extra workers rather than be a pure demographic gift. In recognition of the importance of investing in young people, many steps have been initiated by the Govt. of India.

In the Third Annual Employment-Unemployment Survey 2012-13, Labour Bureau compiled a report with the objective of providing some authentic source of the youth employment-unemployment characteristics in India. Under the Fourth Annual Employment-Unemployment Survey also, an attempt was made to assess the Youth Employment-Unemployment Scenario based on broad activity by educational qualification and kind of activities the youth is pursuing in the country for various age groups viz. 15-17 years, 18-29 years and 30 years and above by Gender/Sector/State/UT wise. With the same objective the present report is next in the series on this subject.

I hope the present report will go a long way as an important input for the policymakers to draft/review the policies particularly related to the youth so that the demographic dividend which our country has is transmitted into economic and social prosperity.

CHANDIGARH
15 September, 2016

DR. M. MATHISEKARAN
DIRECTOR GENERAL

EXECUTIVE SUMMARY

- The present report is based on the Fifth Annual Employment-Unemployment Survey 2015-16 conducted by the Labour Bureau.
- This volume deals with the "Youth Employment- Unemployment Survey 2015-2016" in the country.
- The survey has been conducted in all the States/UTs and covers all the districts.
- The field work was executed from April, 2015 to December, 2015.
- A total sample of 1,56,563 households has been covered with a breakup of 88,783 households in the rural sector and 67,780 households in the urban sector.
- The labour force estimates for specific age groups representing "Youth" viz. 15-17 years, 18-29 years and 30 years and above have been derived based on Usual Principal Status (UPS) Approach and Usual Principal and Subsidiary Status (UPSS) Approach.
- The State/Gender/Sector wise tables of various Labour Force parameters have been generated in this report.
- Labour Force Participation Rate according to UPS and UPSS approaches for different age groups is as under:

All India (in per cent)			
Approach	15-17 Years	18-29 Years	30 Years & above
UPS	8.4	45.2	58.2
UPSS	10.0	47.3	60.3

- The Worker Population Ratio was estimated at 39.2 per cent for the age group 18-29 years based on Usual Principal Status Approach at the All India level.

- Based on the survey results, Labour Force Participation Rate (LFPR) was estimated at 45.2 per cent for the age group 18-29 years based on Usual Principal Status Approach at the All India level.
- The Worker Population Ratio for different age groups by two different approaches is as under:

All India (in per cent)			
Approach	15-17 Years	18-29 Years	30 Years & above
UPS	6.7	39.2	57.3
UPSS	8.7	42.4	59.7

- For the age group of 18-29 years the state of Chhattisgarh has the highest LFPR (63.9 per cent) and the highest WPR (60.7 per cent) based on UPS approach. On the other hand the state of Jammu & Kashmir has shown the lowest LFPR & WPR i.e. 29.3 per cent and 22.1 per cent respectively for the same age group based on UPS approach.
- The Unemployment Rate for the age group 18-29 years was estimated at 10.2 per cent at the All India level based on Usual Principal Status Approach.
- In case of age group 18-29 years, the state of Sikkim has the highest UR i.e. 54.1 per cent followed by Tripura (35.0 per cent). The UT of Daman & Diu has the lowest 0.7 per cent UR for the age group of 18-29 years based on UPS approach.
- The Unemployment Rate according to UPS and UPSS approaches for different age groups is shown below:

All India (in per cent)			
Approach	15-17 Years	18-29 Years	30 Years & above
UPS	19.8	13.2	1.6
UPSS	13.0	10.2	0.9

- Based on the survey results, majority of the employed persons were either self-employed or casual worker for the age group 18-29 years.
- Based on Usual Principal Status Approach, 39.0 per cent employed persons were self-employed followed by 36.6 per cent as casual worker and 19.0 per cent as wage/salaried employee and remaining contract category worker (5.4 per cent) for the age group 18-29 years.
- The survey results show that with the increase in education level, the unemployment rate has also increased in the age group 18-29 years.
- The Unemployment Rate for the persons aged 18-29 years and holding a degree in graduation and above was found to be maximum with 18.4 per cent based on the Usual Principal Status Approach at the All India level.
- The Unemployment Rate for the persons aged 18-29 years and having educational qualification "below primary" and "primary" was about 3 per cent based on the Usual Principal Status Approach at the All India level.

CHAPTER-I

INTRODUCTION

1.1 “Youth” is best understood as a period of transition from the dependence of childhood to adulthood’s independence. Youth is a more fluid category than a fixed age-group. However, age is the easiest way to define this group, particularly in relation to employment. Therefore “youth” is often indicated as a person between the age where he/she may leave compulsory education, and the age at which he/she finds his/her first employment. This latter age limit has been increasing, as higher levels of unemployment puts many young people into a prolonged period of dependency.

1.2 ILO in its report (2014) had estimated that nearly 73 million youth were unemployed around the world and global youth unemployment rate was projected at 13 per cent. The report further suggests that in comparison with adults, youth continue to be almost three times as likely to be

unemployed, since 1995 and unemployment rates affect them disproportionately. Creating jobs for young people is a major challenge around the world, which has been further exacerbated by the global financial crisis that hit this group very hard. India has the world’s largest youth population in the world. According to recent population figures one in five young people in the world is an Indian. India is adding nearly 12 million people to the job market every year and more than 65 per cent of its population is below the age of 35. As the figure suggests, While India is experiencing a demographic dividend due to youth bulge, many young people are struggling to acquire the right skills demanded by employers to successfully navigate the transition from school to work. The 93rd session of the Indian Labour Conference has also young people who did not have access to decent work.

1.3 To assess unemployment among the youth in India, various measures have been initiated. India has introduced a number of employment generating schemes including MNREGA. Similar policy initiatives have been taken for skilled workers. ‘Skill India’ scheme has recently been launched with the aim to train over 40 crore people in India with different skills by 2022. ‘Startup India’ with Mudra (Micro Units Development and Refinance Agency) one of the important

initiatives by Government of India has been taken with the aim of promoting bank financing for startup ventures to boost entrepreneurship and encourage starts ups with job creation.

1.4 In this report an attempt has been made to assess the participation, employment situation for different age groups viz. 15-17 years, 18-29 years and 30 years and above, in the labour market, keeping in view the requirements of various users/stakeholders.

CHAPTER-II

Employment-Unemployment Scenario for Youth

Introduction

2.1 In this chapter the estimates of Labour Force Participation Rate (LFPR), Worker Population Ratio (WPR) and Unemployment Rate (UR) based on Usual Principle Status (UPS) & Usual Principle and Subsidiary Status (UPSS) approaches for different age groups viz. 15-17 years, 18-29 years and 30 years and above, keeping in view the requirements of various users/stakeholders. The concepts and definitions for measuring various labour force parameters by different approaches are enclosed in Annexure-I.

Labour Force Participation Rate (LFPR)

2.2 Labour Force Participation Rate indicates the supply of labour and is an important input for the production of goods and services. In simple words, Labour Force Participation Rate is the proportion of the working age population that engages actively in the labour market, either by

working or seeking for work. It provides an indication of the relative size of the supply of labour available which can be engaged in the production of goods and services. In this volume, the results are compiled for different age groups namely 15-17 years, 18-29 years and 30 years and above by Gender/Sector/State/UT wise based on Usual Principal Status Approach & Usual Principal and Subsidiary Status Approach.

2.3 At the All India level, the Labour Force Participation Rate for the age group 18-29 was 45.2 per cent based on Usual Principal Status Approach. In case of male category, the LFPR was estimated to be 66.8 per cent whereas in case of female category, it was 21.3 per cent based on Usual Principal Status Approach. It was evident from the Table 2.1, based on Usual Principal & Subsidiary Status Approach, the LFPR for male category was 67.5 per cent whereas for females, it was 25 per

cent for the age group 18-29 years at All India level. For transgender, the LFPR was estimated to be 55 per cent based on UPS and 55.5 per cent based UPSS approaches for the age group 18-29 years.

2.4 In case of age group 15-17 years, the Labour Force Participation Rate was estimated to be 8.4 per cent based on Usual Principal Status Approach at the All India level. In case of male category, it was 11.5 per cent whereas for female, the same was 4.6 per cent. Based on the Usual Principal & Subsidiary Status Approach, LFPR for the age group 15-17 years was estimated to be 10.0 per cent at the All India level. In case of male category the LFPR was 13.1 per cent and for female it was 6.2 per cent based on UPSS approach. In the age group 15-17 years, transgender category had same 16.7 per cent LFPR based on UPS and UPSS approach. LFPR was observed to be highest, in case of age group 30 years & above based on both UPS & UPSS approaches. Based on UPS approach, LFPR was 58.2 per cent and it was 60.3 per cent in case of UPSS approach.

2.5 Based on UPS approach for persons of age group 30 years & above. For male category, it was 87.8 per cent whereas for female the same was 27.1 per cent based on UPS approach at the All India level. Based on UPSS approach, LFPR for the age group 30 years & above for male category was 88.1 per cent and for female was 31.1 per cent. For transgender LFPR was observed to be 47.7 per cent based on UPS approach and on the basis of UPSS approach it was 48.6 per cent for transgender. It can be observed from Table 2.1 that LFPR of Male & Female has increased along with age. However, LFPR for transgender shows decreasing trend as they move from age group of 18-29 years to 30 years & above. LFPR was observed to be 48.5 percent in rural area as compared to 36.2 percent in urban area in the age group 18-29 years. However, in the age group of 30 year & above, the rural LFPR was 61.1 per cent as compared to 51.2 per cent in the urban area. A similar trend of Rural–Urban was exhibited in case of LFPR according to UPSS approach.

Table 2.1: LFPR for different age groups by different approaches (in %)

Approach	15-17 Years				18-29 Years				30 Years & above			
	M	F	T	P	M	F	T	P	M	F	T	P
UPS	11.5	4.6	16.7	8.4	66.8	21.3	55.0	45.2	87.8	27.1	47.7	58.2
UPSS	13.1	6.2	16.7	10.0	67.5	25.0	55.5	47.3	88.1	31.1	48.6	60.3

M=Male F=Female T=Transgender P=Persons

Figure 1: LFPR for different age groups by different approaches (in %)

2.6 In case of age group 18-29 years, the state of Chhattisgarh had shown the highest 63.9 per cent LFPR followed by UT of A & N Island with 60.5 per cent whereas the state of Jammu & Kashmir has lowest i.e. 29.3 per cent LFPR for this age group.

2.7 For persons 30 years & above, Nagaland was observed to be the state with highest (78.2 per cent) LFPR followed by Chhattisgarh with 77.4 per cent and Meghalaya and Mizoram with 75.2 per cent each LFPR for this age group. The UT of Lakshadweep has lowest i.e.

39.9 per cent LFPR for the age group of 30 years & above.

Worker Population Ratio (WPR)

2.8 The second important parameter in the labour force survey is the Worker Population Ratio which signifies the

proportion of workers/employed persons in the total population of specific age group. Based on Usual Principal Status Approach and Usual Principal & Subsidiary Status Approach, the worker population ratio for different age groups is given in table 2.2.

Table 2.2: WPR for different age groups by different approaches (in %)

Approach	15-17 Years				18-29 Years				30 Years & Above			
	M	F	T	P	M	F	T	P	M	F	T	P
UPS	9.3	3.6	12.0	6.7	59.3	17.1	51.5	39.2	87.1	26	46.2	57.3
UPSS	11.4	5.4	13.1	8.7	61.6	21.3	54.0	42.4	87.7	30.4	47.1	59.7

M=Male F=Female T=Transgender P=Persons

Figure 2: WPR for different age groups by different approaches (in %)

2.9 At the All India level, the Worker Population Ratio for the age group 18-29 was estimated at 39.2 per cent based on Usual Principal Status Approach. In case of male category, it was 59.3 per cent whereas for female category, the Worker Population Ratio was estimated at 17.1 per cent. Based on Usual Principal and Subsidiary Status Approach, the Worker Population Ratio was estimated at 42.4 per cent for the age group 18-29 years at the All India level. For male category of persons, the WPR was 61.6 per cent whereas for female category, it was 21.3 per cent. In this age group transgender had shown 51.5 per cent WPR based on UPS and 54 per cent WPR based on UPSS approach.

2.10 In case of age group 15-17 years, the WPR was estimated to be 6.7 per cent based on UPS approach at the All India level. In case of male category it was 9.3 per cent whereas for Female, the same was 3.6 per cent. For transgender the WPR has recorded highest in this age group i.e. 12 per cent based on UPS approach. Based on UPSS approach WPR for

the age group 15-17 years was estimated to be 8.7 per cent at the All India level. For male category it was 11.4 per cent and for female category it was 5.4 per cent as given in the Table 2.2. For transgender, in this age group WPR was observed to be more than for male and female i.e. 13.1 per cent.

2.11 Similar to the results of LFPR based on UPS & UPSS approaches for age group 30 years & above, WPR was also observed to be highest among all age groups based on both UPS & UPSS approaches. For this age group, WPR was estimated to be 57.3 per cent based on UPS approach at the All India level. In case of male category it was 87.1 per cent and for female it was 26 per cent. For transgender WPR was 46.2 per cent based on UPS approach. Based on UPSS approach, WPR for the age group 30 years & above was estimated to be 59.7 per cent. For male and female category it was 87.7 per cent and 30.4 per cent respectively. In case of transgender WPR was 47.1 per cent. In this age group, LFPR and

WPR for male and female has increased along with the age. However, WPR for transgender shows decreasing trend along with age.

2.12 The state of Andhra Pradesh was observed with highest WPR i.e. 15.8 per cent for the age group of 15-17 years. The UT of Daman & Diu had lowest WPR (0.2 per cent) for the age group of 15-17 years.

2.13 The person in the age group of 18-29 years had highest WPR i.e. 60.7 per cent in the state of Chhattisgarh and the lowest in the state of Jammu & Kashmir i.e. 22.1 per cent as observed during the survey period.

2.14 For the persons in the age group 30 years & above Nagaland had the highest WPR i.e. 77.3 per cent and the UT of Lakshadweep had lowest (35.1 per cent) WPR for this age group.

Unemployment Rate (UR)

2.15 The third important parameter studied under the Labour Force Survey was the unemployment rate. The unemployment rate signifies the proportion of persons who were available for work but did not get work during the reference period. Based on the two approaches the unemployment rate for different age groups is shown in table 2.3.

2.16 Based on the Usual Principal Status Approach, the unemployment rate at the All India level was estimated at 13.2 per cent for the age group 18-29 years. In case of male category of persons, the unemployment rate was estimated at 11.3 per cent whereas for female category, it was 20.0 per cent for the age group 18-29 years.

Table 2.3: UR for different age groups by different approaches (in %)

Approach	15-17 Years				18-29 Years				30 Years & Above			
	M	F	T	P	M	F	T	P	M	F	T	P
UPS	18.8	22.7	28.5	19.8	11.3	20.0	6.3	13.2	0.9	4.0	3.0	1.6
UPSS	12.6	13.7	21.5	13.0	8.7	14.6	2.7	10.2	0.5	2.2	3.0	0.9

M=Male F=Female T=Transgender P=Persons

Figure 3: UR for different age groups by different approaches (in %)

2.17 In the age group of 15-17 years Unemployment Rate (UR) was 19.8 per cent based on UPS approach at the All India level. In case of male category, the UR was 18.8 per cent and for female it was 22.7 per cent based on UPS approach. For transgender, UR was 28.5 per cent based on UPS approach. UR based on UPSS approach in the age group of 15-17 years was 13.0 per cent. Based on UPSS, the UR for male category was 12.6 per cent and for female it

was 13.7 per cent. Whereas for transgender the UR was observed to be 21.5 per cent.

2.18 Based on Usual Principal & Subsidiary Status Approach, the unemployment rate was estimated at 10.2 per cent for the age group 18-29 years at the All India level. While comparing gender wise unemployment rate, for male category of persons, it was 8.7 per cent, whereas for female category, the same was 14.6 per cent at the All India

level. For transgender unemployment rate was 6.3 per cent based on UPS and 2.7 per cent based on UPSS approach.

2.19 UR for the age 30 years & above was 1.6 per cent based on UPS approach at the All India level. For male category, UR was only 0.9 per cent, for female it was 4.0 per cent. Based on UPSS approach, the UR at the All India level was observed to the tune of 0.9 per cent. For male the UR was 0.5 per cent, whereas for female it was 2.2 per cent. Based on UPSS approach, the UR in case of transgender in this age group was 3 per cent. It can be inferred from the estimates that UR declined significantly with the age for male, female & transgender category.

2.20 Based on UPS approach the highest percentage of Unemployment i.e. 75.1 per cent was found in the state of Manipur for the age group of 15-17 years followed by Himachal Pradesh with 73.5 per cent UR for the age group of 15-17 years. The state of Mizoram and Gujarat revealed lowest 3.7 per cent each UR of the

age group 15-17 years during the survey.

2.21 Based on UPS approach in case of age group 18-29 years, the state of Sikkim had highest UR i.e. 54.1 per cent followed by Tripura (35.0 per cent) for the age group of 18-29 years. The UT of Daman & Diu had lowest 0.7 per cent UR for the age group of 18-29 years.

2.22 As per the Fourth EUS, at the All India level, the LFPR and WPR for the age group 18-29 years had increased slightly as compared to 3rd EUS. However during 5th EUS, LFPR and WPR have exhibited declining trend as compared to 4th EUS. During the fifth round, LFPR and WPR was estimated at 45.2 and 39.2 per cent whereas it was 49.0 and 42.7 per cent respectively under the fourth EUS based on UPS approach. Based on UPS approach, the Unemployment Rate has increased to 13.2 per cent under Fifth round as against 12.9 per cent under the fourth EUS. In case of UPSS, LFPR was estimated to be 47.3 per cent in fifth EUS whereas under fourth EUS, it was 52 per cent.

Table 2.4: The comparison of LFPR/WPR/UR among different EUS surveys for age groups 18-29 years by different approaches (in %)

Approach	18-29 Years								
	LFPR			WPR			UR		
	Third	Fourth	Fifth	Third	Fourth	Fifth	Third	Fourth	Fifth
UPS	47.3	49.0	45.2	41.2	42.7	39.2	13.0	12.9	13.2
UPSS	49.4	52.0	47.3	44.0	47.1	42.4	11.0	9.4	10.2

Activity Wise Distribution of Employed Persons

2.23 The employed persons are further classified based on the activity pursued by them during the reference period. Based on economic activities pursued by the employed persons in different reference periods, the persons aged 15-17 years, 18-29 years and 30 years & above are broadly classified as Self Employed, Wage/Salaried Worker, Contract Workers and Casual Laborers. Under the Usual Principal Status

Approach, the main economic activities pursued by the persons are classified as follows:

- i) worked in household enterprise as an own account worker;
- ii) worked in household enterprise as an employer;
- iii) worked as helper in household enterprise (unpaid family worker);
- iv) worked as regular salaried/wage employee;
- v) worked as contract worker;
- vi) Worked as casual wage labour in public works.

Table 2.5: Activity Wise distribution of workers by different age groups (in %)

Head	15-17 Years			18-29 Years			30 Years & above		
	R	U	R+U	R	U	R+U	R	U	R+U
Self Employed	40.8	30.9	39.7	40.5	33.3	39	51.2	43.4	49.2
Wage/ Salaried employee	5.1	18.9	6.5	14.1	37.6	19.0	10.5	33.8	16.5
Contract Worker	3.6	7.7	4.0	4.6	8.4	5.4	2.4	4.9	3.0
Casual Worker	50.6	42.6	49.7	40.8	20.7	36.6	35.9	17.9	31.3

R-Rural; U-Urban

Figure 4: Activity Wise distribution of workers by different age groups (in %)

2.24 It may be seen from the above table that majority of the persons were either self-employed or casual worker for all the age groups. While analyzing the results under 18-29 years of age group, it was evident that 39 per cent were self-employed followed by 36.6 per cent as casual

workers, 19 per cent under regular wage/ salaried employee category and remaining 5.4 per cent under the contract worker classification at the All India level (or Rural+ Urban).

2.25 While analyzing the results at sector level, it may be seen that in urban sector regular

wage/salaried employees were maximum with 37.6 per cent followed by 33.3 per cent under the self-employed classification, 20.7 per cent under the casual worker category and remaining 8.4 per cent under the contract worker category at the All India level for the age group of 18-29 years.

2.26 The survey results were compiled for the age group of 15-17 years, 18-29 years and 30 years and above. Based on the survey findings, majority of the persons were employed under the Code 1 classification of

Agriculture, forestry and fishing section based on Usual Principle Status Approach in all the age groups.

2.27 It may be observed from the Table 2.6 that in all the three age groups, a maximum number of persons were found to be engaged under Code 1 i.e. employed in Agriculture, forestry and fishing followed by worker engaged in transportation and storage, accommodation/food service activity, Information / Communication and Manufacturing sector.

Table 2.6: Distribution of workers by NIC 2008 based on Usual Principal Status Approach by different age groups (in %)

Code*	Rural +Urban		
	15-17 Years	18-29 Years	30 Years & above

Education wise classification of persons

2.28 In the report, persons aged 18-29 years were also classified by educational level vs. main activity pursued by them during the

reference period viz. employed, unemployed and not in labour force for different age groups. These tables are generated for rural + urban, rural and urban category for all the States/UTs/All India level for different age groups.

Table 2.7: Distribution of persons by educational classification based on Usual Principal Status Approach for the age group 18-29 years (in %)

Educational Classification	Employed	Un-employed	Not in Labour Force
Not Literate	43.0	2.2	54.8
Below Primary	46.7	2.5	50.8
Primary	47.2	3.1	49.8
Middle/Secondary/Higher Secondary	28.3	3.3	68.4
Certificate Course at Under-Graduate Level	29.3	9.0	61.7
Diploma at Graduate Level	35.1	10.5	54.4
Graduate & above	34.5	18.4	47.1

2.29 The results were compiled for not literate, below primary, primary, middle/ secondary/ higher secondary, certificate course at under graduate level, diploma at graduate level and graduate & above classification. It may be seen from the table that as the education level increases, the unemployment rate was also

found to be increasing. In case of graduates & above, the unemployment rate was estimated at 18.4 per cent for the age group 18-29 years. In case of less educated persons like not literate, below primary and primary persons aged 18-29 years, the unemployment rate was estimated at less than 4 per cent.

CONCEPTS AND DEFINITIONS

Important concepts and definitions used in the survey and relevant to this report are explained as below:

1.1 House: Every structure, tent or other place of shelter, etc. which is used primarily for residential use is considered as a house for the present survey.

1.2 Household: A group of persons normally living together and taking food from a common kitchen constitutes a household. It will include temporary stay-aways (those whose total period of absence from the household is expected to be less than 6 months) but exclude temporary visitors and guests (expected total period of stay less than 6 months). The members of a household may or may not be related by blood or marriage to one another. The following examples may be useful while determining the group of persons to be considered as households:

- (a) In case a hostel is listed, it will constitute a single household.
- (b) Inmates of hotel, lodging and boarding house etc. will also constitute a single household.
- (c) In deciding the composition of a household, more emphasis is to be placed on 'normally living together' than on ordinarily taking food from a common kitchen. In case the place of residence of a person is different from the place of boarding, he or she will be treated as a member of the household in which he or she resides.
- (d) A resident employee, or domestic servant or a paying guest will be considered as a member of the household in which he or she resides even though he or she is not a member of the same family if the period of stay is six month or above.
- (e) In case a member of a family (say a son or a daughter of the head of family) stays elsewhere like in hostel for studies or for any other reason for major part of the year, he/she will not be considered as a member of his/her parents household.

1.3 Household size: The number of members normally residing in a household is its size.

1.4 Economic activity: The entire spectrum of human activity falls into two categories: i) economic activity and ii) non-economic activity. Any activity that results in production of goods and services which adds value to the national product is considered as an economic activity. Further the economic activities have two parts namely i) market activities and ii) non-market activities. Market activities are those that involve remuneration to those who perform it, i.e., activity performed for pay or profit. Such activities include production of all goods and services for market including those of government services, etc. On the other hand non-market activities are those involving the production of primary commodities for own consumption and own account production of fixed assets. The term 'economic activity' under the fifth Annual Employment and Unemployment survey includes:

- i. All the market activities described above, i.e., the activities performed for pay or profit which result in production of goods and services for exchange,

- ii. Of the non-market activities,
 - a) All the activities relating to the primary sector which result in production (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.) of primary goods for own consumption.
 - b) The activities relating to the own-account production of fixed assets. Own account production of fixed assets include construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own account construction in the capacity of either a labour or a supervisor.

1.5 Activity status: It is the activity in which a person is engaged during the reference period, which in turn decides the person's participation in economic and /or non-economic activities. According to this, a person will be in one or a combination of the following three statuses during a reference period:

- i. Working or engaged in economic

- activity (work);
- ii. Not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work' in case the 'work' is available and
- iii. Neither engaged in any economic activity (work) nor available for 'work'.

1.6 Activity statuses mentioned against sl. no. (i) & (ii) above, are associated with 'being in labour force' and the last sl.no. (iii) is associated with 'not being in the labour force'. Being in labour force is further categorized into two parts (i) employed and unemployed.

1.7 The three broad activity statuses according to 5th EUS have been further subdivided into the following categories as listed below:

- i. working or being engaged in economic activity (employed):
 - a) worked as an own-account worker (self-employed);
 - b) employer (self-employed);
 - c) worked in household enterprise as 'helper' (unpaid family worker);
 - d) worked as regular salaried/wage employee other than contract worker;
 - e) worked as contract worker;

- f) worked as casual wage labour in public works;
- g) worked as casual wage labour in other types of works;
- ii. not working but seeking or available for work (unemployed);
- iii. neither working nor available for work (not in labour force)
 - i) attended educational institution;
 - ii) attended domestic duties;
 - iii) recipients of rent, pension, remittance, etc;
 - iv) not able to work due to disability;
 - v) Others (prostitutes, beggars, etc.);

1.8 The various concepts like, 'workers', 'unemployed', labour force, out of labour force are as explained below:

I. Workers (or employed): Persons who are engaged in any economic activity during the reference period or who, despite their attachment to their economic activity, have temporarily abstained from work, for reasons of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work constitute workers. Unpaid helpers

who assist in the operation of an economic activity in the household, farm or non-farm activities are also considered as workers.

II. Seeking or available for work

(or unemployed): Persons, who owing to lack of work, had not worked but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing condition of work and remuneration are considered as those who are 'seeking or available for work' (or unemployed).

III. Labour force: Persons who are either 'working' (employed) or 'seeking or available for work' (unemployed) or both during a major part of the reference period, constitute the labour force.

IV. Out of labour force: Persons who are neither 'working' and at the same time nor 'seeking or available for work' for various reasons during the major part of the reference period are considered to be 'out of the labour force'. The persons under this category includes students, persons engaged in domestic duties,

rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young or too old persons, beggars, prostitutes, etc.

1.9 It may be noted that workers have been further categorized as self-employed, regular salaried/wage employee and casual wage labour. The details of these categories are defined in the following paragraphs.

I. Self-employed: Persons who operate their own farm or non-farm enterprises or are engaged independently in a profession or trade on own-account or with one or a few partners are considered as self-employed. The essential feature of the self-employed is that they have autonomy (i.e., regarding how, where and when to produce) and economic independence (i.e. regarding market, scale of operation and money) for carrying out operation. The fee or remuneration received by them consists of two parts - the share of their labour and profit of the enterprise. In other words, their remuneration is determined wholly or mainly by sales or profits of the goods or services which are produced.

The self-employed persons may again be categorized into the following groups:

- i) **Own-account workers:** The self-employed persons, who operate their enterprises on their own account or with one or a few partners and who during the reference period by and large, run their enterprises without hiring any labour are called as own account workers. They may, however, have unpaid helpers to assist them in the activity of the enterprise.
- ii) **Employers:** The self-employed persons who work on their own account or with one or a few partners and by and large run their enterprises by hiring labour are considered as the employers.
- iii) **Helpers in household enterprise:** The helpers are a category of self-employed persons, mostly family members, who keep themselves engaged in their household enterprises, working full or part time and do not receive any regular salary or wages in return for the work performed. They do not run the household enterprise on their own but

assist the related person living in the same household in running the household enterprise.

1.10 Regular salaried/wage employee other than contract workers:

Persons working in others farm or non-farm enterprises (both household and non-household) and getting in return salary or wages on a regular basis (and not on the basis of daily or periodic renewal of work contract) are the regular salaried/wage employees. The category not only includes persons getting time-rate wage but also persons receiving piece-rate wage or salary and paid apprentices, both full time and part-time.

1.11 Worked on contract basis:

As per the definition of contract worker, a worker is deemed to be employed as contract worker when he/she is hired in connection with the work of an establishment by or through a contractor. Contract workmen are indirect employees; persons who are hired, supervised and remunerated by a contractor who, in turn, is compensated by the establishment. For the purpose of present survey, in addition to the above mentioned category of workers, the term contract workers includes workers whose work are

governed by a contract agreement either in writing or oral directly by the establishment. More precisely, the workers hired by the establishment directly for a specific job and for a specified period will also be categorized under the contract category of workers.

1.12 Casual wage labour: A person casually engaged in others farm or non-farm enterprises (both household and non-household) and getting in return wage according to the terms of the daily or periodic work contract is a casual wage labour. Usually in the rural areas, a type of casual labourers can be seen who normally engage themselves in 'public works' activities. 'Public works' are those activities which are sponsored by the Government or local bodies for construction of roads, digging of ponds, etc. as relief measures (like flood relief, drought relief, famine relief, etc.) and also under various employment generation schemes under poverty alleviation programmes.

1.13 Different approaches for determining activity status: The persons surveyed can be classified into various activity categories on the basis of activities pursued by

them during certain specified reference periods. There could be three reference periods viz. (i) one year, (ii) one week and (iii) each day of the reference week. Based on these three reference periods, three different measures of activity status are arrived at. These are termed respectively as usual principal status, current weekly status and current daily status. The activity status determined on the basis of a reference period of one year is known as the usual principal activity status of the person, that determined on the basis of a reference period of 1 week is known as the current weekly status (CWS) of the person and the activity status determined on the basis of a reference period of one day is known as the current daily status (CDS) of the person. In this report, the labour force related parameters are estimated for a reference period of one year.

1.14 Usual activity status: The usual activity status relates to the activity status of a person during the last completed twelve months from the date of survey. The activity in which a person spent relatively longer time (major time criterion) during the reference period is considered as the usual principal activity of the person. To

decide the usual principal activity of a person, he/she is first categorized as belonging to the labour force or not during the reference period on the basis of major time criterion. Persons, thus adjudged as not belonging to the labour force are assigned the broad activity status 'neither working nor available for work'.

1.15 For the persons belonging to the labour force, the broad activity status of either 'working' or 'not working but available for work and/or seeking work' is then ascertained again on the basis of the relatively longer time spent during the period in the labour force. Within the broad activity status so determined, the detailed activity status category of a person pursuing more than one such

Average monthly household earnings:

Average monthly earnings of the sample household i.e., all members of the household, from all the sources is to be filled against this item. A reference period of 12 months shall be observed for calculating the household includes earnings of members from different sources like income from trade, wage employment, casual labour, rental income, interest received, remittances from abroad, old age pension etc excluding earnings of domestic servant if any in the household.

activity will be determined again on the basis of the relatively longer time spent.

1.16 Subsidiary economic

activity status: A person whose usual principal status is determined on the basis of the major time criterion may have pursued some other economic activity for 30 days or more during the reference period. The status in which such economic activity is pursued during the reference period is the subsidiary economic activity status of the person. In case of multiple subsidiary economic activities, subsidiary activity will be determined on the basis of relatively longer time spent criterion.

Saving Bank account in any bank:

If any of the household member has saving bank account in any bank (government, private, co-operative).

Average monthly earnings in Rs.

For every member who is employed (status code 11-51), average monthly earnings is to be collected and entered in terms of codes as given in the schedule. Average Monthly earnings are defined as the monetary returns from economic activities undertaken during the reference period by members having status code 11-

51. In case of wage wage/salaried, contract and casual workers, the average monthly earnings includes wages and salaries, dearness allowances, other guaranteed allowances, over time payment, bonus, family allowances, or any

other social security payments made by the employer. In case of self employed persons, the earnings will be taken as the monthly amount received by them on an average during the reference period.

SAMPLING DESIGN & ESTIMATION PROCEDURE

Introduction

Labour Bureau has been entrusted with the task of conducting Annual Employment-Unemployment Surveys in the country. The objective of this annual survey is to regularly make available the basic inputs on labour force related parameters to facilitate policy formulation/review. The first such Annual Household Employment-Unemployment survey for the period 2009-10 was conducted during the year 2010. Till so far four such surveys have been conducted and thereon reports released. The present one is the Fifth Annual Employment-Unemployment Survey in the series.

2.1 In the current survey, a moving reference period is used to determine the usual status activity of the persons. The survey has been conducted in all the States/UTs by covering all the districts in the country. The field work of the present survey was launched in April, 2015 and completed in majority of the States/UTs by December, 2015. A

sample of about 1.57 lakh household schedules has been covered during the survey in 36 States/UTs.

2.2 Sample Design: A stratified multi-stage sample design has been adopted for the Fifth Annual Household Employment-Unemployment Survey. The first stage units (FSU) for rural sector are the 2011 census villages in all the States/UTs, except Kerala State, where panchayat wards are the FSUs. In case of urban sector, the latest available Urban Frame Survey (UFS) blocks for the period 2007-12 prepared by National Sample Survey Office are the First stage units.

2.3 Stratification: Each district of a State/UT has been divided into two strata: i) rural stratum comprising of all the rural areas of the district and ii) urban stratum comprising of all the urban areas of the district.

2.4 Sample Size: In all 36 States/UTs, a total sample of

13076 First Stage Units (FSUs) is allocated at All India level keeping in view the resource availability and other logistics. Broadly considering the population proportion, a sample of 7416 FSUs is allocated to rural sector in all the 36 States/UTs, while rest 5660 FSUs are allocated in the urban sector. While allocating the sample, additional weight age is given to the urban sector as compared to rural sector; so that the urban areas are not under represented in the survey on the basis of proportional allocation, with the condition that in major states the total sample size in urban sector does not exceed that of the rural sector.

2.5 Allocation of Sample to States/UTs: Distribution of total number of sample FSUs in rural sector among the States/UTs is done in proportion to their respective rural population as per 2011 census, subject to a minimum sample allocation to each State/UT. For urban sector, the sample FSUs are allocated among the 36 States/UTs in proportion to the UFS blocks for the period 2007-12. A minimum sample size in a State/UT is allocated at 24 FSUs with a

minimum of 12 each in rural and urban areas.

2.6 Allocation of State/UT level rural and Urban Stratum sample to districts: The State/UT level rural/ urban sample is further distributed among its districts in proportion to rural/ urban population/urban frame survey blocks. A minimum of 24 FSUs are allocated to each State/UT for rural and urban areas combined. Stratum level sample is adjusted to multiple of 4 FSUs with a minimum sample size of 4 FSUs in a stratum. In case of some North Eastern States and UTs a marginal increase in sample size is done due to their under representation in overall sample because of their lower population.

2.7 Selection of FSUs: For the rural stratum, the village lists based on 2011 census frame are taken in the same order and the required sample is drawn by using circular systematic sampling technique with probability proportional to size (size being the population of the village as per Census 2011). In case of urban stratum, the UFS blocks are arranged in ascending order based on the town variable. After

arranging UFS blocks, sample is drawn by circular systematic sampling. This arrangement is done to ensure that most of the towns are represented in the sample. In both, the rural and the urban strata, samples are drawn in the form of two independent sub-samples.

2.8 Criteria for hamlet group/sub block formation: Large FSUs having approximate present population of 1200 or more are divided into a suitable number (say, D) of 'hamlet-groups'(hg) in the rural sector and 'sub-blocks'(sb) in the urban sector as stated below.

APPROXIMATE PRESENT POPULATION OF THE SAMPLE VILLAGE/ URBAN BLOCK	NO. OF HG/ SB TO BE FORMED (D)
LESS THAN 1200 (NO HAMLET-GROUP/SUB BLOCK)	1
1200 TO 1799	3
1800 TO 2399	4
2400 TO 2999	5
3000 TO 3599	6
.....AND SO ON	

2.9 For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except Dehradun plains, Nainital Plains, Haridwar and Udham Singh Nagar), Poonch, Rajouri,

Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu & Kashmir and Idukki district of Kerala, the number of hamlet groups are formed as follows:

APPROXIMATE PRESENT POPULATION OF THE SAMPLE VILLAGE/ BLOCK	NO. OF HGS/ SBS TO BE FORMED (D)
LESS THAN 600 (NO HAMLET-GROUPS/SUB BLOCKS)	1
600 TO 899	3
900 TO 1199	4
1200 TO 1499	5
.....AND SO ON	

2.10 Selection of hamlet groups/sub blocks:

In case of large village/UFS block wherever hamlet-groups/sub-blocks have been formed, two hamlet-groups/sub-blocks are selected. The procedure to select the hg/sb is as follows:

- i) The hg/sb with maximum percentage share of population will always be selected and termed as hg/sb 1.
- ii) Second hg/sb will be selected from the remaining hgs/sbs by simple random sampling and termed as hg/sb 2.

Listing and selection of the households will be done independently in the two selected hamlet-groups/sub-blocks. In case hamlet-groups/sub-blocks is formed in a sample FSU, it is ensured that the hamlet-groups/sub-blocks formed are clearly identifiable in terms of physical landmarks. The FSU without hg/sb formation will be treated as sample hg/sb number 1.

2.11 Listing of households: After determining the hamlet-groups/sub-blocks i.e. areas to be

considered for listing, all the households in that area will be listed (including those found to be temporarily locked after ascertaining the temporariness of locking of households through local people). The hamlet-group/sub-block with sample hg/sb number 1 will be listed first and that with sample hg/sb number 2 will be listed next.

2.12 Formation of Second Stage Strata and allocation of households:

For canvassing the schedules, all the households listed in selected FSU/ hamlet-groups/ sub-blocks are to be stratified into four second stage strata (SSS) as given below:

The second-stage-strata in the rural and urban stratum will be formed based on the number of persons in a household aged 15 years and above. The four second-stage-strata (SSS) in the rural and urban strata are formed in the following order:

2.13 Allocation of households:

The number of households to be surveyed (h) in each second stage stratum in the sample FSUs is as follows:

SECOND STAGE STRATA (SSS)	NO. OF MEMBERS IN THE HOUSEHOLD AGED 15 YEARS & ABOVE
SSS1	1
SSS2	2-3
SSS3	4-5
SSS4	6 & MORE

SSS	WITHOUT HG/SB FORMATION		WITH HG/SB FORMATION IN BOTH RURAL & URBAN STRATA	
	RURAL	URBAN	HG1/SB1	HG2/SB2
H1	1	1	1	1
H2	3	4	2	2
H3	4	4	2	2
H4	4	3	1	1
TOTAL	12	12	6	6

2.14 Selection of Households:

From each Second Stage Strata the sample households are selected by simple random sampling without replacement.

2.15 Shortfall of households to be compensated: Shortfall of households in the frame of any particular SSS will be compensated from the same SSS of the other hg/sb or from the other SSS of the same or other hg/sb where additional household(s) are available. The procedure is as follows:

Step 1: Allocate the required number of households to each SSS wherever possible and identify the SSS having shortfall.

Step 2: In case of hg/sb formation, compensate from the same SSS of the other hg/sb, if available. Otherwise, go to Step 3.

Step 3: Find the SSS where additional households are available following the priority order of SSS 1, SSS 2, SSS 3 & SSS 4 and compensate.

2.16 The table given below may be useful for deciding the SSS from

which the compensation is to be made.

SSS HAVING SHORTFALL	PRIORITY ORDER OF SSS FOR COMPENSATION
1	2, 3, 4
2	1, 3, 4
3	1, 2, 4
4	1, 2, 3

2.17 If there is hg/sb formation, for each SSS as per priority order, compensation may be made from the hg/sb where shortfall occurs, failing which from other hg/sb and so on.

2.18 For example, if shortfall is in SSS 3 of hg/sb 1, first try to compensate from SSS3 of hg/sb 2,

failing which try from SSS 1 of hg/sb 1, failing which try from SSS 1 of hg/sb 2. If the shortfall still remains then try from SSS 2 of hg/sb 1, failing which try from SSS 2 of hg/ sb 2. If the shortfall still remains then try from SSS 4 of hg/sb 1, failing which try from SSS 4 of hg/ sb 2.

Estimation Procedure

t = subscript for t-th stratum

m = subscript for sub-sample (m =1, 2)

i = subscript for i-th FSU (village/panchayat ward/ UFS block)

d = subscript for a hamlet-group/ sub-block (d = 1, 2)

j = subscript for j-th second stage stratum in an FSU/hg/sb (j = 1,2,3,4)

k = subscript for k-th sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/ sb's formed in the sample FSU

D* = 1 if D = 1

= D-1 for FSUs with D > 1

N = total number of FSUs in any urban stratum

Z = total size of a rural stratum

z = size of selected sample village

n = number of sample FSUs surveyed in a stratum

H = total number of households listed in a second-stage stratum of an FSU
/ hamlet-group or sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of an FSU /
hamlet-group or sub-block of sample FSU

x, y = observed value of characteristics x, y under estimation

$\hat{X}, \hat{Y}$ = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

y_{tmidjk} = observed value of the characteristic y for the k -th household in the
 j -th second stage stratum of the d -th hg/ sb ($d = 1, 2$) of the i -th FSU
belonging to the m -th sub-sample for the t -th stratum.

Formulae for Estimation of Aggregates for a stratum in a district (rural & urban)

Listing Schedule 'A'

Rural stratum: For estimating the number of households possessing a characteristic

$$\hat{Y} = \frac{Z}{n} \sum_{i=1}^n \frac{1}{z_i} \{y_{i1} + D_i^* y_{i2}\}$$

Where y_{i1}, y_{i2} are the total number of households possessing the characteristic y in hg's 1 & 2 of the i -th FSU respectively.

Urban Stratum: For estimating the number of households possessing a characteristic in the urban stratum of a district.

$$\hat{Y} = \frac{N}{n} \sum_{i=1}^n \{y_{i1} + D_i^* y_{i2}\}$$

Where y_{i1}, y_{i2} are the total number of households possessing the characteristic y in sub-blocks 1 & 2 of i -th FSU respectively.

Schedule 'B': (Employment – Unemployment Survey Schedule)

Estimation formula for a rural stratum in a district:

Rural:

$$\hat{Y} = \sum_{j=1}^4 \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left\{ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right\}$$

Estimation formula for an urban stratum in a District:

$$\hat{Y} = \sum_{j=1}^4 \frac{N}{n_j} \sum_{i=1}^{n_j} \left\{ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right\}$$

Overall Estimate for Aggregates:

Overall estimate for aggregates for a stratum ($\hat{Y}_t$) based on two sub-samples is obtained as:

$$\hat{Y}_t = \frac{1}{2} \sum_{m=1}^2 \widehat{Y}_{tm}$$

Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate $\hat{Y}$ at the State/ UT/ all-India level is obtained by summing the stratum estimates $\hat{Y}_t$ over all strata belonging to the State/ UT/ All-India.

Table (1): Number of villages/UFS blocks allocated and actually surveyed for each State/UT

Rural+Urban

Sl. No.	Name of State/UT/ All India	Number of villages/UFS blocks allocated			Actual number of villages/UFS blocks surveyed		
		Rural	Urban	Total	Rural	Urban	Total
1	2	3	4	5	6	7	8
1	Andhra Pradesh	296	220	516	295	220	515

Note: 1. Population and Percentage decadal change in population aged 15 years and above were calculated using Table C13 of Census 2001 and 2011.

2. For any category of persons of any State/UT/All-India, Projected population as on 1st March 2015 has been derived using the formula. $A = A_1 * [1 + (R/100)]^{(52/120)}$, where A_1 is the census population as on 1st March 2011, R is the percentage decadal change in population between 2001 and 2011 and A is the projected population as on 1st July 2015.

Annexure-III

Table (A2): Census Population as on 1st March 2011, percentage decadal change in population of aged 15 years and above between census 2001 and 2011 and projected population as on 1st July 2015 for each State/UT and All-India.

.....about the Labour Bureau

An apex organization for providing data base at the national level for policy formulation, evaluation and research, the Labour Bureau in the Union Ministry of Labour and Employment is the epicenter of all activities involving planning, collection and dissemination of data on various facets of Labour which forms a sound basis for decision making in the Government, industry and by various other user organizations/individuals. Labour Bureau is a store house of important economic indicators like the Consumer Price Index Numbers for industrial and agricultural workers, wage rates, industrial relations, socio-economic conditions in un-organized sector, evaluation and review of working of labour legislations in the country and the like. Labour Bureau has been providing an uninterrupted service to the national and international fora like ILO for the last fifty years. Today, it has assumed an important role in the labour matters and has acquired an un-disputed and indispensable status in the field of labour statistics. Equipped with the expertise of conducting surveys at the national/regional level in diverse fields and in providing in-depth analysis, the organization continues in its pursuit of excellence.
