P R E F A C E

The Rural Labour Enquiry which throws light on various facets of Rural Labour Households is being conducted since 1963-65. The enquiry was, however, integrated with the National Sample Survey with effect from 1977-78 Round of NSS and since then it is being undertaken quinquennially on regular basis along with the General Employment & Unemployment and the Household Consumer Expenditure Surveys of the National Sample Survey Office (NSSO). The latest enquiry was conducted during 66th Round (2009-10) of the NSS. The main objective of the Enquiry is to provide upto date serial data on socio-economic conditions of Rural Labour Households to the policy makers for formulating/reviewing policies and also to the researchers for undertaking research. With this objective in view, the data collected under each of the quinquennial surveys conducted by the NSSO is processed and analysed by the Labour Bureau and five different Reports viz., (i) General Characteristics of Rural Labour Households; (ii) Wages & Earnings; (iii) Consumption Expenditure; (iv) Indebtedness; and (v) Employment & Unemployment of Rural Labour Households are brought out.

The present report on General Characteristics of Rural Labour Households is first in the series of five reports pertaining to 66th NSS Round and intends to analyze the general characteristics of rural labour households like household size, its distribution in terms of sex, social classes and occupational status; earning capabilities; ownership of land; etc. I am confident that this report will be very useful to all the policy makers/ researchers.

I convey my sincere thanks to Field Operation Division (FOD) and Data Processing Division (DPD) of National Sample Survey Office (NSSO) for collecting and tabulating the data collected under quinquennial round. I also place on record my appreciation for the officials of Rural Labour Enquiry Division of Labour Bureau [Annexure – III] for their sincere efforts in analyzing/interpreting the data and preparing this report in timely manner.

I look forward to suggestions/comments from readers to enrich this report further.

SUMMARY OF THE RURAL LABOUR ENQUIRY REPORT ON GENERAL CHARACTERISTICS OF RURAL LABOUR HOUSEHOLDS (2009–2010)

The report being released by the Labour Bureau on General Characteristics of Rural Labour Households (RLHs) is based on the NSS 66th Round (July, 2009 to June, 2010). A total of 2,81,327 persons from 59,129 rural households spread over 7402 villages were covered. The report primarily deals with demographic structure of labour households, size of households, land holding pattern, occupational pattern, number of agricultural and non-agricultural labourers, etc. The main findings of this report are summarised below:

(i) The estimated number of rural households during 2009–10 was 162.8 million as compared to 150.2 million during 2004-05 which showed an increase of 8.44 percent. Out of 162.8 million Rural Households, the RLHs constituted 40.37 percent or 65.7 million in absolute terms of which 41.7 million or 63.4 percent were Agricultural Labour Households (ALHs).

(ii) During 2009–10 the Rural Labour Households increased by 19.32 percent as compared to last survey (2004-05). The increase however, depicted different scenario among different social classes of RLHs. The highest increase of 24.08 percent was depicted by the Other Backward Classes followed by Scheduled Castes and Scheduled Tribes Households with an increase of 17.03 percent and 13.19 percent respectively. During the same period ALHs also observed an increase of 7.57 percent. Among ALHs all the social classes of households also showed an increasing trend during 2009-10 over 2004-05. ALHs also observed the maximum increase among Other Backward Classes Households (13.56 percent). This is followed by Scheduled Tribes (8.29 percent) and Scheduled Castes (1.11 percent) Households.

(iii) The average size of the rural labour household at all-India level, showed marginal decline from 4.56 in 2004-05 to 4.36 in 2009–10. A similar trend was also observed in case of Agricultural Labour Households as it fell from 4.50 to 4.24 during the same period.

(iv) During 2009–10, at all-India level, 45.37 percent of the Rural Households were without cultivated land as against 42.80 percent in the previous survey. The proportion of households without cultivated land in respect of the Scheduled Castes, the Scheduled Tribes and Other Backward Classes of households were 58.95 percent, 37.24 percent and 43.37 percent respectively.

(v) The land holding pattern of the RLHs also revealed that a majority of the households did not own cultivated land. At all-India level, 64.90 percent of the households were without cultivated land. At the level of different households classes, 68.97 percent, 56.25 percent and 64.57 percent of the SCs, STs and Other Backward Classes households respectively were reported to be without cultivated land in 2009–10. A similar pattern of land holding was observed in respect of ALHs also.

(vi) The average size of land cultivated by RLHs at all-India level has increased to 0.16 hectare in 2009-10 from the level of 0.12 hectare in 2004-05. This was in contrast to the declining trend depicted during earlier round of surveys i.e 1993-94 to 2004-05. A similar trend was also observed in ALHs.

(vii) The occupational pattern of the RLHs revealed that majority of the members were without occupation. During 2009–10, out of the average household size of 4.36 persons, at all-India level, 2.58 persons were without occupation. The situation was not different for the weaker classes of the society as the average number of members per household without occupation were 2.71, 2.39 and 2.49 respectively for Scheduled Castes, Scheduled Tribes and Other Backward Classes of RLHs.

(viii) During 2009–10 the total number of agricultural labourers in RLHs, at all-India level, was estimated at 72.92 million as compared to 72.67 million in 2004–05. Out of which, about 64.47 percent were males, 34.76 percent were females and 0.77 percent was children. During this period, a significant decline has also been observed in the percentage of child labourers among agricultural labourers. The proportion of child labourers in total agricultural labourers was 1.68 percent in 2004-05, which has declined to 0.77 percent in 2009-10.

(ix) The number of non-agricultural labourers in RLHs in 2009–10 was estimated at 31.03 million with an increase of 37.68 percent over 2004–05 (22.54 million). As compared to previous survey, the number of male non-agricultural labourers increased by 42.13 percent and females by 22.96 percent. Number of children, however, declined by 38.99 percent.

Note: It may be noted that for collection of information on occupation of the workers and the principal household occupation, 3-digit code of NCO-2004 was used in NSS 66th round as against NCO-1968 used in earlier rounds. Hence the results may not be strictly comparable as the concordance between 3-digit code of NCO-2004 and NCO-1968 was not possible.

CHAPTER - I

SCOPE AND METHOD OF ENQUIRY

1. Introduction

1.1 In India about two-third of the total labour force lives in the rural areas. Wage paid employment being the main source of their livelihood it has always been the main thrust of the Government of India to alleviate poverty, especially in the rural areas, by formulating and implementing various target result oriented poverty alleviation and development programmes. It was however felt that for formulating suitable and appropriate policies and action programmes, as well as for reviewing such policies/ programmes, the availability of sound data base is extremely important. Recognising the need for sound data base, the Government of India conducted first Agricultural Labour Enquiry (ALE) in the year 1950-51, followed by the second Enquiry in the year 1956-57. The scope of the subsequent enquiries was however widened and enlarged with intent to cover all rural labour households, instead of restricting these to agricultural labour households alone covered in the first two enquiries. Hence, the third enquiry in the series with the changed nomenclature, namely, the 'First Rural Labour Enquiry (RLE)' was conducted in the year 1963-65 followed by the second in 1974-75, the third in 1977-78, the fourth in 1983, the fifth in 1987-88, the sixth in 1993-94, the seventh in 1999-2000 and the eighth in 2004-05. The latest enquiry, which is ninth in the series, was conducted during 66th round (2009-10) of the NSS. With a view to narrow down the gap between the successive rounds of the Enquiries, the RLE was integrated with the General Employment & Unemployment Survey of the NSSO in the year 1977-78. All subsequent enquiries are now being conducted quinquennially to provide distinct and continuous data in the form of a time series on various parameters.

1.2 During the course of the Rural Labour Enquiries, data on various socio-economic facets viz, Employment & Unemployment; Consumption Expenditure; Wages & Earnings; and Indebtedness of rural and agricultural labourer households are collected. The job of collection of data for the earmarked survey was entrusted to the Field Operation Division (FOD) of the National Sample Survey Office (NSSO) through its network of zonal, regional and sub-regional offices located all over the Country. Under these enquiries, data are collected and analysed for rural labour as a whole. However, in order to have comparison with the previous rounds of enquiries and also to understand problems of this segment of labour force, which constitutes significant proportion of the rural labour, the analysis for agricultural labour are however, presented separately. The Labour Bureau is responsible for processing and dissemination of data, collected under RLE. The results of the latest Rural Labour Enquiry, the ninth in the series, for which the field work was undertaken by the NSSO (FOD) during its 66th Round Survey (July, 2009 to June, 2010), are being published in the form of the following five reports :-

- i) General Characteristics of Rural Labour Households;
- ii) Consumption Expenditure of Rural Labour Households;
- iii) Indebtedness among Rural Labour Households;
- iv) Wages and Earnings of Rural Labour Households; and
- v) Employment and Unemployment of Rural Labour Households.

The usefulness of the data thrown up by the various Rural Labour Enquiries has been acknowledged by various Committees and Commissions constituted by the government from time to time. The National Commission on Labour (1969) and the National Commission on Rural Labour (1991) have recommended that the periodic surveys undertaken by the Government to understand the rural situation should be continued and intensified. The second National Commission on Labour (1999) has also recommended that the Rural Labour Enquiries should be conducted more frequently.

2. Objectives

2.1 *The main objectives of the enquiry are:*

- i) To provide up-to-date serial data on demographic structure, extent and status of employment & unemployment, wages and earnings, household consumption expenditure, indebtedness, etc. for building up of reliable estimates of important socio-economic characteristics of rural labour in general and agricultural labour in particular.
- ii) To provide data relating to consumption expenditure for derivation of weighting diagrams for updating the series of CPI numbers for agricultural and rural labourers.

3. Scope

The Rural Labour Enquiry relates to all rural labour households. However, provision has been made in the tabulation plan to get separate estimates for agricultural labour households and rural labour households.

4. Geographical Coverage

The survey covered the whole of the Indian Union except (i) interior villages of Nagaland situated beyond five kilometres of the bus route and (ii) villages in Andaman and Nicobar Islands which remained inaccessible throughout the year. However, all the sample first stage units of both rural and urban areas of Leh, Kargil and Poonch districts of Jammu & Kashmir became casualty and therefore these districts were outside the survey coverage.

5. Concepts and Definitions

The important concepts and definitions adopted for the survey are as follows:-

(i) *Household*

A group of persons who normally live together and take food from a common kitchen constitute a household. The adverb “normally” means that temporary visitors and guests (whose total period of stay in the household is expected to be less than 6 months) are excluded but temporary stay-aways (whose total period of absence from the household is expected to be less than 6 months) are included. Thus a child residing in a hostel for studies is excluded from the household of his/her parents, but a resident domestic servant or paying guest (but not just a tenant in the house) is included in the employer’s/host’s household. “Living together” is given more importance than “sharing food from a common kitchen” in drawing the boundaries of a household in case the two criteria are in conflict. However, in the special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to shortage of space, the household formed by such a

person's family members is taken to include the person also. Each inmate of a hotel, mess, boarding-lodging house, hostel, etc., is considered to be a single-member household except that a family living in a hotel (say) is considered one household only. The same principle is applicable for the residential staff of such establishments. The size of a household is the total number of persons in the household.

(ii) *Rural Labour Household*

A household is classified as a rural labour household if its major source of income during the last 365 days preceding the survey is more from wage paid manual labour (agricultural and/or non-agricultural) than either from paid non-manual employment or from self-employment. Rural labour households include agricultural labour households as well.

(iii) *Agricultural Labour Household*

Of the households which are initially classified as 'Rural Labour Households', those deriving 50 percent or more of their total income from wage paid manual labour in agricultural activities are treated as agricultural labour households.

(iv) *Rural Labour Households with Cultivated Land*

A household having cultivated land, either 'owned', 'land leased-in' or 'land neither owned nor leased-in', is treated as household with cultivated land. Land cultivated (including orchard and plantation) during the agricultural year 2008-2009, i.e., July 2008 to June 2009 was recorded. Cultivated land is taken to mean the net area sown during the last calendar year (i.e. July to June) preceding the year of enquiry and included orchards and current fallows. Area with field crops and area under orchards and plantations is counted only once in the same year/ season.

(v) *Land Possessed*

The area of land possessed includes land 'owned', 'leased in' and 'land neither owned nor leased in' (i.e. encroached) by the household but excluded land 'leased out'. In collecting information regarding land possessed, the actual position as obtained on the date of survey is considered. The 'area of land possessed' does not include the area of land owned, leased-in, etc. by the servants/paying guests who are considered as normal members of the household, as per the definition of household taken up for the survey.

(vi) *Manual Work*

A job essentially involving physical labour is considered manual work. However, jobs essentially involving physical labour but also requiring a certain level of general, professional, scientific or technical education are not termed as 'manual work'. On the other hand, jobs not involving much of physical labour and at the same time not requiring much educational (general, scientific, technical or otherwise) background are treated as 'manual work'. Thus, engineers, doctors, dentists, midwives, etc., are not considered manual workers even though their jobs involved some amount of physical labour. But, peons, chowkidars, watchman, etc. are considered manual workers even though their work might not involve much physical labour. A few examples of manual workers are cooks, waiters, building caretakers, sweepers, cleaners and related workers, launderers, dry cleaners and pressers, hair dressers, barbers, beauticians, watchmen, gate keepers, agricultural labourers, plantation labourers and related workers.

(vii) Wage Paid Manual Labour

A person who does manual work in return for wages in cash or kind or partly in cash and partly in kind (excluding exchange labour) is considered as a wage paid manual labour. Salaries are also considered as wages. A person who is self-employed in manual work is not treated as a wage paid manual labour.

(viii) Rural Labour

Manual labour working in agricultural and /or non-agricultural occupations in return for wages paid either in cash or in kind (excluding exchange labour) and living in rural areas, is taken as rural labour.

(ix) Agricultural Labour

A person is considered as agricultural labour, in case he/she follows one or more of the following agricultural occupations in the capacity of a wage paid manual labour, whether paid in cash or kind or both:

- a) farming,
- b) dairy farming,
- c) production of any horticultural commodity,
- d) raising of livestock, bees or poultry,
- e) any practice performed on a farm as incidental to or in conjunction with farm operations (including forestry and timbering) and the preparation for market and delivery to storage or to market or to carriage for transportation to market of farm produce.

Working in fisheries is excluded from agricultural labour. Further, 'carriage for transportation' refers only to the first stage of transport action i.e. from farm to the first place of disposal.

(x) Wage and Salary Earnings

Information on wage and salary earnings are collected separately for each of the wage/salaried work recorded for a person in a day. Here, earnings refer to the wage/salary income (and not total earnings taking into consideration of all other activities done) received/receivable for the wage/salaried work done during the reference week by a wage/salaried employee and casual labourer. The wage/ salary received or receivable may be in cash or kind or partly in cash and partly in kind. While recording the earnings following conventions are followed.

- a) The wages in kind are evaluated at the current retail price.
- b) Bonus and perquisites such as free accommodation, reimbursement of expenditure for medical treatment, free telephones, etc. evaluated at the cost of the employer or at retail prices and duly apportioned for the reference week are also included in earnings.
- c) Amount receivable as 'over-time' for the additional work done beyond normal working time is excluded.

It may be noted that in the survey, at most two activities are recorded for a person in a day. Therefore, it is possible that a person might have carried out two or more wage/salaried activities in a day, but either one activity or two activities at the most, depending upon the time spent on those activities, are recorded. In such cases, the wage/salary income only from recorded activity(ies) is collected and recorded separately, and not the total income of the person from all the activities done during the entire day.

(xi) Economic Activity

The entire spectrum of human activity falls into two categories – economic activities and non-economic activities. Any activity resulting in production of goods and services that add value to national product is considered as an economic activity for the employment and unemployment survey. Such activities include production of all goods and services for market (i.e. for pay or profit) including those of government services, and, the production of primary commodities for own consumption and own account production of fixed assets.

(xii) Usual Occupation

The usual occupation of a person is the economic activity which he may be pursuing during the major part of the 365 days preceding the date of the survey.

(xiii) Activity Status

It is the activity situation in which a person is found participating in economic and non-economic activities during the reference period. According to this, a person could be in one or a combination of the following three broad activity statuses during a reference period:

- a) working or being engaged in economic activity (work) as defined above,
- b) being not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work' if 'work' is available and
- c) being not engaged in any economic activity (work) and also not available for 'work'.

Broad activity statuses mentioned in (a) and (b) above are associated with 'being in labour force' and the last with 'not being in the labour force'. Within the labour force, broad activity status (a) and (b) are associated with 'employment' and 'unemployment', respectively.

(xiv) Workers (or Employed)

Persons who are engaged in any economic activity or who, despite their attachment to economic activity, abstain themselves from work for reason of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work, constitute workers. Unpaid helpers who assist in the operation of an economic activity in the household farm or non-farm activities are also considered as workers.

(xv) Seeking or Available for Work (or Unemployed)

Persons who, owing to lack of work, are not working but either seek work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing conditions of work and remuneration, are considered as those 'seeking or available for work' (or unemployed).

(xvi) Labour Force

Persons who are either 'working' (or employed) or 'seeking or available for work' (or unemployed) constitute the labour force. Persons who are neither 'working' nor 'seeking or available for work' for various reasons during the reference period are considered as 'not in labour force'. Persons under this category are students, those engaged in domestic duties, rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young persons, prostitutes, etc. and casual labourers not working due to sickness.

(xvii) Self-Employed

Persons who operate their own farm or non-farm enterprises or are engaged independently in a profession or trade on own-account or with one or a few partners are treated as self-employed in household enterprises. The essential feature of the self-employed is that they have autonomy (decide how, where and when to produce) and economic independence (in respect of choice of market, scale of operation and finance) for carrying out their operation. The remuneration of the self-employed consists of a non-separable combination of two parts: a reward for their labour and profit of their enterprise. The combined remuneration is wholly determined by the revenue from sales after netting out value of purchased inputs used in production. Self-employed persons are further categorised as follows:

- a) **Own-account workers:** those self-employed persons who operate their enterprises on their own account or with one or a few partners and who, during the reference period, by and large, run their enterprise without hiring any labour. They could, however, have had unpaid helpers to assist them in the activity of the enterprise;
- b) **Employers:** those self-employed persons who work on their own account or with one or a few partners and, who, by and large, ran their enterprise by hiring labour; and
- c) **Helpers in household enterprise:** those self-employed persons (mostly family members) who are engaged in their household enterprises, working full or part time and do not receive any regular salary or wages in return for the work performed. They do not run the household enterprise on their own but assist the related person living in the same household in running the household enterprise.

(xviii) Regular Salaried/Wage Employees

These are persons who work in others' farm or non-farm enterprises (both household and non-household) and, in return, receive salary or wages on a regular basis (i.e. not on the basis of daily or periodic renewal of work contract). This category includes not only persons getting time wage but also persons receiving piece wage or salary and paid apprentices, both full time and part-time.

(xix) Casual Labour

A person casually engaged in other's farm or non-farm enterprises (both household and non household) and getting in return wage according to the terms of the daily or periodic work contract is a 'casual wage labourer'. Depending on whether they are so employed in 'public works' sponsored by government agencies or local bodies or in other

types of work, the casual workers are classified into two groups viz. casual labour in public works and casual workers in other types of work.

(xx) Children

Persons below 15 years of age are treated as children.

6. Period of the Survey

The enquiry was integrated with the 66th Round of the N.S.S. during the period 1st July, 2009 to 30th June, 2010, which was divided into 4 sub-rounds each of three months duration.

7. Sampling Design and Sample Size

7.1 Outline of the sampling design: A stratified multi-stage design was adopted for the 66th round survey. The first stage units (FSU) were the 2001 census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. The ultimate stage units (USU) were households in both the sectors. Hamlet-groups/sub-blocks constituted the intermediate stage whenever these were formed in the sample FSUs.

7.2 Sampling Frame for First Stage Units: For the rural sector, the list of 2001 census villages (Panchayat wards in case of Kerala) constituted the sampling frame. For the urban sector, the list of latest available Urban Frame Survey (UFS) blocks constituted the sampling frame.

7.3 Stratification: Within each district of a State/ UT, two basic strata were formed as follows: i) rural stratum comprising of all rural areas of the district and (ii) urban stratum comprising of all the urban areas of the district. However, within the urban areas of a district, if there were one or more towns with population 10 lakhs or more as per population census 2001, each of them formed a separate basic stratum and the remaining urban areas of the district were considered as another basic stratum.

7.4 Sub-stratification: There was no sub-stratification in the urban sector. However, to net adequate number of child workers, for all rural strata, each stratum was divided into 2 sub-strata as follows:

sub-stratum 1: all villages with proportion of child workers (p) $> 2P$ (where P is the average proportion of child workers for the state/ UT as per Census 2001)

sub-stratum 2: remaining villages

7.5 Total sample size (FSUs): At the all-India level, a total number of 12784 FSUs were allocated for survey in the central sample. In addition, 24 State sample FSUs (16 for rural sector and 8 for urban sector) of Leh and Kargil districts of J & K were included in the central sample.

7.6 Allocation of total sample to States and UTs: The total number of sample FSUs was allocated to the States and UTs in proportion to population as per census 2001 subject to the availability of investigators and ensuring minimum sample allocation to each State/ UT.

7.7 Allocation of State/UT level sample to rural and urban sectors: The State/ UT level sample size was allocated between two sectors in proportion to population as per census 2001 with double weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu, etc. did not exceed the rural sample size. A minimum of 16 FSUs (to the extent possible) was allocated to each state/ UT separately for rural and urban areas. Further the State level allocations for both rural and urban areas were adjusted marginally in a few cases to ensure that each stratum/ sub-stratum got a minimum allocation of 4 FSUs.

7.8 Allocation to strata: Within each sector of a State/ UT, the respective sample size was allocated to the different strata/ sub-strata in proportion to the population as per census 2001. Allocations at stratum/ sub-stratum level were adjusted to multiples of 4 with a minimum sample size of 4 and equal number of samples was allocated among the four sub rounds.

7.9 Selection of FSUs: For the rural sector, from each stratum/ sub-stratum, required number of sample villages were selected by probability proportional to size with replacement (PPSWR), size being the population of the village as per Census 2001. For urban sector, from each stratum FSUs were selected by using Simple Random Sampling Without Replacement (SRSWOR). Both rural and urban samples were drawn in the form of two independent sub-samples.

7.10 Selection of hamlet-groups/sub-blocks: Selected FSUs with approximate population 1200 or more were divided into a suitable number (say, D) of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector as stated below.

approximate present population of the sample FSU	no. of hgs/sbs to be formed (D)
less than 1200 (no hamlet-groups/sub-blocks)	1
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
.....and so on	

For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except four districts Dehradun (Plains), Nainital (Plains), Hardwar and Udham Singh Nagar), Poonch, Rajouri, Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups were formed as follows:

approximate present population of the sample village	no. of hgs to be formed
less than 600 (no hamlet-groups)	1
600 to 899	3
900 to 1199	4
1200 to 1499	5
.....and so on	

Hamlet-groups/ sub-blocks were formed in the sample FSU by more or less equalising populations. Two hamlet-groups (hg)/ sub-blocks (sb) were selected from a large FSU, wherever hamlet-groups/ sub-blocks were formed. This was done in the following manner – one hg/ sb with maximum percentage share of population was always selected and termed as hg/ sb 1; one more hg/ sb was selected from the remaining hg's/ sb's by simple random sampling (SRS) and termed as hg/ sb 2. Listing and selection of the households was done independently in the two selected hamlet-groups/ sub-blocks. The FSUs without hg/ sb formation were treated as sample hg/ sb number 1.

7.11 Sampling frame of households: All households listed in a village/UFS block where no hamlet-group/sub-block formation was done, or the households listed in the two selected hamlet-groups/sub-blocks of the village/UFS block where hamlet-group/sub-block formation was done, constituted the sampling frame of households.

7.12 Stratification of rural households: For employment and un-employment survey of NSS 66th round, all households listed in the selected FSU/hamlet group/sub-blocks were stratified into three second stage strata (SSS). The three second-stage-strata (SSS) formed in the rural areas were:

SSS	composition of SSS	no. of hhs to be surveyed	
		FSU without hg/sb formation	FSU with hg/sb formation (for each hg/sb)
SSS 1:	relatively affluent households	2	1
SSS 2:	of the remaining, households having principal earning from non- agricultural activity	4	2
SSS 3:	other households	2	1

Identification of affluent households was done by taking into account factors generally associated with affluent households such as: ownership of motor car/ jeep/ tractor/ combine-harvester/ truck/ bus/ etc.; consumer durables like DVD/ VCP/ refrigerator/ washing machine etc.; ownership of large business/ highly remunerative profession/ high salaried income etc.; ownership of spacious pucca house in good condition; ownership of 7 hectares or more of cultivable land; ownership of 3.5 hectares or more of irrigated land; ownership of a good number of cattle, buffaloes and camels (10 or more in number).

7.13 Selection of households: For employment-unemployment survey a total of 8 households were selected from each village/FSU. In both rural and urban areas, in case no hamlet-group/sub-block formation was done in the village/block, a number of 2, 4 and 2 households were selected from the second stage strata SSS1, SSS2 and SSS3, respectively. In case hamlet-groups/sub-blocks were formed in the village/block, a number of 1, 2 and 1 households were selected respectively from the second stage strata SSS1, SSS2 and SSS3 of each of the hamlet-groups/sub-blocks. The sample households from each of the second stage strata were selected by SRSWOR.

7.14 Sample Size: A total of 2,81,327 persons belonging to 59,129 households spread over 7,402 villages were surveyed at all-India level for canvassing Schedule 10 (employment-unemployment survey). The number of sample villages, households and persons surveyed in different States/Union Territories and all-India for rural sector are set out in the Table-1.

Table-1
Number of Villages Allotted & Surveyed and Rural Households/ Persons Surveyed in
Different States/UTs

Sl.No.	State/U.T.	No. of villages allotted	No. of villages surveyed	No. of Households surveyed	No. of persons

*Including 16 rural samples in the state sample of J & K included in the Central Sample.

8. ESTIMATION PROCEDURE

8.1 Notations:

The following notations were used in the estimation procedure of the 66th Round:

s = subscript for s^{th} stratum

t = subscript for t^{th} sub-stratum

m = subscript for sub-sample ($m = 1, 2$)

i = subscript for i^{th} FSU [village (panchayat ward) / block]

d = subscript for a hamlet-group/sub-block ($d = 1, 2$)

j = subscript for j^{th} second stage stratum in an FSU/ hg/sb ($j = 1, 2$ or 3)

k = subscript for k^{th} sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/sb's formed in the sample FSU

$D^* = 0$ if $D = 1$

$= (D - 1)$ for FSUs with $D > 1$

N = total number of FSUs in any urban sub-stratum

Z = total size of a rural stratum/sub-stratum (= sum of sizes for all the FSUs of a stratum/sub-stratum)

z = size of sample village used for selection.

n = number of sample FSUs surveyed including 'zero cases' but excluding casualty for a particular sub-sample and stratum/sub-stratum.

H = total number of households listed in a second-stage stratum of an FSU/hamlet-group or sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of an FSU/hamlet-group or sub-block of sample FSU

x, y = observed value of characteristics x, y under estimation

$\hat{X}, \hat{Y}$ = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

$y_{stmidjk}$ = observed value of the characteristic y for the k^{th} household in the j^{th} second stage stratum of the d^{th} hg/sb ($d = 1, 2$) of the i^{th} FSU belonging to the m^{th} sub-sample for the t^{th} sub-stratum of s^{th} stratum.

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

8.2 Estimation of aggregates for a particular sub-sample (m) and stratum (s) in Rural sector:

8.2.1 Sub-sample estimate for a sub-stratum:

(i) For j^{th} second stage stratum of a sub-stratum:

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \times \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

(ii) For all second-stage strata combined:

$$\hat{Y} = \sum_j \hat{Y}_j$$

8.2.2 Sub-sample estimate for a stratum:

Sub-sample estimate for a stratum will be obtained by adding sub-sample wise estimates of all the sub-strata ($\hat{Y}_{st}$) of the stratum.

$$\hat{Y}_s = \sum_t \hat{Y}_{st}$$

8.3 Overall Estimate for Aggregates:

Overall estimate for aggregates for a stratum ($\hat{Y}_s$) based on two sub-samples is obtained as:

$$\hat{Y}_s = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{sm}$$

8.4 Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate $\hat{Y}$ at the State/ UT/ all-India level is obtained by summing the stratum estimates $\hat{Y}_s$ over all strata belonging to the State/ UT/ all-India.

8.5 Estimates of Ratios:

Let $\hat{Y}$ and $\hat{X}$ be the overall estimates of the aggregates Y and X for two characteristics y and x respectively at the State/ UT/ all-India level.

Then the combined ratio estimate ($\hat{R}$) of the ratio ($R = \frac{Y}{X}$) will be obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}.$$

9. Present Report

This is the first report in the series of five reports to be brought out on the basis of ninth RLE covering different aspects of rural labour. It presents analysis of data on general characteristics of Rural Labour Households. It presents (a) demographic structure of labour households, (b) size of households, (c) land holding pattern of households, (d) occupational pattern of households, and (e) number of agricultural and non-agricultural labourers. A comparative picture of the main findings of nine Rural Labour Enquiries conducted till date is also given in Annexure – I.

CHAPTER II

STRUCTURE OF HOUSEHOLDS

This chapter mainly deals with the demographic structure of the Rural/Agricultural Labour Households of various sections viz.: 'All Classes', 'Scheduled Castes', 'Scheduled Tribes' and 'Other Backward Classes' of the society which primarily contains estimated number of households and household size (sex-wise) both at all-India level and state level. These details have further been analysed by comparing the results of the current survey (2009-10) with the previous survey (2004-05).

ESTIMATED NUMBER OF HOUSEHOLDS

The total estimated number of Rural Households comprising, Rural Labour Households (RLHs) and Agricultural Labour Households (ALHs) in respect of Scheduled Castes, Scheduled Tribes, Other Backward Classes and Other Households for the last two survey periods, at all-India level, are presented in Table 2.1

TABLE 2.1

Number of Households by Classes and Categories - All-India
(In Thousands)

	Scheduled Castes	Scheduled Tribes	Other Backward Classes	Others	All Classes
Rural Households					
2004 - 2005	32557	16077	63047	38486	150167
2009 - 2010	36187	17729	68663	40256	162835
Rural Labour Households					
2004 - 2005	18219	7284	20638	8954	55095
2009 - 2010	21321	8245	25607	10569	65742
Agricultural Labour Households					
2004 - 2005	13194	5465	14109	5993	38761
2009 - 2010	13340	5918	16022	6416	41696

During 2009-10, the total number of Rural Households (RHs) at all-India level was estimated at 162.8 million of which 36.2 million were Scheduled Castes; 17.7 million Scheduled Tribes; 68.7 million Other Backward Classes, and 40.2 million Other Classes of Households. As compared to previous survey, the estimated number of rural households during 2009-10 registered an increase of 8.44 percent. Amongst various classes of households, the Scheduled Caste Households showed the highest growth of 11.15 percent followed by the Scheduled Tribe Households (10.28 percent), Other Backward Classes (8.91 percent) and Other Households (4.60 percent). The Rural Labour Households which is the main segment of the study constituted 40.37 percent of the total RHs. Out of the 65.7

million RLHs, 21.3 million were Scheduled Castes, followed by Scheduled Tribes (8.2 million), Other Backward Classes (25.6 million) and Other Households (10.6 million). During 2009-10 all these social classes have registered an increase over 2004-05. However, the maximum increase of 24.08 percent was that of Other Backward Classes households.

Among the RLHs, a sizeable number was that of the Agricultural Labour Households (ALHs) which constituted more than 63 percent (i.e. 41.7 million out of 65.7 million). All the social classes of ALHs depicted an increase during 2009-10 over 2004-05. However, the maximum increase was that of Other Backward Classes Households (13.56 percent), followed by Scheduled Tribe Households (8.29 percent).

a) All Classes:

Statement 2.1(1) depicts state-wise distribution of estimated number of RHs, RLHs and ALHs for the period 2004-05 and 2009-10. The analysis has been restricted to 17 major states viz; Andhra Pradesh, Assam, Bihar, Chhattisgarh, Gujarat, Haryana, Jharkhand, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Odisha, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal only as these states accounts for more than 90 percent of the total sample households. The RLHs at national level reported an increase of 19.32 percent during 2009-10 over previous survey. Among states, Uttar Pradesh was on the top with an increase of 40.01 percent followed by Chhattisgarh (36.84 percent). The other states which recorded more than 10 percent increase were Andhra Pradesh (18.84 percent), Bihar (35.37 percent), Jharkhand (26.76 percent), Haryana (18.14 percent), Madhya Pradesh (35.41 percent), Rajasthan (26.58 percent), Tamil Nadu (19.57 percent) and West Bengal (30.61 percent). However, Gujarat state has shown a marginal decrease of 4.85 percent. Assam and Odisha states have registered negligible (less than 1 percent) decline in number of RLHs.

Agricultural Labour Households (ALHs) also depicted an upward trend with 7.57 percent increase at all-India level. The highest increase in ALHs during 2009-10 over 2004-05 was recorded in Chhattisgarh (45.06 percent) followed by Madhya Pradesh (31.46 percent). The other states showing significant increase in the number of ALHs were West Bengal (28.58 percent), Assam (17.63 percent), Andhra Pradesh (12.97 percent) and Bihar (15.50 percent). On the other hand, Jharkhand observed the maximum decline of 53.99 percent followed by Odisha (11.07 percent), Uttar Pradesh (9.92 percent) and Kerala (9.44 percent). Gujarat, Haryana, Karnataka, Maharashtra and Rajasthan have also registered decline in number of ALHs.

b) Scheduled Castes:

Statement 2.1(2) presents the state-wise estimated number of the Scheduled Caste Households among the RLHs and ALHs for the period 2004-05 and 2009-10. During 2009-10, the estimated number of Scheduled Caste Rural Labour Households, at all-India level, showed the increase of 17.03 percent over the previous survey. Amongst states, Jharkhand recorded the highest increase of 58.39 percent followed by Uttar Pradesh (36.64 percent) and Madhya Pradesh (33.69 percent). The other states which registered increase in the number of the Scheduled Caste Rural Labour Households were Andhra Pradesh (22.09 percent), Rajasthan (23.49 percent), Odisha (16.01 percent) and Haryana (16.48 percent). On the other hand, certain states which showed a decrease in number of Scheduled Caste Rural Labour Households during 2009-10 are Gujarat with 21.63 percent, Assam (11.38 percent), Chattisgarh (4.90 percent) and Kerala (3.59 percent).

The estimated number of Scheduled Caste ALHs, at all-India level, recorded an increase of 1.11 percent over previous survey. At state level the highest increase was recorded in Madhya Pradesh (41.70 percent) followed by West Bengal (29.37 percent),

Andhra Pradesh (12.67 percent) and Punjab (7.81 percent). However, the states namely Jharkhand (44.55 percent), Assam (43.21 percent), Kerala (20.90 percent), Rajasthan (20.83 percent) and Gujarat (17.51 percent) witnessed significant decline during 2009-10. Some other states, viz; Bihar, Chhattisgarh, Haryana, Maharashtra, Tamil Nadu and Uttar Pradesh also registered decline in number of Scheduled Castes ALHs.

c) Scheduled Tribes:

Household details of the Scheduled Tribes are given in Statement 2.1(3) at national level as well as at state wise. The total estimated number of the Scheduled Tribe Rural Households during 2009-10 was 17729 thousand which accounted for 10.89 percent of the total estimated Rural Households. Out of 17729 thousand Scheduled Tribe Households, 8245 thousand were Scheduled Tribe RLHs, 81.15 percent of which were concentrated in eight states viz; Andhra Pradesh, Chhattisgarh, Gujarat, Madhya Pradesh, Maharashtra, Odisha, Rajasthan and West Bengal. During 2009-10, the number of Scheduled Tribe RLHs, at all-India level, showed an increase of about 13.19 percent over the previous survey. The states which reflected positive growth were Bihar (231.03 percent), Chhattisgarh (91.74 percent), Tamil Nadu (65.00 percent), Madhya Pradesh (46.93 percent), Punjab (40.00 percent), Uttar Pradesh (22.41 percent), Gujarat (21.87 percent) and Assam (8.21 percent). The decrease was also observed in Kerala (30.00 percent) followed by Odisha (20.79 percent), Karnataka (20.05 percent), Rajasthan (11.76 percent), West Bengal (11.48 percent), Maharashtra (5.04 percent) and Andhra Pradesh (3.53 percent).

The estimated number of the Scheduled Tribe ALHs constituted about 3.63 percent of the total Rural Households during the current survey period. The analysis across the states revealed 63.52 percent decrease in number of the Scheduled Tribe ALHs in Jharkhand followed by Kerala (33.77 percent), Odisha (31.10 percent), Karnataka (20.05 percent), Maharashtra (17.85 percent), West Bengal (12.23 percent) and Andhra Pradesh (10.43 percent). The states showing an increasing trend were Bihar (210.20 percent) followed by Chhattisgarh (97.05 percent), Tamil Nadu (75.00 percent), Assam (47.37 percent), Madhya Pradesh (40.69 percent), Gujarat (21.51 percent) and Uttar Pradesh (20.00 percent). At the national level, though it also depicted an increasing trend, the increase (8.29 percent) was however lower than that of ST RLHs (13.19 percent) in 2009-10 over 2004-05.

d) Other Backward Classes:

The details of estimated number of rural households at all-India level as also state wise in respect of Other Backward Classes are presented in Statement 2.1(4). The Other Backward Classes RLHs which accounted for about 15.73 percent of the total estimated Rural Households increased to 25607 thousand in 2009-10 from 20638 thousand in 2004-05. About 74 percent of these households were concentrated in seven states viz; Andhra Pradesh, Bihar, Karnataka, Kerala, Maharashtra, Tamil Nadu and Uttar Pradesh. This also holds true in respect of the ALHs which accounted for around 76 percent of the total OBC Agricultural Labour Households. The increase in Other Backward Classes Rural Labour Households was the highest in West Bengal (79.74 percent) followed by Rajasthan (71.98 percent), Bihar (46.51 percent), Uttar Pradesh (38.39 percent), Andhra Pradesh (33.83 percent), Haryana (31.75 percent), Tamil Nadu (26.71 percent) and Madhya Pradesh (23.55 percent). However, the decrease was noticed in Punjab (29.83 percent) followed by Gujarat (12.36 percent).

At all-India level, the estimated number of OBC RLHs and OBC ALHs increased by 24.08 percent and 13.56 percent respectively in 2009-10 as compared to 2004-05. In case of OBC ALHs the maximum increase was noticed in Assam (106.43 percent) followed by

West Bengal (92.99 percent) and Andhra Pradesh (31.30 percent). On the contrary some states such as Punjab (53.91 percent), Jharkhand (39.50 percent) and Gujarat (21.73 percent) observed a decline in OBC ALHs during the period. Marginal decline was also observed in Haryana, Kerala, Odisha and Rajasthan states.

SIZE OF HOUSEHOLDS

(i) Rural Labour Households (RLHs)

a) All Classes:

The average size of all classes of the RLHs is given in Statement 2.2(1) for all States/UTs and all-India. The average household size at all-India level decreased to 4.36 persons during 2009-10 from 4.56 persons in 2004-05. As regards the composition of the household is concerned, it consists of 1.47 men, 1.45 women and 1.44 children.

At the state level, all major states have shown a decreasing trend except Haryana where it has recorded an increase from 4.50 persons in 2004-05 to 4.66 persons in 2009-10. The largest household size of 5.04 persons comprising of 1.53 men, 1.39 women and 2.12 children was observed in the state of Uttar Pradesh followed by Rajasthan (4.95), Bihar (4.83), Gujarat (4.79) and Madhya Pradesh (4.76). The lowest household size of 3.62 persons, consisting of 1.32 men, 1.39 women and 0.91 children, was registered in Andhra Pradesh. However, the household size of other major states ranged between 3.67 and 4.69 persons.

b) Scheduled Castes:

Statement 2.2(2) depicts average size of the RLHs for Scheduled Castes during the period of 2004-05 and 2009-10. At all-India level the average size of the Scheduled Castes RLHs decreased from 4.65 in 2004-05 to 4.49 in 2009-10.

The inter state analysis of average size of rural labour households indicates that, the largest household size of 5.44 persons, consisting of 2.09 men, 1.98 women and 1.37 children, was noticed in Assam followed by Madhya Pradesh (5.15) and Rajasthan (5.04). The lowest household size of 3.71 persons was recorded each in Andhra Pradesh and Tamil Nadu. In other major states the household size was in the range of 3.83 and 4.99 persons.

c) Scheduled Tribes:

The details of average household size of Scheduled Tribe RLHs have been presented in Statement 2.2(3). At all-India level, the average size of the Scheduled Tribe RLHs was 4.35 persons comprising of 1.43 men, 1.42 women and 1.50 children in 2009-10 as compared to 4.51 persons (1.41 men, 1.41 women and 1.69 children) in 2004-05.

Among major states, Punjab had the largest household size of 5.94 persons comprising of 1.00 men, 1.00 women and 3.94 children. The second largest household size was observed in Kerala (4.98) followed by Bihar (4.95). The smallest household size of 1.41 persons consisting of 1.00 men, 0.41 women and with no children was noticed in Haryana. In other states it was in the range of 3.52 to 4.88 persons.

d) Other Backward Classes:

Statement 2.2(4) contains the average household size details of Other Backward Classes. At all-India level, it was 4.28 persons consisting of 1.46 men, 1.43 women and 1.39 children. Among the major states, the largest size of 5.09 persons was observed in Uttar Pradesh followed by Rajasthan (5.01) and Gujarat (4.87). The smallest household size of 3.55 persons comprising of 1.28 men, 1.36 women and 0.91 children was observed in Andhra Pradesh. In other major states, it ranged between 3.64 and 4.75.

(ii) Agricultural Labour Households:

The sex wise average size of ALHs for all Classes, Scheduled Castes, Scheduled Tribes and Other Backward Classes Households has been presented in Statements 2.3(1) to 2.3(4). The average size of All Classes of Household at all-India level during 2009-10 was 4.24 persons as against 4.50 persons in 2004-05. Similarly, the decreasing trend was observed in the household size of the Scheduled Castes (4.58 to 4.33 persons), Scheduled Tribes (4.41 to 4.34 persons) and Other Backward Classes (4.45 to 4.15 persons) during 2009-10 as compared to 2004-05. The state-level trend in household structure of ALHs found more or less similar to that of the RLHs.

CHAPTER III

PATTERN OF LAND HOLDING

The pattern of land holding among different classes and categories of Rural Households has been discussed in this chapter. The details inter-aila depicts State-wise and also all-India level percentage of land-less households as well as the size of cultivated land a Rural Labour Household owns. The cultivated land has been taken as the net sown area under different crops during a given period. The land possessed includes land owned; (+) land leased in; (-) land leased out, and (+) any land held by the household which is neither owned nor leased in (i.e. encroached land, etc.).

POSSESSION OF CULTIVATED LAND:

a) All Classes :

Statement 3.1 (1) shows the percentage distribution of All Rural Households; Rural Labour Households, and Agricultural Labour Households with & without cultivated land during the period 2009-10. During 2009-10, at all-India level, 54.63 percent of the Rural Households possessed the cultivated land as against 57.20 percent during the previous survey (2004-05). Among the major states, the highest percentage of households possessing cultivated land was found in Assam (73.58 percent) followed by Chhattisgarh (72.46 percent), Rajasthan (70.23 percent), Jharkhand (69.83 percent), Madhya Pradesh (69.32 percent) and Uttar Pradesh (69.03 percent). On the other hand, Tamil Nadu showed the lowest percentage of households with cultivated land (23.41 percent). The percentage of households holding cultivated land had increased in Madhya Pradesh (66.54 percent to 69.32 percent), Gujarat (49.40 percent to 57.12 percent), Maharashtra (52.04 percent to 54.15 percent), Odisha (58.54 percent to 62.32 percent) and Punjab (31.65 percent to 32.73 percent) as compared to 2004-05 during 2009-10.

As regards Rural Labour Households, at all-India level, 35.10 percent of the households possessed the cultivated land during 2009-10 as against 37.20 percent during the previous survey. Among major states, the highest percentage of households with cultivated land was observed in Chhattisgarh (70.08 percent), Jharkhand (57.14 percent), Kerala (53.73 percent), Odisha (53.47 percent), Madhya Pradesh (45.89 percent), Assam (45.64 percent), Uttar Pradesh (45.62 percent) and Rajasthan (45.02 percent). The lowest percentage was observed in Haryana (6.76 percent) followed by Punjab (7.85 percent).

Agricultural Labour Households, at all India level, the percentage of households having cultivated land witnessed a marginal decline from 38.29 in 2004-05 to 36.37 in 2009-10. There is not much variation in the possession of cultivated land for ALHs and RLHs in different states. In Andhra Pradesh, Bihar, Gujarat, Haryana, Maharashtra, Punjab, Tamil Nadu and West Bengal, the proportion of ALHs with cultivated land was less than the national level of 36.37 percent.

b) Scheduled Castes :

Statement 3.1(2) shows the state-wise percentage distribution of the Scheduled Caste Households with and without cultivated land. At all-India level, 41.05 percent of All Rural Households had cultivated land in 2009-10 as against 42.58 percent in 2004-05. Amongst major states, the highest percentage of households with cultivated land was observed in Jharkhand (62.43 percent) followed by Assam (61.58 percent), Madhya Pradesh (61.10 percent) and Uttar Pradesh (59.49 percent). The lowest was in Punjab (5.82 percent).

At the national level, only 31.03 percent of the Scheduled Caste RLHs and 32.74 percent of the Scheduled Caste ALHs were reported to be in possession of cultivated land.

c) Scheduled Tribes :

The percentage distribution of Scheduled Tribe Households with & without cultivated land has been shown in Statement 3.1(3). It has been observed that among various social classes, the Scheduled Tribe Households had the largest percentage of households possessing cultivated land during the current survey. At all-India level for Scheduled Tribes, 62.76 percent of all Rural Households, 43.75 percent of Rural Labour Households and 42.03 percent of Agricultural Labour Households possessed cultivated land. Amongst major states, the highest proportion of households with cultivated land was reported from Rajasthan (83.84 percent) followed by Chhattisgarh (80.02 percent), Assam (79.96 percent), Jharkhand (75.83 percent) and Odisha (67.06 percent). On the other hand, majority of the ST households were without cultivated land in Punjab (85.45 percent), Haryana (74.76 percent), Tamil Nadu (72.59 percent), West Bengal (71.60 percent), Bihar (64.71 percent), Karnataka (63.95 percent) and Maharashtra (51.27 percent) for rural households.

d) Other Backward Classes :

The Statement 3.1(4) presents percentage distribution of Other Backward Classes Households with and without cultivated land. At all-India level, majority of the Rural Households possessed cultivated land as compared to the Rural Labour Households and Agricultural Labour Households. During 2009-10, the percentages of households possessing land among Rural households, Rural Labour households and agricultural labour households work out to be 56.63 percent, 35.43 percent and 37.55 percent respectively. Among major states, rural labour households of Chhattisgarh possessed the highest percentage of cultivated land (64.20 percent) followed by Jharkhand (62.98 percent), Odisha (60.58 percent), Kerala (51.37 percent), Rajasthan (46.81 percent), Uttar Pradesh (45.89 percent) and Madhya Pradesh (44.68 percent). The low percentage of households with land was in Haryana (9.43 percent). In respect of Agricultural Labour Households, Chhattisgarh with 66.91 percent was at number one followed by Odisha (65.26 percent) and Uttar Pradesh (59.69 percent). The State of Punjab and Tamil Nadu were at the lowest level with 1.09 percent and 12.99 percent households respectively possessing cultivated land.

RURAL LABOUR HOUSEHOLDS AND OWNERSHIP OF LAND AMONG DIFFERENT SOCIAL CLASSES:

Statement 3.2(1) shows the percentage distribution of Scheduled Caste Households with and without cultivated land as a proportion of total Rural Households, Rural Labour Households and Agricultural Labour Households. It reveals that at the all India level, 22.22 percent of All Rural Households belonged to the Scheduled Caste of which 9.12 percent were with cultivated land and 13.10 percent without cultivated land.

As regards, Rural Labour Households, 32.43 percent of total households belonged to the Scheduled Castes, majority of them (22.37 percent) were without cultivated land. Amongst major states, the proportion of the Scheduled Caste RLHs without land was highest in Punjab (67.23 percent) followed by Haryana (60.43 percent) and the lowest proportion was found in Assam (6.21 percent). In the case of ALHs, 31.99 percent of the households at all-India level belonged to the Scheduled Castes of which only 10.47 percent possessed cultivated land.

Details in respect of the Scheduled Tribe Households have been presented in Statement 3.2(2). At all-India level, 10.89 percent of Rural Households (6.83 percent with land & 4.05 percent without land) belonged to the Scheduled Tribes category. The proportion of ST Rural Labour Households was 12.54 percent (5.49 percent with land and

7.05 percent without land). The Agricultural Labour Households had higher proportion of ST households than Rural Labour households i.e. 14.19 percent (5.97 percent with land and 8.23 percent without land) of the Scheduled Tribe Households.

Among the major states, the proportion of the Scheduled Tribe Households to all Rural Households was the highest in Chhattisgarh (39.36 percent) followed by Jharkhand (33.50 percent), Madhya Pradesh (28.23 percent), Gujarat (24.76 percent) and Odisha (23.50 percent). In case of RLHs and ALHs, the highest proportion of the Scheduled Tribe households was noticed in Chhattisgarh with 40.66 percent and 40.43 percent respectively. Apart from Chhattisgarh (40.66 percent), Madhya Pradesh (38.38 percent), Gujarat (31.31 percent), Odisha (27.92 percent), Jharkhand (25.25 percent), Rajasthan (20.41 percent), Maharashtra (15.59 percent) and Assam (13.02 percent), all other major states have less proportion of Scheduled Tribe Rural Labour Households than the all India average of 12.54 percent.

The details of Other Backward Classes Households are presented in Statement 3.2(3). At All-India level, 42.17 percent (23.88 percent with land & 18.29 percent without land) of All Rural Households belonged to Other Backward Classes. In respect of Rural Labour Households and Agricultural Labour Households, the percentage stood at 38.95 (13.80 percent with land and 25.15 percent without land) and 38.43 (14.43 percent with land and 24.00 percent without land) respectively.

Among the major states, the percentage of Other Backward Classes RLHs to total RLHs was highest in Tamil Nadu (66.44 percent) followed by Kerala (56.44 percent). As regards the proportion of ALHs of Other Backward Classes to total ALHs is concerned, it was highest in Tamil Nadu (62.72 percent) followed by Bihar (53.79 percent). West Bengal was at the bottom with 6.07 percent in case of RLHs and 5.69 percent in case of ALHs.

DISTRIBUTION OF HOUSEHOLDS BY SIZE OF LAND CULTIVATED:

The Statement 3.3(1) depicts average size of land cultivated alongwith percentage distribution of estimated number of all rural labour households by size of the land cultivated. At all-India level, the average size of land cultivated (per cultivating household) was 0.16 hectare during 2009-10 as against 0.12 hectare in the 2004-05. Most of the states reported an increase in the size of land cultivated over the last survey except Odisha where it decreased from 0.12 to 0.11 hectare and Jharkhand where it remained stagnant at 0.5 hectare during 2009-10. In all major states except Andhra Pradesh (0.29), Chhattisgarh (0.34), Gujarat (0.29), Karnataka (0.41), Madhya Pradesh (0.34 hectare), Maharashtra (0.28 hectare) and Rajasthan (0.30 hectare), the average size of land cultivated was less than the national average of 0.16 hectare.

The percentage distribution of all Rural Labour Households by size of land cultivated revealed that at all-India level more than 7 percent of households were landless and 61 percent were marginal farmers possessing cultivated land between 0.01 and 0.40 hectare. Only 2.50 percent of the households possessed cultivated land above 2.00 hectares. Among the major states, the highest proportion of landless households was observed in Punjab (28.30 percent) followed by Kerala (16.40 percent).

As regards the Scheduled Caste RLHs, during 2009-10, the average size of land cultivated at all India level was 0.15 hectare as compared to 0.12 hectare in the last survey. Among major states, ten states viz Andhra Pradesh (0.19 hectare to 0.33 hectare), Bihar (0.09 hectare to 0.13 hectare), Chhattisgarh (0.15 hectare to 0.21 hectare), Haryana (0.05 hectare to 0.25 hectare), Karnataka (0.21 hectare to 0.41 hectare), Madhya Pradesh (0.20 hectare to 0.46 hectare), Tamil Nadu (0.9 hectare to 0.13 hectare), West Bengal (0.07

hectare to 0.13 hectare) and Uttar Pradesh (0.09 hectare to 0.13 hectare) showed an increase in the size of cultivated land.

The percentage distribution of households by size of land showed that, at all-India level, 7.40 percent of the Scheduled Caste households were without cultivated land and around 68 percent were in possession of cultivated land in the range of 0.01 hectare to 0.40 hectare and only 1.60 percent households possessed more than 2.00 hectares of cultivated land. Among major states, the highest percentage of landless households was found in Punjab (79.50 percent) followed by Kerala (26 percent).

The details of average size of cultivated land and percentage distribution of households by size of land cultivated in respect of the Scheduled Tribe RLHs are shown in Statement 3.3(3). Though, at all-India level, the average size of land cultivated increased to 0.16 hectare during 2009-10 as compared to 0.14 hectare in 2004-05, there are some major states like Andhra Pradesh, Gujarat, Jharkhand, Kerala, Karnataka, Odisha, Rajasthan and West Bengal which depicted a decreasing trend in average size of land as compared to previous survey. Around 7 percent of the households were land less at national level and 49 percent were in possession of cultivated land in the range of 0.01 hectare to 0.40 hectare.

Among the Other Backward Classes households, Statement 3.3(4), the average size of land cultivated was 0.18 hectare at all-India level as against 0.13 hectare during the previous survey. The percentage of landless households was 6.60 percent. The marginal farmers with cultivated land in the range of 0.01 hectare and 0.40 hectare were about 58.3 percent. At state level, the highest number of landless households was in Kerala (17.60 percent) followed by Jharkhand (15.70 percent), Tamil Nadu (14.10 percent) and Bihar (13.30 percent).

A similar trend in land holding was observed in the case of ALHs. The details of land holding in respect of ALHs have been presented in Statements 3.4(1) to 3.4(4).

CHAPTER IV

OCCUPATIONAL PATTERN

Rural society is apparently predominated by landless labourers and marginal farmers who remain unemployed during a major part of the year due to seasonal nature of agricultural activities. In this chapter an attempt has been made to study the occupational pattern of the members of the households with a view to understand their occupational status on the one hand and the extent of unemployment on the other. The members of the households have been categorised into four occupational groups viz; - i) agricultural labour, ii) non-agricultural labour iii) other occupations, and iv) no occupation. Occupational pattern of the members of the households, with and without land, has also been discussed in this chapter.

THE NATURE OF OCCUPATION OF THE MEMBERS OF THE HOUSEHOLDS

(i) Rural Labour Households (RLHs):

The distribution of members of RLHs by their usual occupation has been presented in Statements 4.1(1) to 4.1(4). At all-India level, out of average household size of 4.36 persons, 2.58 persons were without occupation during 2009-10. Among the remaining 1.78 persons per household, 1.11 persons were engaged in agricultural labour, 0.47 persons in non-agricultural labour and 0.20 persons in other occupations. All the major states reported more than 50 percent members of households to be without occupation except Andhra Pradesh, Karnataka and Tamil Nadu. The major states which reported the average number of members without occupation per household higher than the all India average of 2.58 persons were Assam (2.86 persons), Bihar (3.40 persons), Gujarat (2.68 persons), Haryana (3.09 persons), Jharkhand (3.20 persons), Kerala (2.61 persons), Madhya Pradesh (2.65 Persons), Punjab (3.24 Persons), Rajasthan (3.22 persons), and Uttar Pradesh (3.50 persons). Agricultural was one of prominent occupation of the households in majority of these states. Karnataka was on the top with 1.73 persons followed by Maharashtra (1.65 persons), Chhattisgarh (1.65 persons), Madhya Pradesh (1.59 persons), Gujarat (1.49 persons), Andhra Pradesh (1.45 persons), Tamil Nadu (1.20 persons), Odisha (1.11 persons), and Bihar (1.04 persons). However, Jharkhand with 0.15 persons per households was at the bottom.

A majority of the members of the Scheduled Caste households were also without occupation. At all-India level, out of the average household size of 4.49 persons, 2.71 persons were without occupation, 1.11 persons were agricultural labourers, 0.50 persons were non-agricultural labourers and 0.17 persons were engaged in other occupations. Assam (3.40 persons), Bihar (3.48 persons), Chhattisgarh (2.73 persons), Haryana (3.26 persons), Jharkhand (3.48 persons), Madhya Pradesh (2.79 persons), Punjab (3.26 persons), Rajasthan (3.41 persons), and Uttar Pradesh (3.41 persons) were the major states which reported the average number of members without occupation per household greater than the all India average of 2.71 persons. Among Scheduled Castes Households, agricultural labour was observed to be the most prominent occupation in all the states except Jharkhand and Rajasthan where non-agricultural labour was reported as favoured occupation with 1.05 and 1.09 persons per households respectively as compared to 0.18 and 0.33 persons engaged in agricultural labour.

As in case of the Scheduled Tribes households, most of the members of the Scheduled Tribe RLHs were also found without work. Of the average household size of 4.35 persons at all-India level, 2.39 persons were without occupation, 1.39 persons were agricultural labourers, 0.39 persons were non-agricultural labourers and 0.18 persons were

engaged in other occupations. Similar to Scheduled Castes households, agricultural labour was one to be the most popular occupation among the Scheduled Tribes households. The major states which reported the average number of members per household as agricultural labourers more than the all India average of 1.39 persons were Karnataka (2.09 persons), Andhra Pradesh (1.87 persons), Tamil Nadu (1.83 persons), Maharashtra (1.78 persons), Chhattisgarh (1.64 persons), Gujarat (1.62 persons) and Madhya Pradesh (1.52 persons).

The trend in the case of Other Backward Classes of RLHs was also in line with all the Classes Scheduled Castes and the Scheduled Tribes households. Agricultural labour was one of the most preferred occupations among the Other Backward Classes households. Of the all India average household size of 4.28 persons, 2.49 persons were without occupation, 1.10 persons were engaged in agricultural labour, 0.48 persons in non-agricultural labour and 0.21 persons in other occupations. Uttar Pradesh (3.54 persons), Punjab (3.36 persons), Bihar (3.33 persons), Rajasthan (3.24 persons), Jharkhand (3.01 persons), Kerala (2.77 persons), Haryana (2.75 persons), Odisha (2.70 persons), West Bengal (2.68 persons) Assam (2.63 persons), Gujarat (2.61 persons) and Madhya Pradesh (2.51 persons) reported the average number of household members without occupation higher than the national average of 2.49 persons per household.

(ii) Agricultural Labour Households (ALHs) :

The details of distribution of members of the ALHs by usual occupation have been presented in Statements 4.2(1) to 4.2(4). The ALHs being the subset of the RLHs, no separate analysis has been attempted so far. It may, however, be observed that a majority of the members of ALHs, like RLHs were without occupation. Of all India average household size of 4.24 persons (all-classes), 2.38 persons were without occupation, 1.67 persons were agricultural labourers, 0.06 persons were non-agricultural labourers and 0.13 persons were engaged in other occupations. All major states reported same pattern of occupation as the one observed in the case of All-India. The states which experienced the average number of members without occupation higher than the all India average of 2.38 persons were Assam (2.63 persons), Bihar (3.32 persons), Gujarat (2.53 persons), Haryana (3.16 persons), Jharkhand, Kerala & Madhya Pradesh (2.61 persons each), Odisha (2.58 persons), Punjab (3.27 persons), Rajasthan (3.24 persons), Uttar Pradesh (3.30 persons) and West Bengal (2.54 persons). Among major states, Andhra Pradesh (1.81 persons), Chhattisgarh (1.82 persons), Gujarat (1.92 persons), Karnataka (2.12 persons), Madhya Pradesh (1.96 persons), Maharashtra (2.08 persons) and Tamil Nadu (1.81 persons) reported the number of agricultural labour per household higher than the All India average of 1.67 persons.

DISTRIBUTION OF PERSONS BY USUAL OCCUPATION AND POSSESSION OF LAND

(i) Rural Labour Households:

The percentage distribution of persons by usual occupation and possession of land in respect of RLHs has been presented in Statement 4.3 (1) to 4.3 (4). These statements revealed that the majority of the persons in rural labour households were without occupation. At all-India level, 59.11 percent members of the rural labour households (all-classes) were without occupation, 25.42 percent were agricultural labourers, 10.82 were non-agricultural labourers and 4.65 percent were engaged in other occupations. Majority of the persons possessing cultivated land were without occupation. At all-India level, 59.35 percent of the persons with cultivated land were without occupation, 24.53 percent were agricultural labourers, 9.29 percent were non-agricultural labourers and 6.83 percent were engaged in other occupations. Similarly, 58.96 percent of the persons without cultivated land were without occupation, 25.97 percent were agricultural labourers, 11.76 percent were non-agricultural labourers and 3.31 percent engaged in other occupations were without land.

As in the case of All-Classes of Households, a majority of members of the Scheduled Caste RLHs were without occupation. At all-India level, 60.54 percent of the persons with cultivated land had no occupation, while 24.97 percent were agricultural labourers, 8.98 percent were non-agricultural labourers and 5.51 percent were engaged in other occupations. The corresponding figures for those who did not own cultivated land were 60.26 percent, 24.75 percent, 12.25 percent and 2.74 percent. Similarly, a majority of the persons of the Scheduled Tribe Households were without any occupation. At all-India level, 54.62 percent of the persons with cultivated land and 55.08 percent without cultivated land had no occupation. Of the remaining persons with cultivated land, 28.29 percent were agricultural labourers, 10.23 percent were non-agricultural labourers and 6.86 percent were engaged in other occupations. The corresponding figures for those without cultivated land were 35.10 percent, 7.85 percent and 1.97 percent.

The picture was almost identical in the case of Other Backward Classes RLHs also. The majority of the persons in this section were also without occupation. At all-India level, 58.59 percent of the persons with cultivated land were without occupation, 25.01 percent were engaged in agricultural labour, 9.12 percent in non-agricultural labour and 7.28 percent in other occupations. The corresponding figures for those without cultivated land were 57.75 percent, 26.28 percent, 12.63 percent and 3.34 percent. Agricultural labour was reported to be the most popular occupation among Other Backward Classes RLHs also. The states of Andhra Pradesh, Assam, Chhattisgarh, Gujarat, Karnataka, Madhya Pradesh, Maharashtra and Tamil Nadu reported the percentage of agricultural labour greater than the all India average of 25.78 percent.

(ii) Agricultural Labour Households:

Statements 4.4(1), 4.4(2), 4.4(3) and 4.4(4) present percentage distribution of persons by usual occupation and possession of land in respect of All-Classes, Scheduled Castes, Scheduled Tribes and Other Backward Classes agricultural labour households respectively. These statements revealed almost similar trend as in case of RLHs, therefore, separate analysis of ALHs has not been attempted in the Report.

GROWTH OF AGRICULTURAL AND NON-AGRICULTURAL LABOURERS

(i) Rural Labour Households

The estimated number of agricultural and non-agricultural labourers in RLHs has been presented in Statements 4.5 (1) to 4.5 (4). At all-India level, there were 72.92 million agricultural labourers among RLHs in 2009-10 of which 23.75 million were Scheduled Castes, 11.43 million Scheduled Tribes and 28.27 million were Other Backward Classes. Similarly, of 31.03 million non-agricultural labourers, 10.66 million were Scheduled Castes 3.21 million were Scheduled Tribes and 12.33 million were Other Backward Classes. Around 64.48 percent of the agricultural labourers (all classes) were males, 34.76 percent were females and 0.77 percent was children. The female and child agricultural labourers registered a decrease of 6.97 percent and 54.14 percent respectively, however, male agricultural labourers shown an increase of 6.35 percent over the last survey.

So far as the incidence of child agricultural labour is concerned, there has been a significant decline in 2009-10 over the previous survey. At all-India level, the decline was observed to the tune of 54.10 percent. However, the states like Assam (33.33 percent), Rajasthan (50.00 percent) and West Bengal (125 percent) have shown an increase in child labour. The trend in the case of the Scheduled Castes and the Scheduled Tribes agricultural labourers, was almost similar. At all-India level, the percentage of child agricultural labour from the Scheduled Castes and the Scheduled Tribes categories

decreased by 31.73 percent and 64.23 percent respectively in 2009-10 over 2004-05. However, the states of Karnataka, Rajasthan and West Bengal reported an increase in the incidence of child labour from the Scheduled Castes category and West Bengal from the Scheduled Tribes category. As regards Other Backward Classes RLHs, out of 28.27 million agricultural labourers, 62.34 percent were males, 37.06 percent were female and 0.59 percent were children during 2009-10.

Amongst non-agricultural labourers, about 84.01 percent (all-classes) were males, 15.36 percent were females and 0.63 percent were children in 2009-10. As compared to previous survey, during 2009-10, the number of non-agricultural labourers increased by 37.68 percent at all-India level. The number of men and women showed an increase of 42.13 percent and 22.96 percent respectively during the same period. However, the number of children depicted the decline of 38.99 percent. The states which have observed an increasing trend in the incidence of child labour are Assam, Bihar and Uttar Pradesh. However it remained static at the level of 19 thousand in Odisha state as compared to previous survey.

Similarly, the Scheduled Castes and Scheduled Tribes non-agricultural labourers also registered an increase of 44.99 percent and 13.50 percent respectively over the previous survey. Majority of the states reported substantial increase in non-agricultural labourers in both Scheduled Caste and Scheduled Tribe categories. In case of Other Backward Classes, out of 12.33 million non-agricultural labourers (all classes), 83.30 percent were males, 16.48 percent were females and 0.22 percent were children during 2009-10 survey.

(ii) Agricultural Labour Households

The estimated number of agricultural and non-agricultural labourers in respect of all-classes, scheduled castes, scheduled tribes and other backward classes agricultural labour households has been presented in statements 4.6(1), 4.6(2), 4.6(3) and 4.6(4) respectively. Among agricultural labour households (all classes), there were 69.55 million agricultural labourers in 2009-10 at all-India level, of which 22.52 millions were scheduled castes, 11.00 millions were scheduled tribes and 26.91 millions were other backward classes households. About 65.81 percent of the agricultural labourers were males, 33.47 percent were females and 0.72 percent was children. As compared to previous survey, the male agricultural labourers showed an increasing trend of 6.73 percent, whereas in the case of female and children there number decreased by 6.74 percent and 56.60 percent respectively.

As regards to non-agricultural labourers, out of 2.43 million labourers (all classes) at all-India level in 2009-10, 0.88 million were Scheduled Castes, 0.30 million were Scheduled Tribes and 0.92 million were Other Backward Classes. About 72.58 percent of these labourers (all-classes) were males, 26.68 percent were females and 0.74 percent were children. As compared to previous survey, the number of non-agricultural labourers, at all-India level, increased marginally by 1.59 percent. The increasing trend was also observed in male and female labourers by 5.00 percent and 9.27 percent respectively.

STATEMENT 2.1 (1)

STATE-WISE ESTIMATED NUMBER OF RURAL HOUSEHOLDS BY
HOUSEHOLD TYPES
