FOREWORD

Employment-Unemployment Statistics is an important input for policy and planning purposes. After the advent of recent Global Economic Slowdown and its impact on employment in different countries, including India, the importance of Employment-Unemployment Statistics on regular & frequent intervals has increased manifold.

The present report is the fifth in the series of Annual Employment-Unemployment Surveys conducted by Labour Bureau. The first survey was conducted in 28 States/UTs by covering 300 districts in the country during the year 2010 for a fixed reference period of Financial Year 2009-10. The second, third and fourth surveys were more comprehensive in terms of coverage as well as parameters estimated. The survey was conducted in all the States/UTs by covering all the districts in the country.

The present Fifth Annual Employment-Unemployment Survey has been conducted during the period April, 2015 to December, 2015 in all the 36 States/UTs by covering all the districts in the country. A moving reference period of last twelve completed months from the date of survey is used to derive various estimates of labour force.

The report deals with the Employment-Unemployment Scenario among various Social Groups. A detailed analysis of the labour force related parameters and its derivatives for various groups have been attempted in the report.

I am sure the report will be helpful for formulating policies and plans for the benefits of various social groups.

CHAPTER-I

MAIN FINDINGS OF THE SURVEY

- The present Report is based on the Fifth Annual Employment-Unemployment Survey (2015-16) conducted by Labour Bureau.
- This volume deals with the "Employment-Unemployment Survey among different Social Groups (2015-2016)" in the country.
- The survey was conducted in all the States/UTs and covers all the districts.
- The field work of the survey was executed from April, 2015 to December, 2015.
- A total sample of 1,56,563 sample households has been covered with a break up of 88,783 households in rural sector and 67,780 households in urban sector.
- A total 7,81,793 members were covered in this current survey. Out of which 4,48,254 members were from rural households and 3,33,539 members were from the urban households.
- The households covered under this survey has been classified into four social groups, viz., Scheduled Castes (SC), Scheduled Tribes (ST), Other Backward Classes (OBC) and Others category.
- The labour force estimates for various social groups has been derived based on Usual Principal Status (UPS) & Usual Principal and Subsidiary Status (UPSS) approaches for the persons aged 15 years and above only.
- The survey results show that at the All India level 40.4 per cent households belonged to the OBC category followed by 29.9 per cent under others category, 20.3 per cent under SC category and 9.4 per cent belonged to the ST category.

- The proportion of households with at least one employed person was the highest among all social groups at all India level.
- In rural areas, 9.1 per cent of the ST households were having 4 and above employed members.
- The Labour Force Participation Rate for different social groups based on UPS and UPSS approach, is as under:

Approach	All India (in per cent)			
	SC	ST	OBC	Others
UPS	53.3	56.7	50.5	46.3
UPSS	55.6	61.5	52.5	47.4

- Female LFPR was significantly lower in all social groups as compared to LFPR for male category under the Usual Principal Status approach. At the All India level, the highest female LFPR was estimated to be 33.9 per cent under ST category as compared to 78.0 per cent under the male category.
- The Worker Population Ratio (WPR) for different social groups based on UPS and UPSS approach is as under:

Approach	All India (in per cent)			
	SC	ST	OBC	Others
UPS	50.6	54.2	47.8	44.0
UPSS	53.7	60.0	50.4	45.5

- The Worker Population Ratio (WPR) in rural areas was higher as compared to the urban areas. At the All India level, the highest WPR (56.0 per cent) was found to be registered in the rural areas as compared to 43.3 per cent in urban areas for ST category, based on UPS approach.
- Under Others category, at the All India level, the female WPR was estimated at 16.3 per cent under the UPS approach as compared to 69.6 per cent for male category.

- The state of Meghalaya registered the highest LFPR (79.2 per cent) and highest WPR (77.8 per cent) among Scheduled Caste category. On the other hand, the state of Goa witnessed the lowest 29.8 per cent WPR for Scheduled Caste category.
- The state of Chhattisgarh had the highest WPR for the Scheduled Tribe category i.e. 75.2 per cent followed by OBC category (66.3 per cent). In the state of Jammu & Kashmir, OBC category has recorded the lowest WPR i.e. 36.8 per cent.
- The State of Punjab had witnessed the lowest i.e. 40.8 per cent LFPR for OBC category work force.
- The UT of Puducherry has registered the lowest LFPR (25.0 per cent) for Scheduled Tribe Population. Similarly WPR has recorded the lowest (25 per cent) for the same category.
- The Unemployment Rate (UR) for different social groups based on UPS and UPSS approach is given below:

Approach	All India (in per cent)			
	SC	ST	OBC	Others
UPS	5.0	4.4	5.2	5.0
UPSS	3.4	2.4	3.9	4.0

- At the All India level, based on Usual Principal Status approach, the unemployment rate was estimated at 5.2 per cent in Other Backward category followed by 5.0 per cent in SC & Others category, and 4.4 per cent in ST category respectively.
- For both rural and urban areas, Unemployment Rate for female was higher as compared to the male among all the social groups based on the UPS approach.
- In the State of Goa 34.6 per cent of Scheduled Caste work force remained unemployed which was the highest Unemployment Rate among the State/UTs. The state of Gujarat had the lowest i.e. 0.6 per cent Unemployment Rate for Others category.

- Scheduled Tribe Population had registered an Unemployment Rate of 23.1 per cent in the Union Territory of Andaman & Nicobar Islands and the lowest in the state of Telangana i.e. 0.4 per cent based on UPS approach.
- The state of Tripura had revealed the highest unemployment rate for the social group of OBC (24.3 per cent) and Others category (20.9 per cent) based on UPS approach.
- In this survey, workers who were available for the entire 12 months during the reference period have been categorised in four categories according to the period for which they get work based on Usual Principal & Subsidiary Status Approach.
- Distribution of workers available for 12 months under different social groups based on UPSS approach is indicated here under:

All India (in per cent)				
Particulars	worked for 12 months	worked for 6-11 months	worked for 1-5 months	did not get any work
Scheduled Caste	52.2	42.7	1.3	3.8
Scheduled Tribe	46.0	49.4	1.9	2.7
Other Backward Class	61.2	33.5	1.1	4.2
Others	68.9	25.3	0.9	4.9

- Based on the Usual Principal & Subsidiary Status Approach, at the All India level, the highest 4.9 per cent of the workers available for 12 months under others category did not get any work during the reference period.

CHAPTER-II

EMPLOYMENT-UNEMPLOYMENT SCENARIO AMONG DIFFERENT SOCIAL GROUPS

INTRODUCTION

2.1 The Annual Employment-Unemployment Surveys conducted by Labour Bureau throws information of labour force and its derivatives for various social groups namely categorised as Scheduled Caste (SC), Scheduled Tribe (ST), Other Backward Class (OBC) and Others category. This report primarily deals with the Employment - Unemployment Scenario during 2014-15 as a part of Fifth Annual Employment - Unemployment Survey among persons belonging to these four social groups, viz., Scheduled Caste (SC), Scheduled Tribe (ST),

Other Backward Class (OBC) and Others category. The State-wise distribution of households among different social groups for States/UT's is presented in Tables 1 and 2 (Annexure IV).

DISTRIBUTION OF HOUSEHOLDS BY SOCIAL GROUPS

2.2 The survey results show that at overall level, about 40.4 per cent of the households belong to Other Backward Class category followed by 30 per cent under the Others category, 20.3 per cent under the Scheduled Caste category and the rest 9.4 per cent households under the Scheduled Tribe category (Table 2.1).

Table 2.1: Distribution of households (hhs) by social group

Particulars	(in %) All India			
	SC	ST	OBC	Others
Rural	23.0	11.4	40.4	25.1
Urban	13.7	4.6	40.2	41.5
Rural + Urban	20.3	9.4	40.4	29.9

2.3 In the rural sector, a trend, similar to the one observed at the All India level (rural + urban) was visible. In rural areas, the proportion of households under Other Backward Classes category was the highest with 40.4 per

cent followed by 25.1 per cent under the Others category, 23 per cent under the Scheduled Caste category and the rest 11.4 per cent under the Scheduled Tribe group.

Figure 1: Distribution of households by social group

2.4 In case of urban sector, the Others category households had maximum proportion i.e. about 41.5 per cent followed by 40.2 per cent households under the Other Backward Classes category, 13.7 per cent households under the Scheduled Caste category and 4.6 per cent households come under the Scheduled Tribe category at the All India level. It can be inferred from the results that among the social groups OBC and Others were more urbanized as

compared to Scheduled Caste and Scheduled Tribe category in India.

HOUSEHOLDS BY NUMBER OF EMPLOYED MEMBERS

2.5 The households studied under the survey have been classified based on the number of employed members aged 15 years and above in the household. Accordingly, all the households under the study are put in five categories as follows:

1. None employed member household;
2. 1 employed member household;
3. 2 employed members' household;
4. 3 employed members' household;
5. 4 & above employed members' household.

2.6 Table 2.2 presents the distribution of households by number of employed members among different social groups. At the All India level, about 46 per

cent households under the Scheduled Caste category were having 1 employed member followed by about 32 per cent having 2 employed members'. It was also revealed that out of total 20.3 per cent of the households with Scheduled Caste category at National level, only 4.4 per cent of the households were recorded with not a single employed person and 5.7 per cent of the households with same category were recorded with 4 and above employed persons.

Table 2.2: Distribution of households (hhs) by number of employed persons based on social groups for persons aged 15 years & above (in %) All India

Particulars	None	1 person	2 persons	3 persons	4 & above persons
Scheduled Caste					
Rural	4.2	43.7	33.1	12.7	6.3
Urban	5.4	56.9	26.6	7.8	3.3
Rural + Urban	4.4	46.3	31.9	11.7	5.7
Scheduled Tribe					
Rural	3.2	37.3	35.9	14.5	9.1
Urban	6.0	58.7	25.5	7.5	2.3
Rural + Urban	3.6	40.3	34.4	13.5	8.1
Other Backward Class					
Rural	4.0	44.6	32.8	12.1	6.5
Urban	7.7	58.8	24.9	6.6	2.0
Rural + Urban	5.1	48.7	30.5	10.5	5.2
Others					
Rural	4.3	47.0	31.6	11.4	5.6
Urban	8.2	59.1	24.5	6.3	1.9
Rural + Urban	5.9	51.9	28.7	9.4	4.1

2.7 At the All India level 9.4 per cent of the households were

recorded under Scheduled Tribe category out of which, 3.6 per cent

of the households had not even a single employed person and on the other hand about 40 per cent of the households were found with 1 employed person followed by 34 per cent households with 2 employed persons and about 8 per cent of the households had 4 and above employed persons.

2.8 The results described in Table 2.2 also reveal that out of 40.4 per cent of the households were reported under Other Backward Classes category, 48.7 per cent and 30.5 per cent of the households had only 1 employed person and 2 employed persons respectively followed by 3 employed persons (10.5 per cent).

Among the households with OBC category, about 5 per cent of the households were recorded with none employed members and 5.2 per cent are employed under class category 4 & above employed members at national level.

2.9 At the All India level about 30 per cent of the households were recorded with others category. Out of which about 52 per cent of the households were recorded with 1 employed member followed by about 28.7 per cent with 2 employed members. Among the households with Others category, about 6 per cent of the households were recorded with none employed members.

Figure 2: Distribution of households (hhs) by number of employed members based on social groups for persons aged 15 years & above at overall level (in %).

2.10 While analyzing sector wise results of the survey, it was found that in rural areas, proportion of households having not even one employed member was lower than urban areas among all the four social groups. On the other hand proportion of the households having 4 and above employed members' was high in rural areas as compared to urban sector for all the social groups. Under Scheduled Tribe category, the highest i.e. about 9 per cent of the households had 4 and above persons employed in rural areas. In urban areas, more than 50 per cent of the households were having 1 employed member among all the four social groups. Under the Others category, about 59 per cent of households were having 1 employed member whereas the proportion of households having 4 and above employed members was 1.9 per cent for the same category, which was the lowest as compared to other groups.

2.11 Inter-state/UT analysis has shown that A & N Islands with 1.3 per cent of households under Scheduled Caste category had the highest percentage of households

with 4 and above employed members i.e. 25.8 per cent. Among North Eastern States Meghalaya and Mizoram have the highest percentage of households with 4 and above employed members of Scheduled Caste households. As obvious, Punjab has recorded with the highest percentage of households (37.5 per cent) belonging to Scheduled Caste category, out of these households, 57.9 per cent of the households had only one employed person followed by 22.6 per cent households having 2 employed persons.

2.12 It was also revealed that Mizoram with the highest percentage of households (89.3 per cent) under Scheduled Tribe category, had only 1.4 per cent of the households with none employed member and about 12 per cent of the households were having 4 and above employed members (Table 2.6, Annexure IV).

2.13 The union territory of Puducherry was recorded with the highest percentage of Other Backward Classes category i.e. 75.6 per cent. Out of which, about 10 per cent of the households had

no employed members. About 52 per cent of the households were recorded with 1 employed member. It was also recorded that only 1 per cent of the households had 4 and above employed members. (Table 2.9, Annexure IV).

2.14 As UT Chandigarh was recorded with the highest percentage (85.6 per cent) of households under others category. Out of which about 14 per cent of the households had no employed members and only 2.2 per cent of the households were recorded with 4 and above employed members. (Table 2.12, Annexure IV)

LABOUR PARTICIPATION RATE (LFPR)

2.15 The LFPR is a measure of the proportion of a country's working age population that engages actively in the labour market, either by working or looking for work. It provides an indication of the size of the supply of labour available to engage in the production of goods and services. The breakdown of the labour force by gender, age and social group provides a composition of the

economically active population with in a country. This may be defined as the number of persons who are either working or seeking/available for work during the reference period. The results in the report are compiled for different social groups based on Usual Principal Status (ps) and Usual Principal & Subsidiary Status approach (ps+ss).

2.16 At National level, the Labour Force Participation Rate for Scheduled Tribe category was the highest about 56.7 per cent followed by 53.3 per cent under the Scheduled Caste category, 50.5 per cent for Other Backward Classes category and 46.3 per cent for others category under the Usual Principal Status approach. This pattern may be explained in terms of opportunities that different sections of the population are able to access, particularly in the context of livelihoods. How much effort an individual may have to put in to sustain consumption is a pertinent question. The scheduled tribe population, more so in rural areas, strives hard to access sources of livelihood and meet their

consumption requirements, which is reflected in a higher work participation rate. In urban areas, possibly because of the practice of reservation in the formal sector and also because of the availability of manual jobs in the informal sector, the struggle is relatively less. Again, the decreasing pattern observed among different social categories, as we move from scheduled caste population to general category, can be explained as variations in human capital and quality of jobs. In the social categories are embedded a huge spectrum of attributes, which results in economic disadvantages/advantage¹.

2.17 At sectoral level according to UPS approach, in the case of rural sector, LFPR for Scheduled Tribe category was the highest i.e. about 58.5 per cent and in urban sector Scheduled Caste category had the highest (46.7 per cent) LFPR.

2.18 For gender wise analysis, the present survey has estimated the various Labour force indicators for the third gender namely

‘transgender’ also along with male and female. The gender wise estimates as evident from the Table 2.3 which shows that female labour force participation rate was significantly low among all the four social groups as compared to LFPR of male as well as transgenders aged 15 years & above in both rural and urban as well as overall level. Among all the four social groups, female LFPR was recorded the highest 34 per cent for Scheduled Tribe category and for male category was 78 per cent and for transgender the LFPR recorded was 73.4 per cent respectively for the same category at the All India level (rural+urban).

2.19 Among the State/UTs, It is observed that the state of Meghalaya which is predominately inhabited by Scheduled Tribe households has revealed 79.2 per cent for LFPR for Schedule caste category followed by Union Territory of A & N Islands with 72.7 per cent of LFPR and Andhra Pradesh with 66.9 per cent LFPR for Schedule cast category persons. On the other hand the Union Territory of Lakshadweep and the State of Jammu &

¹Mitra, A. and Verick, S. (2013), “Youth employment and unemployment: An Indian perspective” ILO Asia-Pacific Working Paper Series

Kashmir have the lowest i.e., 37 per cent and 37.6 per cent LFPR respectively for Scheduled Caste

category persons based on Usual Principal Status Approach (Table 3, Annexure IV).

Table 2.3: Labour Force Participation Rate for persons aged 15 years & above according to Usual Principal Status Approach (ps) All India (in %)

Social Groups	Rural				Urban				Rural + Urban			
	M	F	T	P	M	F	T	P	M	F	T	P
SC	78.7	29.2	52.5	54.9	71.5	20.8	53.3	46.7	77.3	27.5	52.8	53.3
ST	79.2	36.3	79.5	58.5	70.8	19.3	42.0	45.6	78.0	33.9	73.4	56.7

OTHERS	75.3	21.1	32.6	49.3	67.6	13.6	40.4	41.7	72.3	18.2	35.6	46.3

M-Male; F-Female; T-Transgender; P-Person

2.20 The state of Andhra Pradesh has shown maximum number of Scheduled Tribe category person i.e. 77.4 per cent participating in the Labour market followed by Chhattisgarh with 75.7 per cent LFPR for Scheduled Tribe category Persons. Union Territory of Puducherry has the lowest 25 per cent LFPR of Scheduled Tribe Category Persons (Table 3.1, 3.5 & 3.36 Annexure IV).

2.21 Although the state of Nagaland is pre-dominantly inhabited by Scheduled Tribe category households, yet Other Backward Class (OBC) category persons has shown the highest i.e. 69 per cent LFPR in this state as compared to all other states/UTs

followed by 67.7 per cent in Chhattisgarh. The State of Punjab has revealed lowest i.e. 40.8 per cent LFPR for OBC category work force.

2.22 For the others category, the Union Territory of A&N Island has the highest 61.5 per cent LFPR followed by Sikkim 55.5 per cent of LFPR recorded during the survey. Union Territory of Chandigarh with 37.6 per cent and State of Jammu & Kashmir with 38 per cent LFPR has shown the lowest participation in Labour Market by Others category labour force.

2.23 Gender wise estimates based on UPSS approach shows that Female LFPR was significantly low as compared to LFPR of male as

well as transgenders. LFPR recorded was the highest among Scheduled Tribe category (Male, Female and Transgenders) at the All India Level (Rural+Urban). LFPR

of Male, Female and Transgenders was considerably high for all social groups in rural areas as compare to urban areas.

Table 2.4: Labour Force Participation Rate for persons aged 15 years & above according to Usual Principal & Subsidiary Status Approach **All India (in %)**

WORKER POPULATION RATIO (WPR)

2.24 Working Population Ratio is the Persons employed per thousand persons. Based on Usual Principal Status and Usual

Principal & Subsidiary Approaches the worker population ratio for different social groups is presented in Table 2.5 and Table 2.6 respectively.

Table 2.5: Worker Population Rate for persons aged 15 years & above accord according to Usual Principal Status Approach **All India (in %)**

Social Groups	Rural				Urban				Rural + Urban			
	M	F	T	P	M	F	T	P	M	F	T	P
SC	75.4	27.1	52.5	52.2	68.7	18.5	53.3	44.2	74.1	25.4	52.8	50.6
ST	76.2	34.2	75.2	56.0	68.2	17.2	42	43.3	75.1	31.9	69.7	54.2
OBC	74.0	24.1	52.4	50.1	67.4	15.1	30.7	41.9	72.2	21.5	45.7	47.8
Others	72.3	19.1	31.5	46.8	65.5	11.9	36.8	39.8	69.6	16.3	33.5	44.0

M- Male; F-Female; T-Transgenders; P-Person

2.25 At the All India level, WPR was the highest under Scheduled Tribe category with about 54.2 per cent followed by 50.6 per cent under the Scheduled Caste category, 47.8 per cent for Other Backward Classes category and 44.0 per cent for Others category based on Usual Principal Status Approach.

2.26 At the sectoral level, rural sector shows the same trend and in the urban sector, WPR was the highest among Scheduled Caste (44.2 per cent) category followed by Scheduled Tribe (43.3 per cent), Other Backward Classes category (42 per cent) and for Others category (39.8 per cent) respectively. It was observed that Scheduled Tribes category was leading with the highest WPR, among all the four social groups at both National and sectoral level.

2.27 The proportion of female WPR was significantly less as compared to the male WPR across all the four social groups based on Usual Principal Status Approach. Highest female WPR of (32 per cent) was observed under the Scheduled Tribe category whereas male WPR for the same social group was about 75 per cent which was also the highest among all the social groups.

2.28 The state-wise analysis of WPR revealed that the state of Meghalaya has the highest WPR i.e. 77.8 per cent of Scheduled Caste category persons followed by Andhra Pradesh with 65.5 per cent WPR for Scheduled Caste category persons. It is important to state that the state of Meghalaya has also the highest LFPR of 79.2 per cent for the Scheduled Caste category persons. On the other hand, the

state of Goa has the lowest 29.8 per cent WPR for Scheduled Caste category persons among State/UTs (Table 3, Annexure IV).

2.29 The state of Chhattisgarh has the highest WPR of 75.2 per cent of Scheduled Tribe category followed by the state of Andhra Pradesh which has 74.1 per cent WPR of Scheduled Tribe population of the state. However, UT of Puducherry has the lowest WPR i.e. 25.0 per cent of Scheduled Tribe Population. Puducherry as mentioned earlier has also the lowest i.e. 25.0 per cent LFPR of Scheduled Tribe population (Table 3.5, 3.1 & 3.36 Annexure IV).

2.30 For the social group of OBC population, the state of Chhattisgarh has the highest WPR

recorded i.e. 66.3 per cent followed by Mizoram 62.9 per cent. OBC population has the lowest WPR (36.8 per cent) in the state of Jammu & Kashmir.

2.31 The population belong the Others Category has the highest WPR in the state of Nagaland i.e. 60.6 per cent. The Union Territory of Lakshadweep has the lowest i.e. 25.5 per cent WPR of others category population.

2.32 Table 2.6 shows that similar types of trends as seen under the Usual Principal Status Approach are observed in the Usual Principal & Subsidiary Status Approach also. Scheduled Tribe Category constitutes the highest proportion of all the parameters viz. national level, social group wise, sector wise and gender wise.

Table 2.6: Worker Participation Rate for persons aged 15 years & above according to Usual Principal & Subsidiary Status Approach All India (in %).

UNEMPLOYMENT RATE

2.33 The unemployment rate signifies the proportion of persons who are available for work but didn't get work during the reference period. It is a measure of the prevalence of unemployment and is calculated as a percentage by dividing the

number of unemployed persons by all persons currently in the labour force for the same age group. Based on Usual Principal Status Approach, the unemployment rate for different social groups is given in Table 2.7.

Table 2.7: Unemployment Rate for persons aged 15 years & above according to Usual Principal Status Approach

Social Group	Rural				Urban				Rural + Urban			
	M	F	T	P	M	F	T	P	M	F	T	P
SC	4.1	7.1	_	4.9	3.9	11.2	_	5.5	4.1	7.7	_	5.0
ST	3.8	5.7	5.4	4.4	3.6	11.1	_	5.1	3.8	6.1	4.9	4.4
OBC	4.4	8.2	0.3	5.3	3.3	11.9	18.7	5.0	4.1	9.0	4.7	5.2
Others	4.1	9.5	3.4	5.2	3.0	12.8	8.9	4.6	3.7	10.5	5.8	5.0

M- Male; F-Female; T-Transgenders; P-Person

2.34 Based on the Usual Principal Status approach, the unemployment rate at the All India level was 5.2 per cent for Other Backward Classes category which was the highest among all four social groups. In case of Scheduled Caste and Others category, the unemployment rate was estimated to be 5.0 per cent respectively. The lowest unemployment rate was recorded (4.4 per cent) under Scheduled Tribe category.

2.35 In case of rural areas, again Scheduled Tribe category had the lowest unemployment rate i.e. 4.4 per cent whereas it was the highest under the Other Backward Classes category (5.3 per cent) followed by Others (5.2 per cent) in rural areas. Whereas in urban areas, unemployment rate was the lowest under Others category (4.6 per cent) and the highest among Scheduled Caste category i.e. 5.5 per cent.

2.36 The gender wise unemployment rate at the All India level under the Usual Principal Status Approach, it might be seen that there was wide variation among the male and female unemployment rate. In case of females, maximum unemployment

rate was estimated to be 10.5 per cent for Others category whereas for males the same was 3.8 per cent under the scheduled tribe group. In urban sector, the unemployment rate among females was the highest with 12.8 per cent for Others category as compared to other groups. The transgender in the OBC has the highest 18.7 per cent unemployment rate in urban sector as compared to the remaining social groups.

2.37 While analyzing Unemployment Rate at UPS approach across states/UTs it is observed that the state of Kerala, Sikkim, Tripura and Union Territory of A & N Island has Double digit Unemployment Rate for all social groups during the reference period.

2.38 Further, it is found that 34.6 per cent of Scheduled Cast work force remained unemployed in the State of Goa which is the highest Unemployment Rate among the State/UTs. The state of Goa has also the lowest WPR i.e. 29.8 per cent of Scheduled Caste persons among the State/UTs. The state of Gujarat has the lowest i.e. 1 per

cent Unemployment Rate of Scheduled caste population.

2.39 Scheduled Tribe Population has the highest Unemployment Rate i.e. 23.1 per cent in Union Territory of Andaman & Nicobar Islands followed by Kerala 22.0 per cent. However, the state of Telangana has the lowest i.e. 0.4 Per cent Unemployment Rate for Scheduled Tribe Population of the state.

2.40 The social group of OBC category has the maximum Unemployment Rate i.e. 24.3 per cent in the state of Tripura followed by Sikkim with 20.6 per cent and Jammu & Kashmir with 20.2 per cent unemployment rate based on usual principal status approach. Union Territory of Daman & Diu has shown only 0.1 per cent

unemployment rate for OBC category work force.

2.41 For Others category labour force, the state of Tripura has revealed the highest 20.9 per cent unemployment rate during the reference period followed by Sikkim 13.7 per cent unemployment rate of others category. Union Territory of Daman & Diu has the lowest 0 per cent UR for other category population.

2.42 Table 2.8 shows that at the National level, based on Usual Principal & Subsidiary Status Approach, unemployment rate in case of Others category was 4.0 per cent followed by 3.9 per cent under Other Backward Class category, 3.4 per cent under Scheduled Caste category and the Scheduled Tribe category was having the lowest unemployment rate of 2.4 per cent.

Table 2.8: Unemployment Rate for persons aged 15 years & above according to Usual Principal & Subsidiary Status Approach **All India (in %)**

Social Group	Rural				Urban				Rural + Urban			
	M	F	T	P	M	F	T	P	M	F	T	P
SC	2.8	4.0	—	3.1	3.5	9.7	—	4.9	2.9	4.8	—	3.4
ST	2.1	2.4	—	2.2	3.0	9.5	—	4.4	2.2	2.9	—	2.4
OBC	3.2	5.2	0.3	3.7	3.0	10.7	18.7	4.5	3.1	6.2	4.6	3.9
Others	3.1	6.6	2.5	3.9	2.8	12.0	8.9	4.2	3.0	8.0	5.2	4.0

M- Male; F-Female; T-Transgenders; P-Person

2.43 Similar trend was observed in case of rural areas. In case of urban areas the highest unemployment rate was recorded i.e. 4.9 per cent for Scheduled Caste category and for others category the lowest unemployment rate i.e. 4.2 per cent.

2.44 Female Unemployment Rate was higher than male Unemployment Rate under all the four social groups. In case of Other Backward Classes and Others category, female unemployment rate was more than double (6.2 per cent and 8 per cent) of the same under male category.

Figure 5: Comparative Unemployment Rate for persons aged 15 years & above according to UPS and UPSS Approach (in %)

UNDEREMPLOYMENT

2.45 In the fifth Annual Employment-Unemployment Survey an attempt has been made to estimate underemployment. Based on the Usual Principal

Status Approach, major time criterion is used to determine whether a person is employed or unemployed. Underemployment is a situation where persons are

available for work and get work also but partially. In the report, tables are generated for those persons who were available for the entire 12 months during the reference period based on Usual Principal & Subsidiary Status Approach. The persons who were

available for work for 12 months during the reference period are categorized as:

1. Worked for 12 months;
2. Worked for 6-11 months;
3. Worked for 1-5 months;
4. Did not get work.

Table 2.9: Distribution of workers aged 15 years & above available for 12 months but actually worked according to Usual Principal & Subsidiary Status Approach (All India in %)

Particulars	Rural	Urban	Rural + Urban
Scheduled Caste			
worked for 12 months	46.5	76.9	52.2
worked for 6-11 months	48.5	17.7	42.7
worked 1 to 5 months	1.5	0.5	1.3
did not get any work	3.6	4.8	3.8
Scheduled Tribe			
worked for 12 months	41.6	77.0	46.0
worked for 6-11 months	53.8	18.1	49.4
worked 1 to 5 months	2.0	0.7	1.9
did not get any work	2.5	4.3	2.7
Other Backward Class			
worked for 12 months	54.3	80.5	61.2
worked for 6-11 months	40.3	14.7	33.5
worked 1 to 5 months	1.3	0.4	1.1
did not get any work	4.1	4.4	4.2
Others			
worked for 12 months	61.2	86.2	68.9
worked for 6-11 months	33.6	9.5	25.3
worked 1 to 5 months	1.0	0.3	0.9
did not get any work	4.1	4.0	4.9

Figure 6: Distribution of workers available for 12 months at overall level and actually worked (in %)

2.46 Table 2.9 shows that at overall level, Others category constituted the highest (about 69 per cent) of persons who worked for 12 months during the reference period followed by 61.2 per cent under the Other Backward Class category, 52 per cent under the Scheduled Caste and 46 per cent under the Scheduled Tribe category.

2.47 In rural areas, 4.1 per cent of persons who were available for 12 months under the Others and OBC category did not get any work followed by 3.6 per cent under the Scheduled Caste Category and 2.5 per cent under the Scheduled Tribe category.

2.48 In urban areas, the proportion of persons who worked for 12 months was higher as compared to the rural areas. Under Others category, 86.2 per cent persons worked for 12 months as against 61.2 per cent in rural areas.

2.49 It was revealed that among UT's A & N Islands and Lakshadweep were recorded with 100 per cent of Scheduled Caste workers who worked for 12 months. On the other hand 35.5 per cent of SC workers from Goa did not get any work but found available for work according to UPSS approach (Table 5, Annexure IV).

2.50 Puducherry was recorded with 100 per cent of Scheduled Tribe workers who worked for 12 months followed by Daman & Diu (97.3 per cent). On the other hand 27.2 per cent of workers of same category did not get work in A & N Islands followed by Kerala (17.6 per cent) (Table 5.12, Annexure IV).

2.51 Chandigarh was recorded with 99.5 per cent of OBC workers who worked for 12 months followed by Dadra & Nagar Haveli (93.6 per cent). Nagaland had

registered about 26.4 per cent of OBC workers who did not get any work followed by J & K (20.3 per cent) (Table 5.24, Annexure IV).

2.52 Lakshadweep has recorded the highest percentage of others category (97.5 per cent) who worked for 12 months followed by Chandigarh (96.9 per cent). Tripura had registered the highest percentage of others (18.6 per cent) who did not get any work followed by A & N Islands (16.9 per cent) (Table 5.36, Annexure IV).

CONCEPTS AND DEFINITIONS

Important concepts and definitions used in the survey and relevant to this report are explained as below:

1.1 House: Every structure, tent or other place of shelter, etc. which is used primarily for residential use is considered as a house for the present survey.

1.2 Household: A group of persons normally living together and taking food from a common kitchen constitutes a household. It will include temporary stay-aways (those whose total period of absence from the household is expected to be less than 6 months) but exclude temporary visitors and guests (expected total period of stay less than 6 months). The members of a household may or may not be related by blood or marriage to one another. The following examples may be useful while determining the group of persons to be considered as households:

- (a) In case a hostel is listed, it will constitute a single household.
- (b) Inmates of hotel, lodging and boarding house etc. will also constitute a single household.
- (c) In deciding the composition of a household, more emphasis is to be placed on 'normally living together' than on ordinarily taking food from a common kitchen. In case the place of residence of a person is different from the place of boarding, he or she will be treated as a member of the household in which he or she resides.
- (d) A resident employee, or domestic servant or a paying guest will be considered as a member of the household in which he or she resides even though he or she is not a member of the same family if the period of stay is six month or above.
- (e) In case a member of a family (say a son or a daughter of the head of family) stays elsewhere like in hostel for studies or for any other reason for major part of the year, he/she will not be considered as a member of his/her parents household.

1.3 Household size: The number of members normally residing in a household is its size.

1.4 Economic activity: The entire spectrum of human activity falls into two categories: i) economic activity and ii) non-economic activity. Any activity that results in production of goods and services which adds value to the national product is considered as an economic activity. Further the economic activities have two parts namely i) market activities and ii) non-market activities. Market activities are those that involve remuneration to those who perform it, i.e., activity performed for pay or profit. Such activities include production of all goods and services for market including those of government services, etc. On the other hand non-market activities are those involving the production of primary commodities for own consumption and own account production of fixed assets. The term 'economic activity' under the fifth Annual Employment and Unemployment survey includes:

- i. All the market activities described above, i.e., the activities performed for pay or profit which result in production of goods and services for exchange,

- ii. Of the non-market activities,
 - a) All the activities relating to the primary sector which result in production (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.) of primary goods for own consumption.
 - b) The activities relating to the own-account production of fixed assets. Own account production of fixed assets include construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own account construction in the capacity of either a labour or a supervisor.

1.5 Activity status: It is the activity in which a person is engaged during the reference period, which in turn decides the person's participation in economic and /or non-economic activities. According to this, a person will be in one or a combination of the following three statuses during a reference period:

- i. Working or engaged in economic

- activity (work);
- ii. Not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work' in case the 'work' is available and
- iii. Neither engaged in any economic activity (work) nor available for 'work'.

1.6 Activity statuses mentioned against sl. no. (i) & (ii) above, are associated with 'being in labour force' and the last sl.no. (iii) is associated with 'not being in the labour force'. Being in labour force is further categorized into two parts (i) employed and unemployed.

1.7 The three broad activity statuses according to 5th EUS have been further subdivided into the following categories as listed below:

- i. working or being engaged in economic activity (employed):
 - a) worked as an own-account worker (self-employed);
 - b) employer (self-employed);
 - c) worked in household enterprise as 'helper' (unpaid family worker);
 - d) worked as regular salaried/wage employee other than contract worker;
 - e) worked as contract worker;

- f) worked as casual wage labour in public works;
- g) worked as casual wage labour in other types of works;
- ii. not working but seeking or available for work (unemployed);
- iii. neither working nor available for work (not in labour force)
 - i) attended educational institution;
 - ii) attended domestic duties;
 - iii) recipients of rent, pension, remittance, etc;
 - iv) not able to work due to disability;
 - v) Others (prostitutes, beggars, etc.);

1.8 The various concepts like, 'workers', 'unemployed', labour force, out of labour force are as explained below:

I. Workers (or employed): Persons who are engaged in any economic activity during the reference period or who, despite their attachment to their economic activity, have temporarily abstained from work, for reasons of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work constitute workers. Unpaid helpers

who assist in the operation of an economic activity in the household, farm or non-farm activities are also considered as workers.

II. Seeking or available for work

(or unemployed): Persons, who owing to lack of work, had not worked but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing condition of work and remuneration are considered as those who are 'seeking or available for work' (or unemployed).

III. Labour force: Persons who are either 'working' (employed) or 'seeking or available for work' (unemployed) or both during a major part of the reference period, constitute the labour force.

IV. Out of labour force: Persons who are neither 'working' and at the same time nor 'seeking or available for work' for various reasons during the major part of the reference period are considered to be 'out of the labour force'. The persons under this category includes students, persons engaged in domestic duties,

rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young or too old persons, beggars, prostitutes, etc.

1.9 It may be noted that workers have been further categorized as self-employed, regular salaried/wage employee and casual wage labour. The details of these categories are defined in the following paragraphs.

I. Self-employed: Persons who operate their own farm or non-farm enterprises or are engaged independently in a profession or trade on own-account or with one or a few partners are considered as self-employed. The essential feature of the self-employed is that they have autonomy (i.e., regarding how, where and when to produce) and economic independence (i.e. regarding market, scale of operation and money) for carrying out operation. The fee or remuneration received by them consists of two parts - the share of their labour and profit of the enterprise. In other words, their remuneration is determined wholly or mainly by sales or profits of the goods or services which are produced.

The self-employed persons may again be categorized into the following groups:

- i) **Own-account workers:** The self-employed persons, who operate their enterprises on their own account or with one or a few partners and who during the reference period by and large, run their enterprises without hiring any labour are called as own account workers. They may, however, have unpaid helpers to assist them in the activity of the enterprise.
- ii) **Employers:** The self-employed persons who work on their own account or with one or a few partners and by and large run their enterprises by hiring labour are considered as the employers.
- iii) **Helpers in household enterprise:** The helpers are a category of self-employed persons, mostly family members, who keep themselves engaged in their household enterprises, working full or part time and do not receive any regular salary or wages in return for the work performed. They do not run the household enterprise on their own but

assist the related person living in the same household in running the household enterprise.

1.10 Regular salaried/wage employee other than contract

workers: Persons working in others farm or non-farm enterprises (both household and non-household) and getting in return salary or wages on a regular basis (and not on the basis of daily or periodic renewal of work contract) are the regular salaried/wage employees. The category not only includes persons getting time-rate wage but also persons receiving piece-rate wage or salary and paid apprentices, both full time and part-time.

1.11 Worked on contract basis:

As per the definition of contract worker, a worker is deemed to be employed as contract worker when he/she is hired in connection with the work of an establishment by or through a contractor. Contract workmen are indirect employees; persons who are hired, supervised and remunerated by a contractor who, in turn, is compensated by the establishment. For the purpose of present survey, in addition to the above mentioned category of workers, the term contract workers includes workers whose work are

governed by a contract agreement either in writing or oral directly by the establishment. More precisely, the workers hired by the establishment directly for a specific job and for a specified period will also be categorized under the contract category of workers.

1.12 Casual wage labour: A person casually engaged in others farm or non-farm enterprises (both household and non-household) and getting in return wage according to the terms of the daily or periodic work contract is a casual wage labour. Usually in the rural areas, a type of casual labourers can be seen who normally engage themselves in 'public works' activities. 'Public works' are those activities which are sponsored by the Government or local bodies for construction of roads, digging of ponds, etc. as relief measures (like flood relief, drought relief, famine relief, etc.) and also under various employment generation schemes under poverty alleviation programmes.

1.13 Different approaches for determining activity status: The persons surveyed can be classified into various activity categories on the basis of activities pursued by

them during certain specified reference periods. There could be three reference periods viz. (i) one year, (ii) one week and (iii) each day of the reference week. Based on these three reference periods, three different measures of activity status are arrived at. These are termed respectively as usual principal status, current weekly status and current daily status. The activity status determined on the basis of a reference period of one year is known as the usual principal activity status of the person, that determined on the basis of a reference period of 1 week is known as the current weekly status (CWS) of the person and the activity status determined on the basis of a reference period of one day is known as the current daily status (CDS) of the person. In this report, the labour force related parameters are estimated for a reference period of one year.

1.14 Usual activity status: The usual activity status relates to the activity status of a person during the last completed twelve months from the date of survey. The activity in which a person spent relatively longer time (major time criterion) during the reference period is considered as the usual principal activity of the person. To

decide the usual principal activity of a person, he/she is first categorized as belonging to the labour force or not during the reference period on the basis of major time criterion. Persons, thus adjudged as not belonging to the labour force are assigned the broad activity status 'neither working nor available for work'.

1.15 For the persons belonging to the labour force, the broad activity status of either 'working' or 'not working but available for work and/or seeking work' is then ascertained again on the basis of the relatively longer time spent during the period in the labour force. Within the broad activity status so determined, the detailed activity status category of a person pursuing more than one such

Average monthly household earnings:

Average monthly earnings of the sample household i.e., all members of the household, from all the sources is to be filled against this item. A reference period of 12 months shall be observed for calculating the household includes earnings of members from different sources like income from trade, wage employment, casual labour, rental income, interest received, remittances from abroad, old age pension etc excluding earnings of domestic servant if any in the household.

activity will be determined again on the basis of the relatively longer time spent.

1.16 Subsidiary economic

activity status: A person whose usual principal status is determined on the basis of the major time criterion may have pursued some other economic activity for 30 days or more during the reference period. The status in which such economic activity is pursued during the reference period is the subsidiary economic activity status of the person. In case of multiple subsidiary economic activities, subsidiary activity will be determined on the basis of relatively longer time spent criterion.

Saving Bank account in any bank:

If any of the household member has saving bank account in any bank (government, private, co-operative).

Average monthly earnings in Rs.

For every member who is employed (status code 11-51), average monthly earnings is to be collected and entered in terms of codes as given in the schedule. Average Monthly earnings are defined as the monetary returns from economic activities undertaken during the reference period by members having status code 11-

51. In case of wage/salaried, contract and casual workers, the average monthly earnings includes wages and salaries, dearness allowances, other guaranteed allowances, over time payment, bonus, family allowances, or any

other social security payments made by the employer. In case of self-employed persons, the earnings will be taken as the monthly amount received by them on an average during the reference period.

SAMPLING DESIGN & ESTIMATION PROCEDURE

Introduction

Labour Bureau has been entrusted with the task of conducting Annual Employment-Unemployment Surveys in the country. The objective of this annual survey is to regularly make available the basic inputs on labour force related parameters to facilitate policy formulation/review. The first such Annual Household Employment-Unemployment survey for the period 2009-10 was conducted during the year 2010. Till so far four such surveys have been conducted and thereon reports released. The present one is the Fifth Annual Employment-Unemployment Survey in the series.

2.1 In the current survey, a moving reference period is used to determine the usual status activity of the persons. The survey has been conducted in all the States/UTs by covering all the districts in the country. The field work of the present survey was launched in April, 2015 and completed in majority of the States/UTs by December, 2015. A

sample of about 1.57 lakh household schedules has been covered during the survey in 36 States/UTs.

2.2 Sample Design: A stratified multi-stage sample design has been adopted for the Fifth Annual Household Employment-Unemployment Survey. The first stage units (FSU) for rural sector are the 2011 census villages in all the States/UTs, except Kerala State, where panchayat wards are the FSUs. In case of urban sector, the latest available Urban Frame Survey (UFS) blocks for the period 2007-12 prepared by National Sample Survey Office are the First stage units.

2.3 Stratification: Each district of a State/UT has been divided into two strata: i) rural stratum comprising of all the rural areas of the district and ii) urban stratum comprising of all the urban areas of the district.

2.4 Sample Size: In all 36 States/UTs, a total sample of

13076 First Stage Units (FSUs) is allocated at All India level keeping in view the resource availability and other logistics. Broadly considering the population proportion, a sample of 7416 FSUs is allocated to rural sector in all the 36 States/UTs, while rest 5660 FSUs are allocated in the urban sector. While allocating the sample, additional weight age is given to the urban sector as compared to rural sector; so that the urban areas are not under represented in the survey on the basis of proportional allocation, with the condition that in major states the total sample size in urban sector does not exceed that of the rural sector.

2.5 Allocation of Sample to States/UTs: Distribution of total number of sample FSUs in rural sector among the States/UTs is done in proportion to their respective rural population as per 2011 census, subject to a minimum sample allocation to each State/UT. For urban sector, the sample FSUs are allocated among the 36 States/UTs in proportion to the UFS blocks for the period 2007-12. A minimum sample size in a State/UT is allocated at 24 FSUs with a

minimum of 12 each in rural and urban areas.

2.6 Allocation of State/UT level rural and Urban Stratum sample to districts: The State/UT level rural/ urban sample is further distributed among its districts in proportion to rural/ urban population/urban frame survey blocks. A minimum of 24 FSUs are allocated to each State/UT for rural and urban areas combined. Stratum level sample is adjusted to multiple of 4 FSUs with a minimum sample size of 4 FSUs in a stratum. In case of some North Eastern States and UTs a marginal increase in sample size is done due to their under representation in overall sample because of their lower population.

2.7 Selection of FSUs: For the rural stratum, the village lists based on 2011 census frame are taken in the same order and the required sample is drawn by using circular systematic sampling technique with probability proportional to size (size being the population of the village as per Census 2011). In case of urban stratum, the UFS blocks are arranged in ascending order based on the town variable. After

arranging UFS blocks, sample is drawn by circular systematic sampling. This arrangement is done to ensure that most of the towns are represented in the sample. In both, the rural and the urban strata, samples are drawn in the form of two independent sub-samples.

2.8 Criteria for hamlet group/sub block formation: Large FSUs having approximate present population of 1200 or more are divided into a suitable number (say, D) of 'hamlet-groups'(hg) in the rural sector and 'sub-blocks'(sb) in the urban sector as stated below.

APPROXIMATE PRESENT POPULATION OF THE SAMPLE VILLAGE/ URBAN BLOCK	NO. OF HG/SB TO BE FORMED (D)
LESS THAN 1200 (NO HAMLET-GROUP/SUB BLOCK)	1
1200 TO 1799	3
1800 TO 2399	4
2400 TO 2999	5
3000 TO 3599	6
.....AND SO ON	

2.9 For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except Dehradun plains, Nainital Plains, Haridwar and Udham Singh Nagar), Poonch, Rajouri,

Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu & Kashmir and Idukki district of Kerala, the number of hamlet groups are formed as follows:

APPROXIMATE PRESENT POPULATION OF THE SAMPLE VILLAGE/ BLOCK	NO. OF HGS/ SBS TO BE FORMED (D)
LESS THAN 600 (NO HAMLET-GROUPS/SUB BLOCKS)	1
600 TO 899	3
900 TO 1199	4
1200 TO 1499	5
.....AND SO ON	

2.10 Selection of hamlet groups/sub blocks:

In case of large village/UFS block wherever hamlet-groups/sub-blocks have been formed, two hamlet-groups/sub-blocks are selected. The procedure to select the hg/sb is as follows:

- i) The hg/sb with maximum percentage share of population will always be selected and termed as hg/sb 1.
- ii) Second hg/sb will be selected from the remaining hgs/sbs by simple random sampling and termed as hg/sb 2.

Listing and selection of the households will be done independently in the two selected hamlet-groups/sub-blocks. In case hamlet-groups/sub-blocks is formed in a sample FSU, it is ensured that the hamlet-groups/sub-blocks formed are clearly identifiable in terms of physical landmarks. The FSU without hg/sb formation will be treated as sample hg/sb number 1.

2.11 Listing of households: After determining the hamlet-groups/sub-blocks i.e. areas to be

considered for listing, all the households in that area will be listed (including those found to be temporarily locked after ascertaining the temporariness of locking of households through local people). The hamlet-group/sub-block with sample hg/sb number 1 will be listed first and that with sample hg/sb number 2 will be listed next.

2.12 Formation of Second Stage Strata and allocation of households:

For canvassing the schedules, all the households listed in selected FSU/ hamlet-groups/ sub-blocks are to be stratified into four second stage strata (SSS) as given below:

The second-stage-strata in the rural and urban stratum will be formed based on the number of persons in a household aged 15 years and above. The four second-stage-strata (SSS) in the rural and urban strata are formed in the following order:

2.13 Allocation of households:

The number of households to be surveyed (h) in each second stage stratum in the sample FSUs is as follows:

SECOND STAGE STRATA (SSS)	NO. OF MEMBERS IN THE HOUSEHOLD AGED 15 YEARS & ABOVE
SSS1	1
SSS2	2-3
SSS3	4-5
SSS4	6 & MORE

SSS	WITHOUT HG/SB FORMATION		WITH HG/SB FORMATION IN BOTH RURAL & URBAN STRATA	
	RURAL	URBAN	HG1/SB1	HG2/SB2
H1	1	1	1	1
H2	3	4	2	2
H3	4	4	2	2
H4	4	3	1	1
TOTAL	12	12	6	6

2.14 Selection of Households:

From each Second Stage Strata the sample households are selected by simple random sampling without replacement.

2.15 Shortfall of households to be compensated:

Shortfall of households in the frame of any particular SSS will be compensated from the same SSS of the other hg/sb or from the other SSS of the same or other hg/sb where additional household(s) are available. The procedure is as follows:

Step 1: Allocate the required number of households to each SSS wherever possible and identify the SSS having shortfall.

Step 2: In case of hg/sb formation, compensate from the same SSS of the other hg/sb, if available. Otherwise, go to Step 3.

Step 3: Find the SSS where additional households are available following the priority order of SSS 1, SSS 2, SSS 3 & SSS 4 and compensate.

2.16 The table given below may be useful for deciding the SSS from

which the compensation is to be made.

SSS HAVING SHORTFALL	PRIORITY ORDER OF SSS FOR COMPENSATION
1	2, 3, 4
2	1, 3, 4
3	1, 2, 4
4	1, 2, 3

2.17 If there is hg/sb formation, for each SSS as per priority order, compensation may be made from the hg/sb where shortfall occurs, failing which from other hg/sb and so on.

2.18 For example, if shortfall is in SSS 3 of hg/sb 1, first try to compensate from SSS3 of hg/sb 2,

failing which try from SSS 1 of hg/sb 1, failing which try from SSS 1 of hg/sb 2. If the shortfall still remains then try from SSS 2 of hg/sb 1, failing which try from SSS 2 of hg/ sb 2. If the shortfall still remains then try from SSS 4 of hg/sb 1, failing which try from SSS 4 of hg/ sb 2.

Estimation Procedure

t = subscript for t-th stratum

m = subscript for sub-sample (m =1, 2)

i = subscript for i-th FSU (village/ panchayat ward/ UFS block)

d = subscript for a hamlet-group/ sub-block (d = 1, 2)

j = subscript for j-th second stage stratum in an FSU/hg/sb (j = 1,2,3,4)

k = subscript for k-th sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/ sb's formed in the sample FSU

D* = 1 if D = 1

= D-1 for FSUs with D > 1

N = total number of FSUs in any urban stratum

Z = total size of a rural stratum

z = size of selected sample village

n = number of sample FSUs surveyed in a stratum

H = total number of households listed in a second-stage stratum of an FSU
/ hamlet-group or sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of an FSU /
hamlet-group or sub-block of sample FSU

x, y = observed value of characteristics x, y under estimation

$\hat{X}, \hat{Y}$ = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

y_{tmidjk} = observed value of the characteristic y for the k -th household in the
 j -th second stage stratum of the d -th hg/ sb ($d = 1, 2$) of the i -th FSU
belonging to the m -th sub-sample for the t -th stratum.

Formulae for Estimation of Aggregates for a stratum in a district (rural & urban)

Listing Schedule 'A'

Rural stratum: For estimating the number of households possessing a characteristic

$$\hat{Y} = \frac{Z}{n} \sum_{i=1}^n \frac{1}{z_i} \{y_{i1} + D_i^* y_{i2}\}$$

Where y_{i1}, y_{i2} are the total number of households possessing the characteristic y in hg's 1 & 2 of the i -th FSU respectively.

Urban Stratum: For estimating the number of households possessing a characteristic in the urban stratum of a district.

$$\hat{Y} = \frac{N}{n} \sum_{i=1}^n \{y_{i1} + D_i^* y_{i2}\}$$

Where y_{i1}, y_{i2} are the total number of households possessing the characteristic y in sub-blocks 1 & 2 of i -th FSU respectively.

Schedule 'B': (Employment – Unemployment Survey Schedule)

Estimation formula for a rural stratum in a district:

Rural:

$$\hat{Y} = \sum_{j=1}^4 \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left\{ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right\}$$

Estimation formula for an urban stratum in a District:

$$\hat{Y} = \sum_{j=1}^4 \frac{N}{n_j} \sum_{i=1}^{n_j} \left\{ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right\}$$

Overall Estimate for Aggregates:

Overall estimate for aggregates for a stratum ($\hat{Y}_t$) based on two sub-samples is obtained as:

$$\hat{Y}_t = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{tm}$$

Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate $\hat{Y}$ at the State/ UT/ all-India level is obtained by summing the stratum estimates $\hat{Y}_t$ over all strata belonging to the State/ UT/ All-India.

Note: 1. Population and Percentage decadal change in population aged 15 years and above were calculated using Table C13 of Census 2001 and 2011.

2. For any category of persons of any State/UT/All-India, Projected population as on 1st March 2015 has been derived using the formula. $A = A_1 \times \{1 + (R/100)\}^{(52/120)}$, where A_1 is the census population as on 1st March 2011, R is the percentage decadal change in population between 2001 and 2011 and A is the projected population as on 1st July 2015.

Table (A2): Census Population as on 1st March 2011, percentage decadal change in population of aged 15 years and above between census 2001 and 2011 and projected population as on 1st July 2015 for each State/UT and All-India.

Note: 1. Population and Percentage decadal change in population aged 15 years and above were calculated using Table C13 of Census 2001 and 2011.

2. For any category of persons of any State/UT/All-India, Projected population as on 1st March 2015 has been derived using the formula. $A = A_1 * \{[1 + (R/100)]^{(52/120)}\}$, where A_1 is the census population as on 1st March 2011, R is the percentage decadal change in population between 2001 and 2011 and A is the projected population as on 1st July 2015.

.....about the Labour Bureau

An apex organization for providing data base at the national level for policy formulation, evaluation and research, the Labour Bureau in the Union Ministry of Labour and Employment is the epicenter of all activities involving planning, collection and dissemination of data on various facets of Labour which forms a sound basis for decision making in the Government, industry and by various other user organizations/individuals. Labour Bureau is a store house of important economic indicators like the Consumer Price Index Numbers for industrial and agricultural workers, wage rates, industrial relations, socio-economic conditions in un-organized sector, evaluation and review of working of labour legislations in the country and the like. Labour Bureau has been providing an uninterrupted service to the national and international fora like ILO for the last fifty years. Today, it has assumed an important role in the labour matters and has acquired an un-disputed and indispensable status in the field of labour statistics. Equipped with the expertise of conducting surveys at the national/regional level in diverse fields and in providing in-depth analysis, the organization continues in its pursuit of excellence.
