PREFACE

India's population is growing at a rate of 17.7 per cent per decade and its current size is around 1.21 billion according to 2011 census. India is among the youth countries of the world and its young population (15-59 years) is increasing steadily. Population projections show that the average age of India's population is expected to be around 29 years in 2020 as against 37 years in China and the United States of America, 45 years in West Europe and 48 years in Japan. As the developed countries of the world are observing higher rate and ageing, the global economy is expected to witness a shortage of young population of around 56 million by 2020. But India would be the only country with a surplus of 47 million youth.

India has a great opportunity to meet the future skilled manpower demands of the World, India can become the worldwide sourcing hub for skilled workforce. The challenges for India get magnified, as it needs to reach out to the million plus workforce ready population, while facing an ever increasing migration of labour from agriculture to manufacturing and services. With the government launching a number of schemes to empower the young workforce, the challenges magnify as there is a need for effective implementation of the schemes at the grass root level with equal participation from all the stakeholders concerned.

Under Fifth Annual Employment-Unemployment Survey, an attempt has been made to assess the skill scenario of the country. The information related to vocational training of population aged 15 years and above has been collected. In the current report, education and skill related parameters have been generated by social group, type of vocational training, broad activity status, etc. for all States/UTs as well as at All India level to explore the current scenario of education and vocational training.

I hope the report will prove to be an important input for the policymakers to draft/review the policies particularly related to the education and skill development which will help our country to become a skill capital of the world during the coming decades.

ANNEXURE III	COVERAGE OF HOUSEHOLD AND POPULATION.	1-2
	POPULATION PROJECTION.	3-4
ANNEXURE IV	TABLES (1 TO 7)	1-197
TABLES (1)	PER 1000 DISTRIBUTION OF PERSONS AGED 15 YEARS & ABOVE BY BROAD ACTIVITY WHO RECEIVED VOCATIONAL TRAINING ACCORDING TO USUAL PRINCIPAL STATUS (PS) APPROACH	1-37
TABLES (2)	PER 1000 DISTRIBUTION FOR PERSONS AGED 15 YEARS & ABOVE BY MAIN ACTIVITY & EDUCATIONAL CLASSIFICATION ACCORDING TO USUAL PRINCIPAL STATUS (PS) APPROACH	38-148
TABLES (3)	PER 1000 DISTRIBUTION OF PERSONS AGED 15 YEARS & ABOVE WITH GRADUATE DEGREE & ABOVE IN DIFFERENT FIELD AND MAIN ACTIVITY BY THEM ACCORDING TO USUAL PRINCIPAL STATUS (PS) APPROACH	149-185
TABLES (4)	PER 1000 DISTRIBUTION OF PERSONS AGED 15 YEARS & ABOVE BY GENDER AND STATUS OF VOCATIONAL TRAINING FOR EACH STATE/UT	186-188
TABLES (5)	PER 1000 DISTRIBUTION OF PERSONS AGED 15 YEARS AND ABOVE RECEIVED/RECEIVING VOCATIONAL TRAINING IN DIFFERENT FIELDS AND MAIN ACTIVITY PURSUED AT ALL INDIA LEVEL	189-191
TABLES (6)	PER 1000 DISTRIBUTION OF PERSONS AGED 15 YEARS AND ABOVE WHO RECEIVED/RECEIVING VOCATIONAL TRAINING IN DIFFERENT FIELDS AND PURSUING DIFFERENT ECONOMIC ACTIVITIES BASED ON USUAL PRINCIPAL STATUS (PS) APPROACH AT FOR EACH STATE/UT	192-194
TABLES (7)	PER 1000 DISTRIBUTION OF PERSONS AGED 15 YEARS AND ABOVE WHO RECEIVED/RECEIVING VOCATIONAL TRAINING IN DIFFERENT FIELDS AND PURSUING DIFFERENT ECONOMIC ACTIVITIES BASED ON USUAL PRINCIPAL STATUS (PS) APPROACH AT ALL INDIA LEVEL	195-197

EXECUTIVE SUMMARY

- The Report, “Education, Skill Development and Labour Force” is based on the Fifth Annual Employment-Unemployment Survey 2015-16 conducted by Labour Bureau.
- The survey has been conducted in all the States/UTs and covers all the districts and the field work was executed from April, 2015 to December, 2015.
- A total sample of 1,56,563 household schedules has been covered with a break up of 88,783 households in the rural sector and 67,780 households in the urban sector.
- A total of 7,81,793 members of sample households have been covered, out of which 4,48,254 members reside in rural households and the remaining 3,33,539 members reside in the urban households.
- All the education and skill related tables are generated State wise/Gender wise/Sector wise.
- All the estimates are derived for the persons aged 15 years and above only.
- Population aged 15 years and above who received/are receiving vocational training is estimated at 5.4 percent at the All India level. In rural and urban areas, it is 5.5 per cent and 5.4 per cent respectively.
- Among the social groups, a highest 6.1 per cent of persons aged 15 years and above under Scheduled Tribe category reported to have received/been receiving vocational training followed by 5.6 per cent under Other Backward Classes category and 5.5 per cent under others category.
- At the All India level, 74.2 per cent of the persons aged 15 years and above who have received/been receiving vocational training have reported to be employed during the reference period.
- A significant proportion of females, 38.5 per cent, have not joined the labour force after receiving vocational training in different fields.

- Analysis of the results at social group level reveals that 45.1 per cent of females under the Others category have reported to be "not in labour force" after receiving vocational training in different fields.
- The survey results reveal that with increase in education level, the unemployment rate among persons aged 15 years and above has also increased.
- In case of 'graduates' and 'post graduates', the proportion of unemployed persons is 10 per cent and 9.8 per cent respectively based on Usual Principal Status approach.
- The survey results have been derived separately for persons who received/are receiving formal and informal vocational training. Out of the 5.4 per cent Vocationally trained persons, 2.0 per cent received formal training and the remaining 3.4 per cent are informally trained.
- The percentages of formally trained persons are estimated at 1.8 per cent and 2.6 per cent in rural and urban sectors respectively.
- The percentages of informally trained persons are estimated at 3.6 per cent and 2.8 per cent in rural and urban sectors respectively.
- In case of informal training, the percentage of vocationally trained unemployed persons is found to be marginal at 3.4 per cent whereas in case of formal training, the percentage of vocationally trained unemployed persons is estimated at 19.0 per cent.
- Among vocationally trained employed persons, 41.6 per cent are in self-employed category followed by 27.0 per cent under the wage/salaried employee category. The share of vocationally trained contract worker category is found to be the lowest at 8.1 per cent.
- Among the formally trained employed persons, 58 per cent are reported in wage/salaried category followed by 24.8 per cent under the self-employed category.
- In case of informally trained employed persons, a majority of 55.6 per cent are self-employed followed by 19.5 per cent under the casual worker category and 16.5 per cent as wage/salaried employees.

CHAPTER I

INTRODUCTION

Education and Economic Growth

1.1 Education is fundamental to the growth and prosperity of a nation. Education is also an effective means to achieve inclusive growth in India by educating the underprivileged, vulnerable and marginalized people so that they participate effectively in the growth process. Hanushek & Woessman (2007)¹ provide strong evidence that Educational quality – measured by what people know – has powerful effects on individual earnings, on the distribution of income, and on economic growth. They conclude that cognitive skill of the population is powerfully related to economic growth. The previous year Economic Survey² highlighted the issue of low standards of education in the country and stated that attention needs to be shifted away from

inputs to outcomes and focusing on building quality education and skill development infrastructure. Education and more importantly quality education is therefore one of the critical inputs to convert the vast young population of India into productive asset.

1.2 A number of initiatives have been taken in the field of education at all levels. The right to education Act, 2010 entitles every child in the age group of 6-14 years to free and compulsory education. Sarva Siksha Abhiyaan, Mid-Day Meal scheme, Rashtriya Madhyamik Shiksha Abhiyaan, (RMSA), Model School Scheme (MSS) and Saakshar Bharat (SB)/ Adult Education are important initiatives taken in this regard. Some recent initiatives in the area of higher and vocational education which aimed to enhance the access, equality, quality, innovation etc. are Rashtriya Uchchatar Shiksha Abhiyan (RUSA), Technical Education Quality Improvement

¹ Hanushek, E.A. & L. Woessmann, 2007, "The role of Education Quality in Economic Growth." World Bank, *Policy Research Working Paper* 4122.

² Government of India, Ministry of Finance, Economic Survey, 2014-15, p.132

Programme (TEQIP) and National Skill Qualification Framework (NSQF).

Skill Development

1.3 Skill development is crucial from the perspective of both employability and sustained economic growth based on high productivity. Skill development is essential to enhance the employability of the new entrants to workforce by equipping them with right skills. Similarly, regular up skilling and re-skilling is required to maintain the employability levels of those already in the labour force. Quality of labour force is also one of the important determinants of growth of labour productivity. A highly skilled workforce facilitates generation of new ideas and innovation which is vital to achieve productivity growth and competitive advantage in wake of the rapidly changing demands of international competitiveness. Against this backdrop, India faces a big challenge as stated in the National Skill Development Policy,

2015³ that “Our country presently faces a dual challenge of paucity of highly trained workforce, as well as non-employability of large sections of the conventionally educated youth, who possess little or no job skills”. A skill gap study has been conducted by the NSDC over 2010-2014, which indicates that there is an additional net incremental requirement of 109.73 million skilled manpower by 2022 in twenty four key sectors.

1.4 The Government is laying due thrust on skill development and has set a target for skilling 500 million persons by the year 2022. The Ministry of Skill Development and Entrepreneurship was set up in November 2014 to drive the ‘Skill India’ agenda in a “Mission Mode” in order to converge existing skill training initiatives and combine scale and quality of skilling efforts, with speed. The Government seeks to successfully meet the challenge of developing skills and effectively utilizing them at the same time as a number of initiatives such as ‘Skill India’, ‘Make in India’ and ‘Start up India’

³ <http://www.skilldevelopment.gov.in/National-Policy-2015.html>.

have been launched simultaneously. The Government is focused on both skill development and Entrepreneurship addresses both skill development and entrepreneurship development. The Government has also launched the 'Make in India' campaign to create job opportunities for the growing young population in the manufacturing sector. 'Start up India' initiative has also been launched to encourage entrepreneurship in the country. Pradhan Mantri Kaushal Vikash Yojana (PMKVY) an outcome-based

skill training scheme for poor rural youth are also being implemented for skill development in the country. The Government is also implementing schemes for vocationalization of school and higher education. Considering the ample importance of skill development, Labour Bureau collected information related to vocational training under Fifth Annual Employment – Unemployment Survey 2015-16 for persons aged 15 years and above and this report dealt with the statistics relates to the skilled labour force in the country for the year of 2015-16.

CHAPTER II

EDUCATION AND SKILL DEVELOPMENT

Vocational Training

2.1 Skill development is one of the paramount subject matter in India and the Government initiated various policies and programmes to improve or create skills in its labour force. Considering the ample importance of skill development, Labour Bureau

collected information related to vocational training under Fifth Annual Employment – Unemployment Survey 2015-16 for persons aged 15 years and above. This chapter portrays National level and inter-state highlights of education and skill development in India.

Figure-2.1: Distribution of persons aged 15 years & above who received/were receiving vocational training (in %)

2.2 Figure 2.1 exhibits the distribution of persons aged 15 years & above who received/were receiving vocational training during the reference period. Vocational training plays a vital

role in developing skills among the people. At the All India level, 5.4 per cent of persons aged 15 years and above were reported to have received/been receiving vocational training. The percentage of

population who received/were receiving vocational training in rural and urban areas was estimated at 5.5 and 5.4 per cent respectively. The gender wise

estimates show that the percentage of females who received/ were receiving vocational training was less than the half of its counterpart.

Table 2.1: Distribution of persons aged 15 years & above who received/were receiving vocational training by broad activity status (in %)

Sector	Employed				Un-employed				Not in labour force			
	M	F	T	P	M	F	T	P	M	F	T	P
Rural + Urban	83.7	51.7	100	74.2	5.6	9.8	-	6.9	10.7	38.5	-	18.9
Rural	83.4	53.4	-	74.5	6.2	10.2	-	7.4	10.5	36.4	-	18.2
Urban	84.6	47.4	100	73.5	4.2	8.9	-	5.6	11.2	43.7	-	20.9

M-Male, F- Female, T-Transgender, P-Persons

2.3 Table 2.1 presents distribution of persons aged 15 years & above who received/ were receiving vocational training by broad activity status under Usual Principal Status (UPS) approach. Among the persons reported as received/were receiving vocational training, 74.2 per cent were reported to be employed while 6.9 per cent were unemployed. A noticeable share (18.9 per cent) of population who received/were receiving vocational training were reported to be not participating in the labour force. At the All India level, a significantly high

proportion of females (38.5 per cent) had reported to be out of labour force. The sector level estimates were not showing any commendable variation among the broad activity status. The results have been compiled for all the States/UTs by Social Group/Gender/Sector.

Education level and Broad activity

2.4 Distribution for persons aged 15 years & above by educational classification and main activity status is exhibited in Figure 2.2. The survey results revealed high labour force participation among

the persons with 'graduate' and 'post graduate & above' educational classification. However, the proportion of unemployed persons was also on the increasing side with the increase in education level. The unemployed proportion among 'graduates' and 'post graduates & above' was estimated at 10.0 per cent and 9.8 per cent respectively. The persons having 'secondary'

and 'higher secondary' educational classification reported low rate of participation in labour force and were estimated at 44.7 per cent and 42.3 per cent respectively. The unemployment proportion among the persons classified in 'secondary' and 'higher secondary' educational classifications was estimated at 1.9 and 3.1 per cent respectively.

Figure 2.2: Distribution for persons aged 15 years & above by main activity & educational classification according to Usual Principal Status (UPS) approach (in %)

2.5 The results of educational classification and main activity have been compiled for all the States/UTs by Gender/Social-Group/Sector. The State wise highest and lowest per 1000

distribution of employed persons aged 15 years & above by educational classification according to Usual Principal Status (UPS) approach have also been compiled under the survey.

Table 2.2: State wise highest and lowest per 1000 distribution of employed persons aged 15 years & above by educational classification according to Usual Principal Status (UPS) approach.

Educational Classification	Highest	Lowest
Not literate	Nagaland(785)	Lakshadweep (42)
Below Primary	Mizoram (786)	Lakshadweep (144)
Primary	Nagaland (784)	Lakshadweep (176)
Middle	Nagaland (745)	Lakshadweep (313)
Secondary	Daman & Diu (560)	Tripura (263)
Higher secondary	Chhattisgarh(514)	Lakshadweep (248)
Certificate course at undergraduate level	Daman & Diu (1000)	Uttar Pradesh (228)
Diploma/ certificate	Chandigarh (1000)	Tripura (75)
Graduate	Chhattisgarh (686)	Lakshadweep (327)
Post graduate & above	Mizoram (938)	Dadra & Nagar Haveli (327)

2.6 Table 2.2 shows that the highest proportion of employed persons with 'not literate', 'primary' and 'middle' educational classifications were reported in the State of Nagaland while Lakshadweep had the lowest proportion of employed persons under these educational classifications. In the Union Territory of Chandigarh, all the persons with 'Diploma /certificate' educational classification were

reported to be employed according to the Usual Principal Status (UPS) approach. The highest proportion of persons with educational qualifications of 'higher secondary' and 'graduate' were found to be employed in the State of Chhattisgarh. The State of Tripura had the lowest proportion of employed persons with the educational qualifications of 'secondary' and 'diploma/certificate'. In case of persons with educational

classification of 'certificate course at undergraduate level', the State of Uttar Pradesh had the lowest employment proportion.

Graduate degree and above in different fields

2.7 Distribution of persons aged 15 years & above with Graduate degree and above in different fields and main activity pursued by them according to Usual Principal Status (UPS) approach is exhibited in Figure 2.3. The survey results revealed that there was more than 70 per cent labour force participation among the persons with 'Medical science' and

'Agricultural, Forestry, Fishery and Animal Husbandry' fields of education. The unemployed proportion was estimated to be the lowest at 4 per cent among the persons with 'Medical Science' field of education. Under both the 'arts & humanities' and 'natural science, mathematics & statistics' fields of education, around 60 per cent participation in labour force was reported. The highest 38.9 per cent of persons with Graduate degree and above in 'Arts and Humanities' field of education were found to be out of labour force.

Figure-2.3: Distribution of persons aged 15 years & above with Graduate degree and above in different fields and main activity pursued by them according to Usual Principal Status Approach (in %)

Type of Training

2.8 The information related to vocational training was collected by the type of training namely, formal and informal. As per the concepts and definitions of this survey, informal training is defined as the process of acquiring

the expertise in a vocation through ancestors over generations. The formal vocational training is a training which is acquired through institutions under the structural training programme and led to a recognised certificate or diploma.

Figure 2.4: Distribution of persons aged 15 years & above by type of vocational training (in %)

2.9 Figure 2.4 shows the pattern of vocational training of population aged 15 years and above. At the All India level, only 5.4 per cent of the persons aged 15 years & above reported to have received/been receiving vocational training, out of which, majority of the persons i.e. 3.4 per cent acquired/were acquiring informal vocational training. Only 2.0 per cent of the persons aged 15 years

and above were reported to have received/been receiving formal vocational training. Going through the sector wise estimates, majority of the vocationally trained (3.6 per cent) persons in rural areas acquired training through informal system, whereas in urban areas, the difference in proportion of formal and informal training was not significant.

Table 2.3: Distribution of labour force aged 15 years & above who received/were receiving vocational training by gender, nature of training and activity status (in %)

Type of Training	employed				unemployed			
	M	F	T	P	M	F	T	P
Formal	84.5	69.7	68.1	81.0	15.5	30.3	31.9	19.0
Informal	98.1	91.4	100.0	96.6	1.9	8.6	-	3.4

M-Male, F-Female, T-Transgender, P-Persons

2.10 Table 2.3 shows that among informally trained labour force, 96.6 per cent were employed under the Usual Principal Status approach. At the same time, only 81.0 per cent of the formally trained persons were reported as employed under the same approach. The results indicate a true picture of India's economy with a dominant share of unorganised sector.

2.11 Figure 2.5 presents the distribution of vocationally trained/being trained labour force by activity status and by field of training according to the Usual Principal Status approach. Among the formally and informally trained persons, it can be seen that the Unemployment Rate is less in informally trained labour force. Under both the formal and informal types of training, the

highest Unemployment Rate was observed among the persons with 'Beauty & wellness' field of training. All the persons who

acquired formal vocational training in the fields of 'Retailers' and 'Rubber' were reported to be employed.

Figure 2.5: Distribution of labour force aged 15 years and above received/ were receiving vocational training in different fields at All India level (in %)

01-Agriculture and food processing, 02-Automobile, 03-Beauty & wellness sector, 04 -Banking, Financial Services and Insurance (BFSI), 05-Capital goods, 06 - Construction, 07 - Electronics, 08 - Gem & Jewellery, 09 - Healthcare, 10 - Plumbing, 11- IT/ITEs, 12 - Leather, 13 - Media and Entertainment, 14 - Retailers, 15 - Rubber, 16 - Security, 17 - Telecom, 18 - Khadi & handicrafts, 19 - Hotel & Catering, 20 - Apparel/Textiles, 21 - Tour/Travel related, 22 - Nursing/Midwifery, 99 - Others

Table 2.4: Distribution of persons aged 15 years & above who received/were receiving vocational training by activities based on Usual Principal Status (ps) approach (in %)

Sector	self employed	wage/salaried employee	contract worker	casual worker
Rural + Urban	41.6	27.0	8.1	23.4
Rural	42.1	22.4	8.3	27.2
Urban	40.2	38.9	7.5	13.5

2.12 Under broad category of employed persons who received/were receiving vocational training, 41.6 per cent were in the self employed category followed by the wage/salaried employee category (27 per cent). The share of

vocationally trained contract worker category was the lowest at 8.1 per cent. The variations at sectoral level estimates were due to the distribution pattern of employed persons under these activities in rural and urban areas.

Figure 2.6: Distribution of persons aged 15 years and above who received/were receiving vocational training and pursuing different economic activities based on Usual Principal Status (ps) approach (in %)

2.13 The sectoral level distribution of persons aged 15 years and above who received/were receiving vocational training and pursuing different economic activities based on Usual Principal Status (UPS) approach estimated percentages are exhibited in Figure 2.6. Among formally trained employed

persons, more than 50 per cent were reported to be employed in wage/salaried category followed by the self-employed category. In the case of informally trained employed persons more than the half were reported to be employed in the self-employed category followed by the casual workers.

CONCEPTS AND DEFINITIONS

Important concepts and definitions used in the survey and relevant to this report are explained as below:

1.1 House: Every structure, tent or other place of shelter, etc. which is used primarily for residential use is considered as a house for the present survey.

1.2 Household: A group of persons normally living together and taking food from a common kitchen constitutes a household. It will include temporary stay-aways (those whose total period of absence from the household is expected to be less than 6 months) but exclude temporary visitors and guests (expected total period of stay less than 6 months). The members of a household may or may not be related by blood or marriage to one another. The following examples may be useful while determining the group of persons to be considered as households:

- (a) In case a hostel is listed, it will constitute a single household.
- (b) Inmates of hotel, lodging and boarding house etc. will also constitute a single household.
- (c) In deciding the composition of a household, more emphasis is to be placed on 'normally living together' than on ordinarily taking food from a common kitchen. In case the place of residence of a person is different from the place of boarding, he or she will be treated as a member of the household in which he or she resides.
- (d) A resident employee, or domestic servant or a paying guest will be considered as a member of the household in which he or she resides even though he or she is not a member of the same family if the period of stay is six month or above.
- (e) In case a member of a family (say a son or a daughter of the head of family) stays elsewhere like in hostel for studies or for any other reason for major part of the year, he/she will not be considered as a member of his/her parents household.

1.3 Household size: The number of members normally residing in a household is its size.

1.4 Economic activity: The entire spectrum of human activity falls into two categories: i) economic activity and ii) non-economic activity. Any activity that results in production of goods and services which adds value to the national product is considered as an economic activity. Further the economic activities have two parts namely i) market activities and ii) non-market activities. Market activities are those that involve remuneration to those who perform it, i.e., activity performed for pay or profit. Such activities include production of all goods and services for market including those of government services, etc. On the other hand non-market activities are those involving the production of primary commodities for own consumption and own account production of fixed assets. The term 'economic activity' under the fifth Annual Employment and Unemployment survey includes:

- i. All the market activities described above, i.e., the activities performed for pay or profit which result in production of goods and services for exchange,

- ii. Of the non-market activities,
 - a) All the activities relating to the primary sector which result in production (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.) of primary goods for own consumption.
 - b) The activities relating to the own-account production of fixed assets. Own account production of fixed assets include construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own account construction in the capacity of either a labour or a supervisor.

1.5 Activity status: It is the activity in which a person is engaged during the reference period, which in turn decides the person's participation in economic and /or non-economic activities. According to this, a person will be in one or a combination of the following three statuses during a reference period:

- i. Working or engaged in economic

- activity (work);
- ii. Not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work' in case the 'work' is available and
- iii. Neither engaged in any economic activity (work) nor available for 'work'.

1.6 Activity statuses mentioned against sl. no. (i) & (ii) above, are associated with 'being in labour force' and the last sl.no. (iii) is associated with 'not being in the labour force'. Being in labour force is further categorized into two parts (i) employed and unemployed.

1.7 The three broad activity statuses according to 5th EUS have been further subdivided into the following categories as listed below:

- i. working or being engaged in economic activity (employed):
 - a) worked as an own-account worker (self-employed);
 - b) employer (self-employed);
 - c) worked in household enterprise as 'helper' (unpaid family worker);
 - d) worked as regular salaried/wage employee other than contract worker;
 - e) worked as contract worker;

- f) worked as casual wage labour in public works;
- g) worked as casual wage labour in other types of works;
- ii. not working but seeking or available for work (unemployed);
- iii. neither working nor available for work (not in labour force)
 - i) attended educational institution;
 - ii) attended domestic duties;
 - iii) recipients of rent, pension, remittance, etc;
 - iv) not able to work due to disability;
 - v) Others (prostitutes, beggars, etc.);

1.8 The various concepts like, 'workers', 'unemployed', labour force, out of labour force are as explained below:

I. Workers (or employed): Persons who are engaged in any economic activity during the reference period or who, despite their attachment to their economic activity, have temporarily abstained from work, for reasons of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work constitute workers. Unpaid helpers

who assist in the operation of an economic activity in the household, farm or non-farm activities are also considered as workers.

II. Seeking or available for work

(or unemployed): Persons, who owing to lack of work, had not worked but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing condition of work and remuneration are considered as those who are 'seeking or available for work' (or unemployed).

III. Labour force: Persons who are either 'working' (employed) or 'seeking or available for work' (unemployed) or both during a major part of the reference period, constitute the labour force.

IV. Out of labour force: Persons who are neither 'working' and at the same time nor 'seeking or available for work' for various reasons during the major part of the reference period are considered to be 'out of the labour force'. The persons under this category includes students, persons engaged in domestic duties,

rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young or too old persons, beggars, prostitutes, etc.

1.9 It may be noted that workers have been further categorized as self-employed, regular salaried/wage employee and casual wage labour. The details of these categories are defined in the following paragraphs.

I. Self-employed: Persons who operate their own farm or non-farm enterprises or are engaged independently in a profession or trade on own-account or with one or a few partners are considered as self-employed. The essential feature of the self-employed is that they have autonomy (i.e., regarding how, where and when to produce) and economic independence (i.e. regarding market, scale of operation and money) for carrying out operation. The fee or remuneration received by them consists of two parts - the share of their labour and profit of the enterprise. In other words, their remuneration is determined wholly or mainly by sales or profits of the goods or services which are produced.

The self-employed persons may again be categorized into the following groups:

- i) **Own-account workers:** The self-employed persons, who operate their enterprises on their own account or with one or a few partners and who during the reference period by and large, run their enterprises without hiring any labour are called as own account workers. They may, however, have unpaid helpers to assist them in the activity of the enterprise.
- ii) **Employers:** The self-employed persons who work on their own account or with one or a few partners and by and large run their enterprises by hiring labour are considered as the employers.
- iii) **Helpers in household enterprise:** The helpers are a category of self-employed persons, mostly family members, who keep themselves engaged in their household enterprises, working full or part time and do not receive any regular salary or wages in return for the work performed. They do not run the household enterprise on their own but

assist the related person living in the same household in running the household enterprise.

1.10 Regular salaried/wage employee other than contract workers:

Persons working in others farm or non-farm enterprises (both household and non-household) and getting in return salary or wages on a regular basis (and not on the basis of daily or periodic renewal of work contract) are the regular salaried/wage employees. The category not only includes persons getting time-rate wage but also persons receiving piece-rate wage or salary and paid apprentices, both full time and part-time.

1.11 Worked on contract basis:

As per the definition of contract worker, a worker is deemed to be employed as contract worker when he/she is hired in connection with the work of an establishment by or through a contractor. Contract workmen are indirect employees; persons who are hired, supervised and remunerated by a contractor who, in turn, is compensated by the establishment. For the purpose of present survey, in addition to the above mentioned category of workers, the term contract workers includes workers whose work are

governed by a contract agreement either in writing or oral directly by the establishment. More precisely, the workers hired by the establishment directly for a specific job and for a specified period will also be categorized under the contract category of workers.

1.12 Casual wage labour: A person casually engaged in others farm or non-farm enterprises (both household and non-household) and getting in return wage according to the terms of the daily or periodic work contract is a casual wage labour. Usually in the rural areas, a type of casual labourers can be seen who normally engage themselves in 'public works' activities. 'Public works' are those activities which are sponsored by the Government or local bodies for construction of roads, digging of ponds, etc. as relief measures (like flood relief, drought relief, famine relief, etc.) and also under various employment generation schemes under poverty alleviation programmes.

1.13 Different approaches for determining activity status: The persons surveyed can be classified into various activity categories on the basis of activities pursued by

them during certain specified reference periods. There could be three reference periods viz. (i) one year, (ii) one week and (iii) each day of the reference week. Based on these three reference periods, three different measures of activity status are arrived at. These are termed respectively as usual principal status, current weekly status and current daily status. The activity status determined on the basis of a reference period of one year is known as the usual principal activity status of the person, that determined on the basis of a reference period of 1 week is known as the current weekly status (CWS) of the person and the activity status determined on the basis of a reference period of one day is known as the current daily status (CDS) of the person. In this report, the labour force related parameters are estimated for a reference period of one year.

1.14 Usual activity status: The usual activity status relates to the activity status of a person during the last completed twelve months from the date of survey. The activity in which a person spent relatively longer time (major time criterion) during the reference period is considered as the usual principal activity of the person. To

decide the usual principal activity of a person, he/she is first categorized as belonging to the labour force or not during the reference period on the basis of major time criterion. Persons, thus adjudged as not belonging to the labour force are assigned the broad activity status 'neither working nor available for work'.

1.15 For the persons belonging to the labour force, the broad activity status of either 'working' or 'not working but available for work and/or seeking work' is then ascertained again on the basis of the relatively longer time spent during the period in the labour force. Within the broad activity status so determined, the detailed activity status category of a person pursuing more than one such

Average monthly household earnings:

Average monthly earnings of the sample household i.e., all members of the household, from all the sources is to be filled against this item. A reference period of 12 months shall be observed for calculating the household includes earnings of members from different sources like income from trade, wage employment, casual labour, rental income, interest received, remittances from abroad, old age pension etc excluding earnings of domestic servant if any in the household.

activity will be determined again on the basis of the relatively longer time spent.

1.16 Subsidiary economic

activity status: A person whose usual principal status is determined on the basis of the major time criterion may have pursued some other economic activity for 30 days or more during the reference period. The status in which such economic activity is pursued during the reference period is the subsidiary economic activity status of the person. In case of multiple subsidiary economic activities, subsidiary activity will be determined on the basis of relatively longer time spent criterion.

Saving Bank account in any bank:

If any of the household member has saving bank account in any bank (government, private, co-operative).

Average monthly earnings in Rs.

For every member who is employed (status code 11-51), average monthly earnings is to be collected and entered in terms of codes as given in the schedule. Average Monthly earnings are defined as the monetary returns from economic activities undertaken during the reference period by members having status code 11-

51. In case of wage/salaried, contract and casual workers, the average monthly earnings includes wages and salaries, dearness allowances, other guaranteed allowances, over time payment, bonus, family allowances, or any

other social security payments made by the employer. In case of self-employed persons, the earnings will be taken as the monthly amount received by them on an average during the reference period.

SAMPLING DESIGN & ESTIMATION PROCEDURE

Introduction

Labour Bureau has been entrusted with the task of conducting Annual Employment-Unemployment Surveys in the country. The objective of this annual survey is to regularly make available the basic inputs on labour force related parameters to facilitate policy formulation/review. The first such Annual Household Employment-Unemployment survey for the period 2009-10 was conducted during the year 2010. Till so far four such surveys have been conducted and thereon reports released. The present one is the Fifth Annual Employment-Unemployment Survey in the series.

2.1 In the current survey, a moving reference period is used to determine the usual status activity of the persons. The survey has been conducted in all the States/UTs by covering all the districts in the country. The field work of the present survey was launched in April, 2015 and completed in majority of the States/UTs by December, 2015. A

sample of about 1.57 lakh household schedules has been covered during the survey in 36 States/UTs.

2.2 Sample Design: A stratified multi-stage sample design has been adopted for the Fifth Annual Household Employment-Unemployment Survey. The first stage units (FSU) for rural sector are the 2011 census villages in all the States/UTs, except Kerala State, where panchayat wards are the FSUs. In case of urban sector, the latest available Urban Frame Survey (UFS) blocks for the period 2007-12 prepared by National Sample Survey Office are the First stage units.

2.3 Stratification: Each district of a State/UT has been divided into two strata: i) rural stratum comprising of all the rural areas of the district and ii) urban stratum comprising of all the urban areas of the district.

2.4 Sample Size: In all 36 States/UTs, a total sample of

13076 First Stage Units (FSUs) is allocated at All India level keeping in view the resource availability and other logistics. Broadly considering the population proportion, a sample of 7416 FSUs is allocated to rural sector in all the 36 States/UTs, while rest 5660 FSUs are allocated in the urban sector. While allocating the sample, additional weight age is given to the urban sector as compared to rural sector; so that the urban areas are not under represented in the survey on the basis of proportional allocation, with the condition that in major states the total sample size in urban sector does not exceed that of the rural sector.

2.5 Allocation of Sample to States/UTs: Distribution of total number of sample FSUs in rural sector among the States/UTs is done in proportion to their respective rural population as per 2011 census, subject to a minimum sample allocation to each State/UT. For urban sector, the sample FSUs are allocated among the 36 States/UTs in proportion to the UFS blocks for the period 2007-12. A minimum sample size in a State/UT is allocated at 24 FSUs with a

minimum of 12 each in rural and urban areas.

2.6 Allocation of State/UT level rural and Urban Stratum sample to districts: The State/UT level rural/ urban sample is further distributed among its districts in proportion to rural/ urban population/urban frame survey blocks. A minimum of 24 FSUs are allocated to each State/UT for rural and urban areas combined. Stratum level sample is adjusted to multiple of 4 FSUs with a minimum sample size of 4 FSUs in a stratum. In case of some North Eastern States and UTs a marginal increase in sample size is done due to their under representation in overall sample because of their lower population.

2.7 Selection of FSUs: For the rural stratum, the village lists based on 2011 census frame are taken in the same order and the required sample is drawn by using circular systematic sampling technique with probability proportional to size (size being the population of the village as per Census 2011). In case of urban stratum, the UFS blocks are arranged in ascending order based on the town variable. After

arranging UFS blocks, sample is drawn by circular systematic sampling. This arrangement is done to ensure that most of the towns are represented in the sample. In both, the rural and the urban strata, samples are drawn in the form of two independent sub-samples.

2.8 Criteria for hamlet group/sub block formation: Large FSUs having approximate present population of 1200 or more are divided into a suitable number (say, D) of 'hamlet-groups'(hg) in the rural sector and 'sub-blocks'(sb) in the urban sector as stated below.

APPROXIMATE PRESENT POPULATION OF THE SAMPLE VILLAGE/ URBAN BLOCK	NO. OF HG/SB TO BE FORMED (D)
LESS THAN 1200 (NO HAMLET-GROUP/SUB BLOCK)	1
1200 TO 1799	3
1800 TO 2399	4
2400 TO 2999	5
3000 TO 3599	6
.....AND SO ON	

2.9 For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except Dehradun plains, Nainital Plains, Haridwar and Udham Singh Nagar), Poonch, Rajouri,

Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu & Kashmir and Idukki district of Kerala, the number of hamlet groups are formed as follows:

APPROXIMATE PRESENT POPULATION OF THE SAMPLE VILLAGE/ BLOCK	NO. OF HGS/ SBS TO BE FORMED (D)
LESS THAN 600 (NO HAMLET-GROUPS/SUB BLOCKS)	1
600 TO 899	3
900 TO 1199	4
1200 TO 1499	5
.....AND SO ON	

2.10 Selection of hamlet groups/sub blocks:

In case of large village/UFS block wherever hamlet-groups/sub-blocks have been formed, two hamlet-groups/sub-blocks are selected. The procedure to select the hg/sb is as follows:

- i) The hg/sb with maximum percentage share of population will always be selected and termed as hg/sb 1.
- ii) Second hg/sb will be selected from the remaining hgs/sbs by simple random sampling and termed as hg/sb 2.

Listing and selection of the households will be done independently in the two selected hamlet-groups/sub-blocks. In case hamlet-groups/sub-blocks is formed in a sample FSU, it is ensured that the hamlet-groups/sub-blocks formed are clearly identifiable in terms of physical landmarks. The FSU without hg/sb formation will be treated as sample hg/sb number 1.

2.11 Listing of households: After determining the hamlet-groups/sub-blocks i.e. areas to be

considered for listing, all the households in that area will be listed (including those found to be temporarily locked after ascertaining the temporariness of locking of households through local people). The hamlet-group/sub-block with sample hg/sb number 1 will be listed first and that with sample hg/sb number 2 will be listed next.

2.12 Formation of Second Stage Strata and allocation of households:

For canvassing the schedules, all the households listed in selected FSU/ hamlet-groups/ sub-blocks are to be stratified into four second stage strata (SSS) as given below:

The second-stage-strata in the rural and urban stratum will be formed based on the number of persons in a household aged 15 years and above. The four second-stage-strata (SSS) in the rural and urban strata are formed in the following order:

2.13 Allocation of households:

The number of households to be surveyed (h) in each second stage stratum in the sample FSUs is as follows:

SECOND STAGE STRATA (SSS)	NO. OF MEMBERS IN THE HOUSEHOLD AGED 15 YEARS & ABOVE
SSS1	1
SSS2	2-3
SSS3	4-5
SSS4	6 & MORE

SSS	WITHOUT HG/SB FORMATION		WITH HG/SB FORMATION IN BOTH RURAL & URBAN STRATA	
	RURAL	URBAN	HG1/SB1	HG2/SB2
H1	1	1	1	1
H2	3	4	2	2
H3	4	4	2	2
H4	4	3	1	1
TOTAL	12	12	6	6

2.14 Selection of Households:

From each Second Stage Strata the sample households are selected by simple random sampling without replacement.

2.15 Shortfall of households to be compensated: Shortfall of households in the frame of any particular SSS will be compensated from the same SSS of the other hg/sb or from the other SSS of the same or other hg/sb where additional household(s) are available. The procedure is as follows:

Step 1: Allocate the required number of households to each SSS wherever possible and identify the SSS having shortfall.

Step 2: In case of hg/sb formation, compensate from the same SSS of the other hg/sb, if available. Otherwise, go to Step 3.

Step 3: Find the SSS where additional households are available following the priority order of SSS 1, SSS 2, SSS 3 & SSS 4 and compensate.

2.16 The table given below may be useful for deciding the SSS from

which the compensation is to be made.

SSS HAVING SHORTFALL	PRIORITY ORDER OF SSS FOR COMPENSATION
1	2, 3, 4
2	1, 3, 4
3	1, 2, 4
4	1, 2, 3

2.17 If there is hg/sb formation, for each SSS as per priority order, compensation may be made from the hg/sb where shortfall occurs, failing which from other hg/sb and so on.

2.18 For example, if shortfall is in SSS 3 of hg/sb 1, first try to compensate from SSS3 of hg/sb 2,

failing which try from SSS 1 of hg/sb 1, failing which try from SSS 1 of hg/sb 2. If the shortfall still remains then try from SSS 2 of hg/sb 1, failing which try from SSS 2 of hg/ sb 2. If the shortfall still remains then try from SSS 4 of hg/sb 1, failing which try from SSS 4 of hg/ sb 2.

Estimation Procedure

t = subscript for t-th stratum

m = subscript for sub-sample (m =1, 2)

i = subscript for i-th FSU (village/panchayat ward/ UFS block)

d = subscript for a hamlet-group/ sub-block (d = 1, 2)

j = subscript for j-th second stage stratum in an FSU/hg/sb (j = 1,2,3,4)

k = subscript for k-th sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/ sb's formed in the sample FSU

D* = 1 if D = 1

= D-1 for FSUs with D > 1

N = total number of FSUs in any urban stratum

Z = total size of a rural stratum

z = size of selected sample village

n = number of sample FSUs surveyed in a stratum

H = total number of households listed in a second-stage stratum of an FSU
/ hamlet-group or sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of an FSU /
hamlet-group or sub-block of sample FSU

x, y = observed value of characteristics x, y under estimation

$\hat{X}, \hat{Y}$ = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

y_{tmidjk} = observed value of the characteristic y for the k -th household in the
 j -th second stage stratum of the d -th hg/ sb ($d = 1, 2$) of the i -th FSU
belonging to the m -th sub-sample for the t -th stratum.

Formulae for Estimation of Aggregates for a stratum in a district (rural & urban)

Listing Schedule 'A'

Rural stratum: For estimating the number of households possessing a characteristic

$$\hat{Y} = \frac{Z}{n} \sum_{i=1}^n \frac{1}{z_i} \{y_{i1} + D_i^* y_{i2}\}$$

Where y_{i1}, y_{i2} are the total number of households possessing the characteristic y in hg's 1 & 2 of the i -th FSU respectively.

Urban Stratum: For estimating the number of households possessing a characteristic in the urban stratum of a district.

$$\hat{Y} = \frac{N}{n} \sum_{i=1}^n \{y_{i1} + D_i^* y_{i2}\}$$

Where y_{i1}, y_{i2} are the total number of households possessing the characteristic y in sub-blocks 1 & 2 of i -th FSU respectively.

Schedule 'B': (Employment – Unemployment Survey Schedule)

Estimation formula for a rural stratum in a district:

Rural:

$$\hat{Y} = \sum_{j=1}^4 \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left\{ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right\}$$

Estimation formula for an urban stratum in a District:

$$\hat{Y} = \sum_{j=1}^4 \frac{N}{n_j} \sum_{i=1}^{n_j} \left\{ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right\}$$

Overall Estimate for Aggregates:

Overall estimate for aggregates for a stratum ($\hat{Y}_t$) based on two sub-samples is obtained as:

$$\hat{Y}_t = \frac{1}{2} \sum_{m=1}^2 \widehat{Y}_{tm}$$

Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate $\hat{Y}$ at the State/ UT/ all-India level is obtained by summing the stratum estimates $\hat{Y}_t$ over all strata belonging to the State/ UT/ All-India.

Note: 1. Population and Percentage decadal change in population aged 15 years and above were calculated using Table C13 of Census 2001 and 2011.

2. For any category of persons of any State/UT/All-India, Projected population as on 1st March 2015 has been derived using the formula. $A = A_1 * \{1 + (R/100)\}^{(52/120)}$, where A_1 is the census population as on 1st March 2011, R is the percentage decadal change in population between 2001 and 2011 and A is the projected population as on 1st July 2015.

Table (A2): Census Population as on 1st March 2011, percentage decadal change in population of aged 15 years and above between census 2001 and 2011 and projected population as on 1st July 2015 for each State/UT and All-India.

Name of State/UT/All India	Rural			Urban

.....about the Labour Bureau

An apex organization for providing data base at the national level for policy formulation, evaluation and research, the Labour Bureau in the Union Ministry of Labour and Employment is the epicenter of all activities involving planning, collection and dissemination of data on various facets of Labour which forms a sound basis for decision making in the Government, industry and by various other user organizations/individuals. Labour Bureau is a store house of important economic indicators like the Consumer Price Index Numbers for industrial and agricultural workers, wage rates, industrial relations, socio-economic conditions in un-organized sector, evaluation and review of working of labour legislations in the country and the like. Labour Bureau has been providing an uninterrupted service to the national and international fora like ILO for the last fifty years. Today, it has assumed an important role in the labour matters and has acquired an un-disputed and indispensable status in the field of labour statistics. Equipped with the expertise of conducting surveys at the national/regional level in diverse fields and in providing in-depth analysis, the organization continues in its pursuit of excellence.
