P R E F A C E

The Rural Labour Enquiry which covers various facets of Rural Labour Households is being conducted since 1963-65. The enquiry was, however, integrated with the National Sample Survey (NSS) with effect from 1977-78 Round of NSS and since then it is being undertaken quinquennially on regular basis along with the General Employment & Unemployment and the Household Consumer Expenditure Surveys of the National Sample Survey Office (NSSO). The latest enquiry was conducted during 66th Round (2009-10) of the NSS. The main objective of the Enquiry is to provide upto-date serial data on socio-economic characteristics of Rural Labour Households to the policy makers/stakeholders for formulating/reviewing policies and also to the researchers for undertaking research, which leads to welfare of rural labour households. With this objective, the data collected under each of the quinquennial surveys conducted by the NSSO is processed and analysed by Labour Bureau in the form of five different Reports viz., (i) General Characteristics of Rural Labour Households; (ii) Wages & Earnings; (iii) Consumption Expenditure; (iv) Indebtedness; and (v) Employment & Unemployment of Rural Labour Households.

The present report on Indebtedness among Rural Labour Households is third in the series of five reports pertaining to 66th NSS Round and intends to display the incidence and magnitude of Indebtedness among Rural Labour Households in the country. This report provides insight into varied dimensions of rural labourer's indebtedness like nature & purpose of debt, source and distribution of indebtedness of various classes of rural households which constitute critical inputs for formulation of policies & programme at grassroots level for rural labour households. I am confident that this report will be very useful to all the policy makers/ researchers for framing policies with regard to adequate and cheaper credit to the disadvantaged sections of the society.

I convey my sincere thanks to Field Operation Division (FOD), Survey Design & Research Division (SDRD) and Data Processing Division (DPD) of National Sample Survey Office (NSSO) for collecting and tabulating the data collected under quinquennial round. I place on record my appreciation for the officials of Rural Labour Enquiry Division of Labour Bureau [Annexure – IV] for their sincere efforts in analyzing/interpreting the data and preparing this report in a timely manner.

I look forward to the suggestions/comments of all users of this publication which would help us in adding value to this report further.

KEY FINDINGS OF THE RURAL LABOUR ENQUIRY REPORT ON INDEBTEDNESS AMONG RURAL LABOUR HOUSEHOLDS (2009-2010)

The report on Indebtedness among the Rural Labour Households (RLHs) being released by the Labour Bureau is third in the series of five reports. The present report inter-alia displays the magnitude and incidence of indebtedness among the RLHs on the basis of the results of the data collected during NSS 66th Round Survey (July, 2009 to June, 2010). The key findings are placed below:

- There were 65.7 million rural labour households (RLHs) and 41.7 million agricultural labour households (ALHs) constituting 40.4 percent and 25.6 percent respectively of the total no. of estimated rural households (162.8 million) during 2009-10 in the country.
- A significant proportion of the rural labour households belonged to the deprived classes i.e. the scheduled castes (32.4 percent), the scheduled tribes (12.5 percent) and other backward classes (39.0 percent).
- The average size of the rural labour households showed a marginal decrease to 4.4 persons during 2009-2010 from 4.6 in 2004-05.
- The incidence of indebtedness among all rural labour households, which is defined as the percentage of indebted households to total rural labour households, has decreased from 47.3 percent in 2004-05 to 34.0 percent in 2009-2010.
- At all India level, the scheduled caste rural labour households showed the higher incidence of indebtedness of 34.6 percent as compared to 33.7 percent OBC rural labour households and 27.5 percent in scheduled tribe rural labour households. Among the states, the incidence of indebtedness in rural labour households was highest in the State of Nagaland (78.8 percent) and the lowest in Goa (2.2 percent) for all classes of households.
- The average debt per indebted rural labour household of Rs.16,265 in 2009-2010 recorded an increase of 58.5 percent over the level of debt of Rs.10,259 in 2004-05.
- The rural labour households of class scheduled caste and the scheduled tribe reported a lower extent of indebtedness (i.e. average debt per indebted households) of Rs.13,671 and Rs.6,547 respectively, against the other backward class rural labour households where the extent of indebtedness was at Rs.19,912 during 2009-2010.
- At the all India level, an analysis of total outstanding loan by its nature brings out that a very small proportion of 3 per cent of total debt was inherited against substantially higher proportion of 97 per cent of total debt was contracted. This similar trend was also reflected among all the social classes of the society.

- A considerable proportion of the total debt raised by the rural labour households was observed to be taken for unproductive purposes such as household consumption (51.0 percent), repayment of debt (2.1 percent) and other purposes (5.0 percent). On the other hand, the debt for productive purposes and purchase of land & construction of building constituted only 41.9 percent of the total debt.
- As in the earlier rounds, professional money lenders still remained the prime source of debt (33.0 percent) followed by the banks (21.4 percent). Other sources such as co-operative societies (13.6 percent), shopkeepers (4.0 percent) and friends & relatives (16.4 percent) also played a significant role in lending the credit to the rural labour households.
- It has also been noticed that average amount of debt per indebted household is directly related to the expenditure level of the rural labour households, which refutes the general presumption that the indebtedness is higher among the poor rural labour households.
- The incidence of indebtedness among all classes of rural labour households in the lowest decile class (0–10%) of monthly per capita expenditure (MPCE) was 32.4 percent which is lower than that average incidence of 34.0 percent at all-India level. The incidence of indebtedness in the highest decile class (90–100%) of monthly per capita expenditure was 29.0 percent.
- A higher magnitude of indebtedness (average debt per indebted households) was observed amongst the households with higher per capita expenditure. It was Rs.9,644 for the lowest decile class of MPCE as compared to Rs.34,831 for the highest decile class of MPCE at all-India level for RLHs.

Note: It may be noted that for collection of information on occupation of the workers and the principal household occupation, 3-digit code of NCO-2004 was used in NSS 66th round as against NCO-1968 used in earlier rounds. Hence the results may not be strictly comparable as the concordance between 3-digit code of NCO-2004 and NCO-1968 was not possible.

CHAPTER - I

SCOPE AND METHOD OF ENQUIRY

1. Introduction

1.1 In India about two-third of the total labour force lives in the rural areas. Wage paid employment being the main source of their livelihood it has always been the main thrust of the Government of India to alleviate poverty, especially in the rural areas, by formulating and implementing various target result oriented poverty alleviation and development programmes. It was however felt that for formulating suitable and appropriate policies and action programmes, as well as for reviewing such policies/ programmes, the availability of sound data base is extremely important. Recognising the need for sound data base, the Government of India conducted first Agricultural Labour Enquiry (ALE) in the year 1950-51, followed by the second Enquiry in the year 1956-57. The scope of the subsequent enquiries was however widened and enlarged with intent to cover all rural labour households, instead of restricting these to agricultural labour households alone covered in the first two enquiries. Hence, the third enquiry in the series with the changed nomenclature, namely, the 'First Rural Labour Enquiry (RLE)' was conducted in the year 1963-65 followed by the second in 1974-75, the third in 1977-78, the fourth in 1983, the fifth in 1987-88, the sixth in 1993-94, the seventh in 1999-2000 and the eighth in 2004-05. The latest enquiry, which is ninth in the series, was conducted during 66th round (2009-10) of the NSS. With a view to narrow down the gap between the successive rounds of the Enquiries, the RLE was integrated with the General Employment & Unemployment Survey of the NSSO in the year 1977-78. All subsequent enquiries are now being conducted quinquennially to provide distinct and continuous data in the form of a time series on various parameters.

1.2 During the course of the Rural Labour Enquiries, data on various socio-economic facets viz, Employment & Unemployment; Consumption Expenditure; Wages & Earnings; and Indebtedness of rural and agricultural labourer households are collected. The job of collection of data for the earmarked survey was entrusted to the Field Operation Division (FOD) of the National Sample Survey Office (NSSO) through its network of zonal, regional and sub-regional offices located all over the Country. Under these enquiries, data are collected and analysed for rural labour as a whole. However, in order to have comparison with the previous rounds of enquiries and also to understand problems of this segment of labour force, which constitutes significant proportion of the rural labour, the analysis for agricultural labour are however, presented separately. The Labour Bureau is responsible for processing and dissemination of data, collected under RLE. The results of the latest Rural Labour Enquiry, the ninth in the series, for which the field work was undertaken by the NSSO (FOD) during its 66th Round Survey (July, 2009 to June, 2010), are being published in the form of the following five reports :-

- i) General Characteristics of Rural Labour Households;
- ii) Consumption Expenditure of Rural Labour Households;
- iii) Indebtedness among Rural Labour Households;
- iv) Wages and Earnings of Rural Labour Households; and
- v) Employment and Unemployment of Rural Labour Households.

The usefulness of the data brought up by the various Rural Labour Enquiries has been acknowledged by various Committees and Commissions constituted by the Government from time to time. The National Commission on Labour (1969) and the National Commission on Rural Labour (1991) have recommended that the periodic surveys undertaken by the Government to understand the rural situation should be continued and intensified. The second National Commission on Labour (1999) has also recommended that the Rural Labour Enquiries should be conducted more frequently.

2. Objectives

2.1 *The main objectives of the enquiry are:*

- i) To provide up-to-date serial data on demographic structure, extent and status of employment & unemployment, wages and earnings, household consumption expenditure, indebtedness, etc. for building up of reliable estimates of important socio-economic characteristics of rural labour in general and agricultural labour in particular.
- ii) To provide data relating to consumption expenditure for derivation of weighting diagrams for updating the series of CPI numbers for agricultural and rural labourers.

3. Scope

The Rural Labour Enquiry relates to all rural labour households. However, provision has been made in the tabulation plan to get separate estimates for agricultural labour households and rural labour households.

4. Geographical Coverage

The survey covered the whole of the Indian Union except (i) interior villages of Nagaland situated beyond five kilometres of the bus route and (ii) villages in Andaman and Nicobar Islands which remained inaccessible throughout the year. However, all the sample first stage units of both rural and urban areas of Leh, Kargil and Poonch districts of Jammu & Kashmir became casualty and therefore these districts were outside the survey coverage.

5. Concepts and Definitions

The important concepts and definitions adopted for the survey are as follows:-

(i) *Household*

A group of persons who normally live together and take food from a common kitchen constitute a household. The adverb “normally” means that temporary visitors and guests (whose total period of stay in the household is expected to be less than 6 months) are excluded but temporary stay-aways (whose total period of absence from the household is expected to be less than 6 months) are included. Thus a child residing in a hostel for studies is excluded from the household of his/her parents, but a resident domestic servant or paying guest (but not just a tenant in the house) is included in the employer’s/host’s household. “Living together” is given more importance than “sharing food from a common kitchen” in drawing the boundaries of a household in case the two criteria are in conflict. However, in

the special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to shortage of space, the household formed by such a person's family members is taken to include the person also. Each inmate of a hotel, mess, boarding-lodging house, hostel, etc., is considered to be a single-member household except that a family living in a hotel (say) is considered one household only. The same principle is applicable for the residential staff of such establishments. The size of a household is the total number of persons in the household.

(ii) Rural Labour Household

A household is classified as a rural labour household if its major source of income during the last 365 days preceding the survey is more from wage paid manual labour (agricultural and/or non-agricultural) than either from paid non-manual employment or from self-employment. Rural labour households include agricultural labour households as well.

(iii) Agricultural Labour Household

Of the households which are initially classified as 'Rural Labour Households', those deriving 50 percent or more of their total income from wage paid manual labour in agricultural activities are treated as agricultural labour households.

(iv) Rural Labour Households with Cultivated Land

A household having cultivated land, either 'owned', 'land leased-in' or 'land neither owned nor leased-in', is treated as household with cultivated land. Land cultivated (including orchard and plantation) during the agricultural year 2008-2009, i.e., July 2008 to June 2009 was recorded. Cultivated land is taken to mean the net area sown during the last calendar year (i.e. July to June) preceding the year of enquiry and included orchards and current fallows. Area with field crops and area under orchards and plantations is counted only once in the same year/ season.

(v) Land Possessed

The area of land possessed includes land 'owned', 'leased in' and 'land neither owned nor leased in' (i.e. encroached) by the household but excluded land 'leased out'. In collecting information regarding land possessed, the actual position as obtained on the date of survey is considered. The 'area of land possessed' does not include the area of land owned, leased-in, etc. by the servants/paying guests who are considered as normal members of the household, as per the definition of household taken up for the survey.

(vi) Manual Work

A job essentially involving physical labour is considered manual work. However, jobs essentially involving physical labour but also requiring a certain level of general, professional, scientific or technical education are not termed as 'manual work'. On the other hand, jobs not involving much of physical labour and at the same time not requiring much educational (general, scientific, technical or otherwise) background are treated as 'manual work'. Thus, engineers, doctors, dentists, midwives, etc., are not considered manual workers even though their jobs involved some amount of physical labour. But, peons, chowkidars, watchman, etc. are considered manual workers even though their work might not involve much physical labour. A few examples of manual workers are cooks, waiters, building caretakers, sweepers, cleaners and related workers, launderers, dry cleaners and pressers,

hair dressers, barbers, beauticians, watchmen, gate keepers, agricultural labourers, plantation labourers and related workers.

(vii) *Wage Paid Manual Labour*

A person who does manual work in return for wages in cash or kind or partly in cash and partly in kind (excluding exchange labour) is considered as a wage paid manual labour. Salaries are also considered as wages. A person who is self-employed in manual work is not treated as a wage paid manual labour.

(viii) *Rural Labour*

Manual labour working in agricultural and /or non-agricultural occupations in return for wages paid either in cash or in kind (excluding exchange labour) and living in rural areas, is taken as rural labour.

(ix) *Agricultural Labour*

A person is considered as agricultural labour, in case he/she follows one or more of the following agricultural occupations in the capacity of a wage paid manual labour, whether paid in cash or kind or both:

- a) farming,
- b) dairy farming,
- c) production of any horticultural commodity,
- d) raising of livestock, bees or poultry,
- e) any practice performed on a farm as incidental to or in conjunction with farm operations (including forestry and timbering) and the preparation for market and delivery to storage or to market or to carriage for transportation to market of farm produce.

Working in fisheries is excluded from agricultural labour. Further, 'carriage for transportation' refers only to the first stage of transport action i.e. from farm to the first place of disposal.

(x) *Wage and Salary Earnings*

Information on wage and salary earnings are collected separately for each of the wage/salaried work recorded for a person in a day. Here, earnings refer to the wage/salary income (and not total earnings taking into consideration of all other activities done) received/receivable for the wage/salaried work done during the reference week by a wage/salaried employee and casual labourer. The wage/ salary received or receivable may be in cash or kind or partly in cash and partly in kind. While recording the earnings following conventions are followed.

- a) The wages in kind are evaluated at the current retail price.
- b) Bonus and perquisites such as free accommodation, reimbursement of expenditure for medical treatment, free telephones, etc. evaluated at the cost of the employer or at retail prices and duly apportioned for the reference week are also included in earnings.

- c) Amount receivable as 'over-time' for the additional work done beyond normal working time is excluded.

It may be noted that in the survey, at most two activities are recorded for a person in a day. Therefore, it is possible that a person might have carried out two or more wage/salaried activities in a day, but either one activity or two activities at the most, depending upon the time spent on those activities, are recorded. In such cases, the wage/salary income only from recorded activity(ies) is collected and recorded separately, and not the total income of the person from all the activities done during the entire day.

(xi) *Economic Activity*

The entire spectrum of human activity falls into two categories – economic activities and non-economic activities. Any activity resulting in production of goods and services that add value to national product is considered as an economic activity for the employment and unemployment survey. Such activities include production of all goods and services for market (i.e. for pay or profit) including those of government services, and, the production of primary commodities for own consumption and own account production of fixed assets.

(xii) *Usual Occupation*

The usual occupation of a person is the economic activity which he may be pursuing during the major part of the 365 days preceding the date of the survey.

(xiii) *Activity Status*

It is the activity situation in which a person is found participating in economic and non-economic activities during the reference period. According to this, a person could be in one or a combination of the following three broad activity statuses during a reference period:

- a) working or being engaged in economic activity (work) as defined above,
- b) being not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work' if 'work' is available and
- c) being not engaged in any economic activity (work) and also not available for 'work'.

Broad activity statuses mentioned in (a) and (b) above are associated with 'being in labour force' and the last with 'not being in the labour force'. Within the labour force, broad activity status (a) and (b) are associated with 'employment' and 'unemployment', respectively.

(xiv) *Workers (or Employed)*

Persons who are engaged in any economic activity or who, despite their attachment to economic activity, abstain themselves from work for reason of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work, constitute workers. Unpaid helpers who assist in the operation of an economic activity in the household farm or non-farm activities are also considered as workers.

(xv) *Seeking or Available for Work (or Unemployed)*

Persons who, owing to lack of work, are not working but either seek work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing conditions of work and remuneration, are considered as those 'seeking or available for work' (or unemployed).

(xvi) *Labour Force*

Persons who are either 'working' (or employed) or 'seeking or available for work' (or unemployed) constitute the labour force. Persons who are neither 'working' nor 'seeking or available for work' for various reasons during the reference period are considered as 'not in labour force'. Persons under this category are students, those engaged in domestic duties, rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young persons, prostitutes, etc. and casual labourers not working due to sickness.

(xvii) *Self-Employed*

Persons who operate their own farm or non-farm enterprises or are engaged independently in a profession or trade on own-account or with one or a few partners are treated as self-employed in household enterprises. The essential feature of the self-employed is that they have autonomy (decide how, where and when to produce) and economic independence (in respect of choice of market, scale of operation and finance) for carrying out their operation. The remuneration of the self-employed consists of a non-separable combination of two parts: a reward for their labour and profit of their enterprise. The combined remuneration is wholly determined by the revenue from sales after netting out value of purchased inputs used in production. Self-employed persons are further categorised as follows:

- a) **Own-account workers:** those self-employed persons who operate their enterprises on their own account or with one or a few partners and who, during the reference period, by and large, run their enterprise without hiring any labour. They could, however, have had unpaid helpers to assist them in the activity of the enterprise;
- b) **Employers:** those self-employed persons who work on their own account or with one or a few partners and, who, by and large, ran their enterprise by hiring labour; and
- c) **Helpers in household enterprise:** those self-employed persons (mostly family members) who are engaged in their household enterprises, working full or part time and do not receive any regular salary or wages in return for the work performed. They do not run the household enterprise on their own but assist the related person living in the same household in running the household enterprise.

(xviii) *Regular Salaried/Wage Employees*

These are persons who work in others' farm or non-farm enterprises (both household and non-household) and, in return, receive salary or wages on a regular basis (i.e. not on the basis of daily or periodic renewal of work contract). This category includes not only persons

getting time wage but also persons receiving piece wage or salary and paid apprentices, both full time and part-time.

(xix) Casual Labour

A person casually engaged in other's farm or non-farm enterprises (both household and non household) and getting in return wage according to the terms of the daily or periodic work contract is a 'casual wage labourer'. Depending on whether they are so employed in 'public works' sponsored by government agencies or local bodies or in other types of work, the casual workers are classified into two groups viz. casual labour in public works and casual workers in other types of work.

(xx) Children

Persons below 15 years of age are treated as children.

(xxi) Monthly Per Capita Expenditure (MPCE)

The NSS concept of MPCE is defined first at the household level (household monthly consumer expenditure ÷ household size). This measure serves as the indicator of the household's level of living. Next, each individual's MPCE is defined as the MPCE of the household to which the person (man, woman or child) belongs. This assigns to each person a number representing his or her level of living. The distribution of persons by their MPCE (i.e., their household MPCE) can then be built up, giving a picture of the population classified by economic level.

(xxii) Deciles and Decile Classes of MPCE

The first decile of the distribution of MPCE over the population of any region or domain is the level of MPCE below which 10% of the population lie, the second decile, the level below which 20% of the population lie, and so on. Thus the population can be divided into 10 'decile classes of MPCE' as follows: those with MPCE below the 1st decile of the MPCE distribution (the bottom 10% of the population ranked by MPCE), from the 1st decile to the 2nd decile (the next 10%), from the 2nd decile to the 3rd decile (the next 10%), and so on. Averages of other variables of interest, computed separately for the 10 decile classes, help to portray the variation of such variables with variation in MPCE. In line with usual NSS practice, decile classes of MPCE are formed separately for the rural and the urban sector, both for India as a whole and for the States.

(xxiii) Major States

This refers to the 17 States of India which had a population of 20 million or more according to the Census of 2001. The States are: Andhra Pradesh, Assam, Bihar, Chhattisgarh, Gujarat, Haryana, Jharkhand, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Odisha, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal. Together, these States accounted for nearly 94.7% of India's population in 2001.

(xxiv) Liabilities

All claims against a household held by others are considered as the liabilities of the household. Thus, all loans and dues payable by the household to others, irrespective of whether they are cash loans or kind loans, are deemed as liabilities of the household. It includes dues of households arising out of 'trader's credit', viz., credit offered by a trader in

anticipation that the borrower – cultivator will sell his crops to him. Dues payable on account of unpaid bills of grocers, doctors, lawyers, etc. also constitute liabilities of the household.

Cash Loans; All loans taken in cash are considered as cash loans payable, irrespective of whether those loans are repaid or proposed to be repaid in cash or in kind. Interest-free loans taken from relatives and friends for a short period are also considered as cash loans. Dues payable by the household owing to the purchase of goods under hire-purchase scheme are treated as cash loans.

Kind Loans; All loans taken in kind irrespective of whether those are already repaid or yet to be repaid in cash or in kind are considered as kind loans. Cases of hire-purchase are, however, excluded. Borrowings in kind are evaluated at the retail prices current in the local market.

(xxiv) Indebtedness

Indebtedness is a measure of the amount of debt incurred against various loans with reference to a period or point of time.

Household Indebtedness; A household is considered to be indebted if it has some debt outstanding against any loan incurred by it as on the date of reference. Loans include borrowings in cash and / or kind as well as credit purchase evaluated at retail prices current in the local market.

Nature/Type of Loan; There are four categories of 'Nature of loan', namely, (i) hereditary loan, (ii) loan contracted in cash, (iii) loan contracted in kind, and (iv) loan contracted partly in cash and partly in kind.

Source of Loan/Credit Agency; The agency from which the loan has been contracted. Eight types of sources have been specified, namely, (i) government, (ii) co-operative society, (iii) bank, (iv) employer, (v) money lender, (vi) relatives and friends, (vii) shopkeeper, and (viii) others.

Purpose of Loan; Purpose of taking a loan by a household is defined as the occasion in connection with which it becomes necessary for a household to contract a loan. Even if the loan amount is utilized for a purpose other than that for which it has been taken, the original purpose of borrowing is considered. If a particular loan is taken to meet more than one purpose, the purpose for which the largest part of the loan is originally intended to be spent is considered. The categories of purpose of loan have been different for different enquiries and also for different rounds.

6. Period of the Survey

The enquiry was integrated with the 66th Round of the N.S.S. during the period 1st July, 2009 to 30th June, 2010, which was divided into 4 sub-rounds each of three months duration.

7. Sampling Design and Sample Size

7.1 Outline of the sampling design: A stratified multi-stage design was adopted for the 66th round survey. The first stage units (FSU) were the 2001 census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. The ultimate stage units (USU) were households in both the sectors. Hamlet-groups/sub-blocks constituted the intermediate stage whenever these were formed in the sample FSUs.

7.2 Sampling Frame for First Stage Units: For the rural sector, the list of 2001 census villages (Panchayat wards in case of Kerala) constituted the sampling frame. For the urban sector, the list of latest available Urban Frame Survey (UFS) blocks constituted the sampling frame.

7.3 Stratification: Within each district of a State/ UT, two basic strata were formed as follows: i) rural stratum comprising of all rural areas of the district and (ii) urban stratum comprising of all the urban areas of the district. However, within the urban areas of a district, if there were one or more towns with population 10 lakhs or more as per population census 2001, each of them formed a separate basic stratum and the remaining urban areas of the district were considered as another basic stratum.

7.4 Sub-stratification: There was no sub-stratification in the urban sector. However, to net adequate number of child workers, for all rural strata, each stratum was divided into 2 sub-strata as follows:

sub-stratum 1: all villages with proportion of child workers (p) $> 2P$ (where P is the average proportion of child workers for the state/ UT as per Census 2001)

sub-stratum 2: remaining villages

7.5 Total sample size (FSUs): At the all-India level, a total number of 12784 FSUs were allocated for survey in the central sample. In addition, 24 State sample FSUs (16 for rural sector and 8 for urban sector) of Leh and Kargil districts of J & K were included in the central sample.

7.6 Allocation of total sample to States and UTs: The total number of sample FSUs was allocated to the States and UTs in proportion to population as per census 2001 subject to the availability of investigators and ensuring minimum sample allocation to each State/ UT.

7.7 Allocation of State/UT level sample to rural and urban sectors: The State/ UT level sample size was allocated between two sectors in proportion to population as per census 2001 with double weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu, etc. did not exceed the rural sample size. A minimum of 16 FSUs (to the extent possible) was allocated to each state/ UT separately for rural and urban areas. Further the State level allocations for both rural and urban areas were adjusted marginally in a few cases to ensure that each stratum/ sub-stratum got a minimum allocation of 4 FSUs.

7.8 Allocation to strata: Within each sector of a State/ UT, the respective sample size was allocated to the different strata/ sub-strata in proportion to the population as per census 2001. Allocations at stratum/ sub-stratum level were adjusted to multiples of 4 with a minimum sample size of 4 and equal number of samples was allocated among the four sub rounds.

7.9 Selection of FSUs: For the rural sector, from each stratum/ sub-stratum, required number of sample villages were selected by probability proportional to size with replacement (PPSWR), size being the population of the village as per Census 2001. For urban sector, from each stratum FSUs were selected by using Simple Random Sampling Without Replacement (SRSWOR). Both rural and urban samples were drawn in the form of two independent sub-samples.

7.10 Selection of hamlet-groups/sub-blocks: Selected FSUs with approximate population 1200 or more were divided into a suitable number (say, D) of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector as stated below.

approximate present population of the sample FSU	no. of hgs/sbs to be formed (D)
less than 1200 (no hamlet-groups/sub-blocks)	1
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
.....and so on	

For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except four districts Dehradun (Plains), Nainital (Plains), Hardwar and Udham Singh Nagar), Poonch, Rajouri, Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups were formed as follows:

approximate present population of the sample village	no. of hgs to be formed
less than 600 (no hamlet-groups)	1
600 to 899	3
900 to 1199	4
1200 to 1499	5
.....and so on	

Hamlet-groups/ sub-blocks were formed in the sample FSU by more or less equalising populations. Two hamlet-groups (hg)/ sub-blocks (sb) were selected from a large FSU, wherever hamlet-groups/ sub-blocks were formed. This was done in the following manner – one hg/ sb with maximum percentage share of population was always selected and termed as hg/ sb 1; one more hg/ sb was selected from the remaining hg's/ sb's by simple random sampling (SRS) and termed as hg/ sb 2. Listing and selection of the households was done independently in the two selected hamlet-groups/ sub-blocks. The FSUs without hg/ sb formation were treated as sample hg/ sb number 1.

7.11 Sampling frame of households: All households listed in a village/UFS block where no hamlet-group/sub-block formation was done, or the households listed in the two selected hamlet-groups/sub-blocks of the village/UFS block where hamlet-group/sub-block formation was done, constituted the sampling frame of households.

7.12 Stratification of rural households: For employment and un-employment survey of NSS 66th round, all households listed in the selected FSU/hamlet group/sub-blocks were stratified into three second stage strata (SSS). The three second-stage-strata (SSS) formed in the rural areas were:

SSS	composition of SSS	no. of hhs to be surveyed	
		FSU without hg/sb formation	FSU with hg/sb formation (for each hg/sb)
SSS 1:	relatively affluent households	2	1
SSS 2:	of the remaining, households having principal earning from non- agricultural activity	4	2
SSS 3:	other households	2	1

Identification of affluent households was done by taking into account factors generally associated with affluent households such as: ownership of motor car/ jeep/ tractor/ combine-harvester/ truck/ bus/ etc.; consumer durables like DVD/ VCP/ refrigerator/ washing machine etc.; ownership of large business/ highly remunerative profession/ high salaried income etc.; ownership of spacious pucca house in good condition; ownership of 7 hectares or more of cultivable land; ownership of 3.5 hectares or more of irrigated land; ownership of a good number of cattle, buffaloes and camels (10 or more in number).

7.13 Selection of households: For employment-unemployment survey a total of 8 households were selected from each village/FSU. In both rural and urban areas, in case no hamlet-group/sub-block formation was done in the village/block, a number of 2, 4 and 2 households were selected from the second stage strata SSS1, SSS2 and SSS3, respectively. In case hamlet-groups/sub-blocks were formed in the village/block, a number of 1, 2 and 1 households were selected respectively from the second stage strata SSS1, SSS2 and SSS3 of each of the hamlet-groups/sub-blocks. The sample households from each of the second stage strata were selected by SRSWOR.

7.14 Sample Size: A total of 2,81,327 persons belonging to 59,129 households spread over 7,402 villages were surveyed at all-India level for canvassing Schedule 10 (employment-unemployment survey). The number of sample villages, households and persons surveyed in different States/Union Territories and all-India for rural sector are set out in the Table-1.

Table-1
Number of Villages Allotted & Surveyed and Rural Households/ Persons Surveyed in
Different States/UTs

Sl.No.	State/U.T.	No. of villages allotted	No. of villages surveyed	No. of Households surveyed	No. of persons
1	2.	3.	4.	5.	6.
1	Andhra Pradesh	492	491	3926	15127

All-India		7524*	7402	59129	281327

*Including 16 rural samples in the state sample of J & K included in the Central Sample.

8. Estimation Procedure

8.1 Notations:

The following notations were used in the estimation procedure of the 66th Round:

s = subscript for s^{th} stratum

t = subscript for t^{th} sub-stratum

m = subscript for sub-sample ($m = 1, 2$)

i = subscript for i^{th} FSU [village (panchayat ward) / block]

d = subscript for a hamlet-group/sub-block ($d = 1, 2$)

j = subscript for j^{th} second stage stratum in an FSU/ hg/sb ($j = 1, 2$ or 3)

k = subscript for k^{th} sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/sb's formed in the sample FSU

$D^* = 0$ if $D = 1$

$= (D - 1)$ for FSUs with $D > 1$

N = total number of FSUs in any urban sub-stratum

Z = total size of a rural stratum/sub-stratum (= sum of sizes for all the FSUs of a stratum/sub-stratum)

z = size of sample village used for selection.

n = number of sample FSUs surveyed including 'zero cases' but excluding casualty for a particular sub-sample and stratum/sub-stratum.

H = total number of households listed in a second-stage stratum of an FSU/hamlet-group or sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of an FSU/hamlet-group or sub-block of sample FSU

x, y = observed value of characteristics x, y under estimation

$\hat{X}, \hat{Y}$ = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

$y_{stmidjk}$ = observed value of the characteristic y for the k^{th} household in the j^{th} second stage stratum of the d^{th} hg/sb ($d = 1, 2$) of the i^{th} FSU belonging to the m^{th} sub-sample for the t^{th} sub-stratum of s^{th} stratum.

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

8.2 Estimation of aggregates for a particular sub-sample (m) and stratum (s) in Rural sector:

8.2.1 Sub-sample estimate for a sub-stratum:

(i) For j^{th} second stage stratum of a sub-stratum:

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \times \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

(ii) For all second-stage strata combined:

$$\hat{Y} = \sum_j \hat{Y}_j$$

8.2.2 Sub-sample estimate for a stratum:

Sub-sample estimate for a stratum will be obtained by adding sub-sample wise estimates of all the sub-strata ($\hat{Y}_{st}$) of the stratum.

$$\hat{Y}_s = \sum_t \hat{Y}_{st}$$

8.3 Overall Estimate for Aggregates:

Overall estimate for aggregates for a stratum ($\hat{Y}_s$) based on two sub-samples is obtained as:

$$\hat{Y}_s = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{sm}$$

8.4 Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate $\hat{Y}$ at the State/ UT/ all-India level is obtained by summing the stratum estimates $\hat{Y}_s$ over all strata belonging to the State/ UT/ all-India.

8.5 Estimates of Ratios:

Let $\hat{Y}$ and $\hat{X}$ be the overall estimates of the aggregates Y and X for two characteristics y and x respectively at the State/ UT/ all-India level.

Then the combined ratio estimate ($\hat{R}$) of the ratio ($R = \frac{Y}{X}$) will be obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}.$$

9. Present Report

The Report on Indebtedness among Rural Labour Households is the third report in the series of five RLE reports. The present report displays inter-alia the magnitude and incidence of indebtedness among RLHs on the basis of the data collected during NSS 66th Round (July, 2009 to June, 2010). The Report provides the details of indebtedness such as nature & source of debt, purpose and distribution of indebtedness among different social groups as well as income classes required for the formation of credit policy of financial institutions and planning for development of rural labour households. It consists of six chapters, Chapter – I relates to the scope and method of enquiry which is common to all the reports. Chapter – II to VI deal with various facts of indebtedness. A comparative picture of the main findings of nine Rural Labour Enquiries conducted till date is also given in Annexure – I.

CHAPTER II

INCIDENCE AND THE EXTENT OF INDEBTEDNESS

Introduction

In India, the rural population in general and the rural labour in particular is beset with number of socio-economic problems such as unemployment/under-employment, low incomes, illiteracy and high incidence of indebtedness. With a view to ameliorate the conditions of rural labour, periodical Agricultural/Rural Labour Enquiries have been conducted since the year 1950-51. These enquiries, inter-alia, provided information on various aspects of indebtedness. Indebtedness has been defined as the amount of outstanding debt (principal as well as interest thereon) as on the date of survey. Debt includes borrowings by a household in cash or/in kind (including hire / purchases), credit purchases and advance payments received for forward delivery of goods & services.

Incidence of Indebtedness among Rural/Agricultural Labour Households

The incidence of indebtedness among the rural and agricultural labour households measured in terms of percentage in respect of different social classes of indebted households is presented in statement 2.1(a) and 2.1(b) respectively.

(i) Rural Labour Households (RLHs)

At all-India level, the incidence of indebtedness during 2009-2010 decreased significantly in respect of all classes of Rural Labour Households as compared to the previous survey (2004-05). It has decreased from 47.30 percent in 2004-05 to 34.00 percent in 2009-2010. Similar trend is also observed in respect of households belonging to the weaker sections of the society. It decreased from 48.04 percent to 34.60 percent in case of the Scheduled Caste Households, from 46.67 percent to 33.70 percent in case of Other Backward Class Households and from 39.39 percent to 27.50 percent in case of Scheduled Tribe Households during the same period.

State wise analysis of the data reveals that all the States/UTs, except Karnataka, Arunachal Pradesh, Mizoram, Nagaland, Uttarakhand, Chandigarh, Lakshadweep and Puducherry have reflected the decreasing trend in incidence of indebtedness among all classes of Rural Labour Households. The incidence of indebtedness was, however, highest in Nagaland (78.80 percent) and the lowest was observed in Goa (2.2 percent). Andhra Pradesh, Assam, Gujarat, Karnataka, Kerala, Punjab, Tamil Nadu, West Bengal, Jammu & Kashmir, Nagaland, Sikkim, Uttarakhand, A & N Island, Chandigarh, Delhi, Lakshadweep and Puducherry reported the incidence of indebtedness higher than the national average of 34.00 percent.

Table 2.1 shows the distribution of 35 States/Union Territories by range of incidence of indebtedness among Rural Labour Households.

TABLE 2.1**States/Union Territories by Range of Incidence of Indebtedness among Rural Labour Households (2009-2010)**

Sl. No.	Range of percentage of indebted Rural Labour Households	States/Union Territories	No. of States/UTs.
1.	51 per cent and above	Andhra Pradesh, Assam, Kerala, Jammu & Kashmir, Nagaland, A & N Islands, Lakshadweep and Puducherry	8
2.	41 per cent to 50 per cent	Gujarat, Karnataka, Punjab, Tamil Nadu, West Bengal, Chandigarh and Delhi.	7
3.	31 per cent to 40 per cent	Haryana, Rajasthan, Manipur, Mizoram, Sikkim and Uttarakhand	6
4.	21 per cent to 30 per cent	Madhya Pradesh, Maharashtra, Odisha, Uttar Pradesh and Daman & Diu	5
5.	11 per cent to 20 per cent	Bihar, Chhattisgarh, Jharkhand, Arunachal Pradesh, Himachal Pradesh and Tripura.	6
6.	Less than 10 per cent	Goa, Meghalaya and D & N Haveli	3
	34.00 per cent	All India	

(ii) Agricultural Labour Households (ALHs)

Statement 2.1(b) shows the incidence of Indebtedness among the Agricultural Labour Households during 2009-2010. It also depicts a decreasing trend in the incidence of indebtedness at all-India level in respect of all social classes of Agricultural Labour Households. It decreased from 48.40 percent in 2004-05 to 36.20 percent in 2009-2010. Similar trend was also reflected in other segments of the society comprising SC, ST and Other Backward Classes. The incidence of indebtedness among the Scheduled Caste, the Scheduled Tribe and Other Backward Classes of ALHs were reported at 37.80 percent, 28.70 percent and 35.80 percent respectively.

For ALHs, the highest incidence of indebtedness was observed in Nagaland and Sikkim (100 percent) and lowest in Goa (5.60 percent). Andhra Pradesh, Assam, Gujarat, Haryana, Karnataka, Kerala, Punjab, Rajasthan, Tamil Nadu, West Bengal, Nagaland, Sikkim, Uttarakhand, A & N Islands, Daman & Diu and Puducherry reported the incidence of indebtedness higher than the all India figure of 36.20 percent.

Table 2.2 shows the distribution of all 35 States/ UT's by range of incidence of indebtedness for ALHs.

TABLE 2.2
Distribution of States/Union Territories by Range of Incidence of Indebtedness among Agricultural Labour Households (2009-2010)

Sl. No.	Range of percentage of indebted Agricultural Labour Households	States/Union Territories	No. of States/ UTs.
1.	51 per cent and above	Andhra Pradesh, Kerala, West Bengal, Nagaland, Sikkim, Uttarakhand, A & N Island, Daman & Diu and Puducherry	9
2.	41 per cent to 50 per cent	Assam, Gujarat, Haryana, Karnataka, Punjab and Rajasthan	6
3.	31 per cent to 40 per cent	Odisha and Tamil Nadu	2
4.	21 per cent to 30 per cent	Bihar, Madhya Pradesh, Maharashtra, Uttar Pradesh, Arunachal Pradesh, Himachal Pradesh, Jammu & Kashmir, Manipur and Mizoram	9
5.	11 per cent to 20 per cent	Chhattisgarh, Jharkhand and Tripura	3
6.	Less than 10 per cent	Goa and Meghalaya,	2
7	Nil or Not reported	Chandigarh, D & N Haveli, Delhi and Lakshadweep	4
	36.20 per cent	All India	

Extent of Indebtedness among Rural/Agricultural Labour Households

Statement 2.2(a) and 2.2(b) documents the extent of the average amount of debt (in Rs.) per household and also per indebted household among the rural/agricultural labour households respectively.

(i) Rural Labour Households (RLHs)

a) All Classes

At all-India level, both the average debt per household and average debt per indebted household have increased significantly to Rs.5,533 and Rs.16,265 during 2009-

2010 as compared to Rs.4,852 and Rs.10,259 respectively during 2004-05. The States/UTs of Andhra Pradesh, Haryana, Karnataka, Kerala, Punjab, Rajasthan, Tamil Nadu, Nagaland, Uttarakhand, A & N Islands, Lakshadweep and Puducherry reported average debt per household higher than the all India average of Rs.5,533. However, majority of the States/UTs reported an increase in the average debt per household during 2009-2010 as compared to 2004-05, the States/UTs of Bihar, Chhattisgarh, Jharkhand, Madhya Pradesh, Maharashtra, Uttar Pradesh, Arunachal Pradesh, Goa, Meghalaya, Mizoram, Sikkim, D & N Haveli, Daman & Diu and Puducherry reported a decline in the average debt per household. Similarly, though an increasing trend was observed with regard to average amount of debt per indebted household of all classes at all-India level, there were States/UTs like Chhattisgarh, Arunachal Pradesh, Goa, Mizoram and Puducherry which reported a decline in the average amount of debt per indebted household. The State of Kerala observed the highest average debt per household (Rs.30,420) and average debt per indebted household (Rs.54,460).

Table 2.3 given below depicts the states/UTs falling in different ranges of average amount of debt per indebted Rural Labour Household.

TABLE 2.3

Distribution of States/UTs for Extent of Indebtedness (in Rs.) among Indebted Rural Labour Households (2009-2010)

Sl. No.	Range of average amount of debt	States/Union Territories	No. of States/ Uts.
1.	Rs.20,001/- & above	Andhra Pradesh, Haryana, Kerala, Punjab, Rajasthan, Himachal Pradesh, A & N Islands and Lakshadweep	8
2.	Rs.15,001/- to Rs.20,000/-	Maharashtra, Tamil Nadu, Uttar Pradesh, Uttarakhand and Puducherry	5
3.	Rs.10,001/- to Rs.15,000/-	Karnataka, Goa, Nagaland and Tripura	4
4.	Rs.5,001/- to Rs.10,000/-	Gujarat, Madhya Pradesh, Odisha, West Bengal, Manipur and Daman & Diu	6
5.	Rs.1,001/- to Rs.5,000/-	Assam, Bihar, Chhattisgarh, Jharkhand, Jammu & Kashmir, Meghalaya, Sikkim, Chandigarh and D & N Haveli	9
6.	Rs.501/- to Rs.1,000/-	Arunachal Pradesh and Mizoram	2
7	Rs.1/- to Rs.500/-	Delhi	1
	Rs.16,265	All India	

b) Scheduled Castes (SCs)

For SC group, at all India level, the average amount of debt per household during 2009-2010 increased to Rs.4,727 from Rs.3,767 during 2004-05. The average amount of debt per household among States varied from Rs.83 in Sikkim to Rs.16,991 in Kerala. Similarly, the average amount of debt per indebted household at all-India level increased to Rs.13,671 in 2009-2010 from Rs.7,845 in 2004-05. The average amount of debt per indebted household among States/UTs ranged from Rs.454 in Delhi to Rs.33,625 in Haryana.

c) Scheduled Tribes (STs)

The average amount of debt per household at all-India level decreased from Rs.1,868 in 2004-05 to Rs.1,803 in 2009-2010. It is, however, observed that there has been a significant increase in the average amount of debt per indebted household from Rs.4,735 in 2004-05 to Rs.6,547 in 2009-2010. The average amount of debt per indebted households among States/UTs ranged from Rs.759 in Mizoram to Rs. 32,600 in Kerala.

d) Other Backward Classes (OBCs)

At all-India level the average amount of debt per household and per indebted household was reported at Rs.6,712 and Rs.19,912 respectively during 2009-2010. Andhra Pradesh, Gujarat, Haryana, Kerala, Rajasthan, Tamil Nadu, A & N Islands, Lakshadweep and Puducherry reported higher amount of debt per household than the all-India average of Rs.6,712. Among States/UTs, the highest amount of debt per household was reported by A & N Islands as Rs.60,143 and the lowest from Goa as Rs.175.

(ii) Agricultural Labour Households (ALHs)

The extent of indebtedness among the Agricultural Labour Households during 2009-10 is presented in Statement 2.2(b). The average amount of debt per ALH and per indebted ALH at all-India level stood at Rs.4,737 and Rs.13,090 for all classes of Households, Rs.4,494 and Rs.11,902 for the Scheduled Caste Households, Rs.1,581 and Rs.5,516 for the Scheduled Tribe Households and Rs.5,740 and Rs.16,046 for Other Backward Class households. The ALHs being the subset of RLHs (nearly 65 per cent of the RLHs surveyed belonged to the ALHs), a detailed analysis of extent of debt among the ALHs has not been attempted as almost similar trend between these two types of households may be observed.

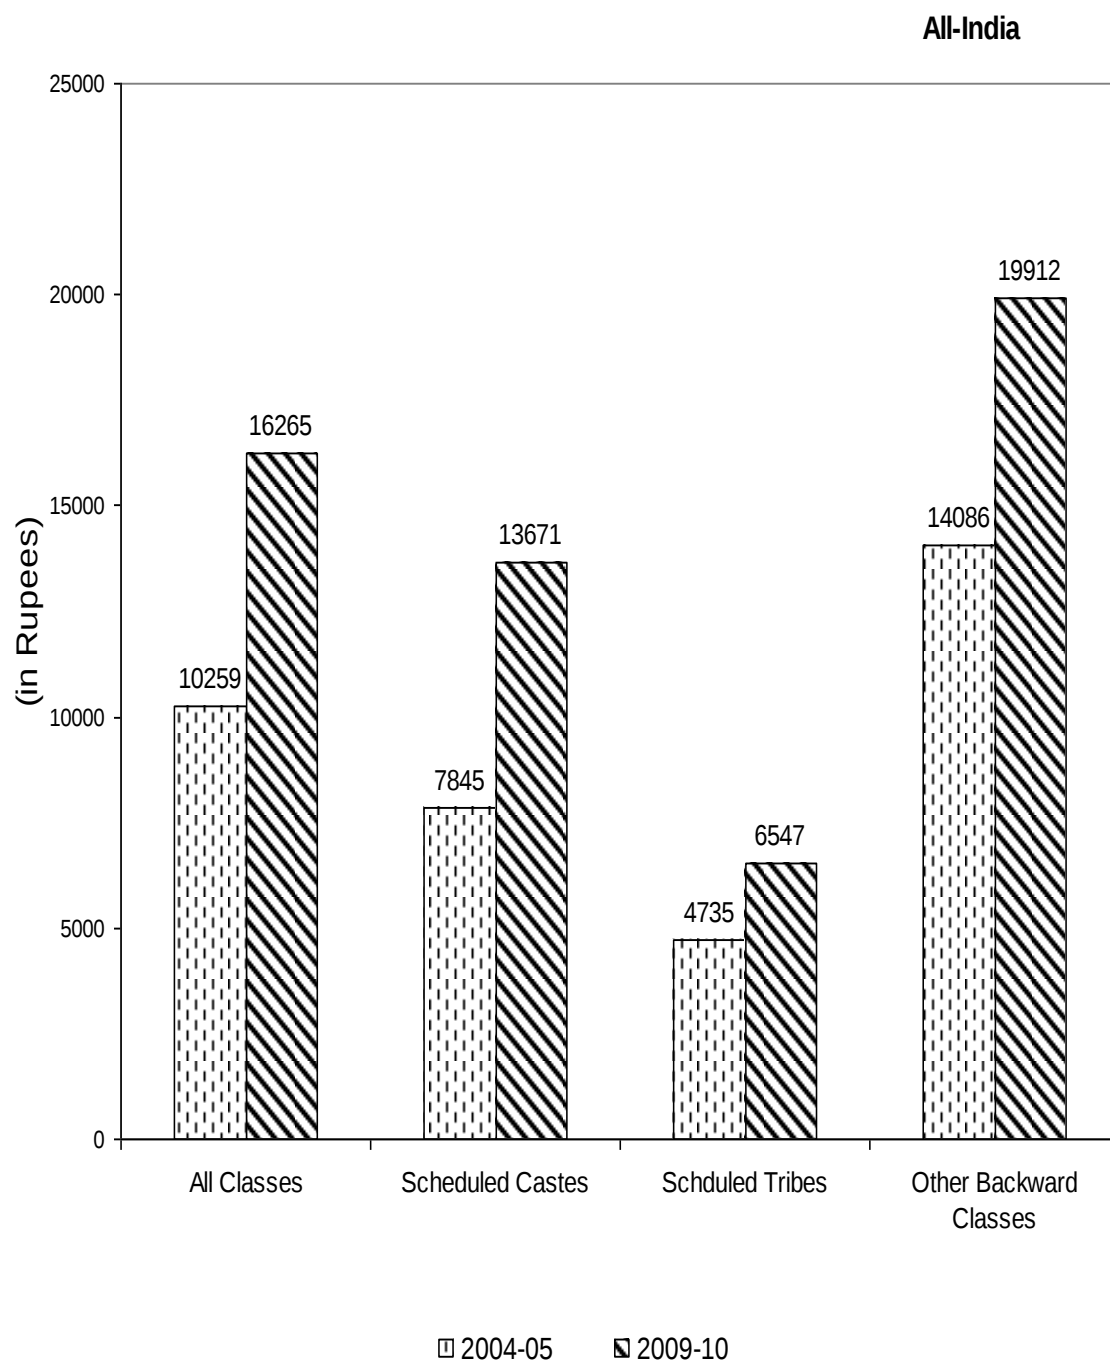

Table 2.4 given below presents the States/UTs falling in different ranges of average amount of debt per indebted Agricultural Labour Household.

TABLE 2.4**Distribution of States/UTs in Extent of Indebtedness (in Rs.) among Indebted Agricultural Labour Households (2009-2010)**

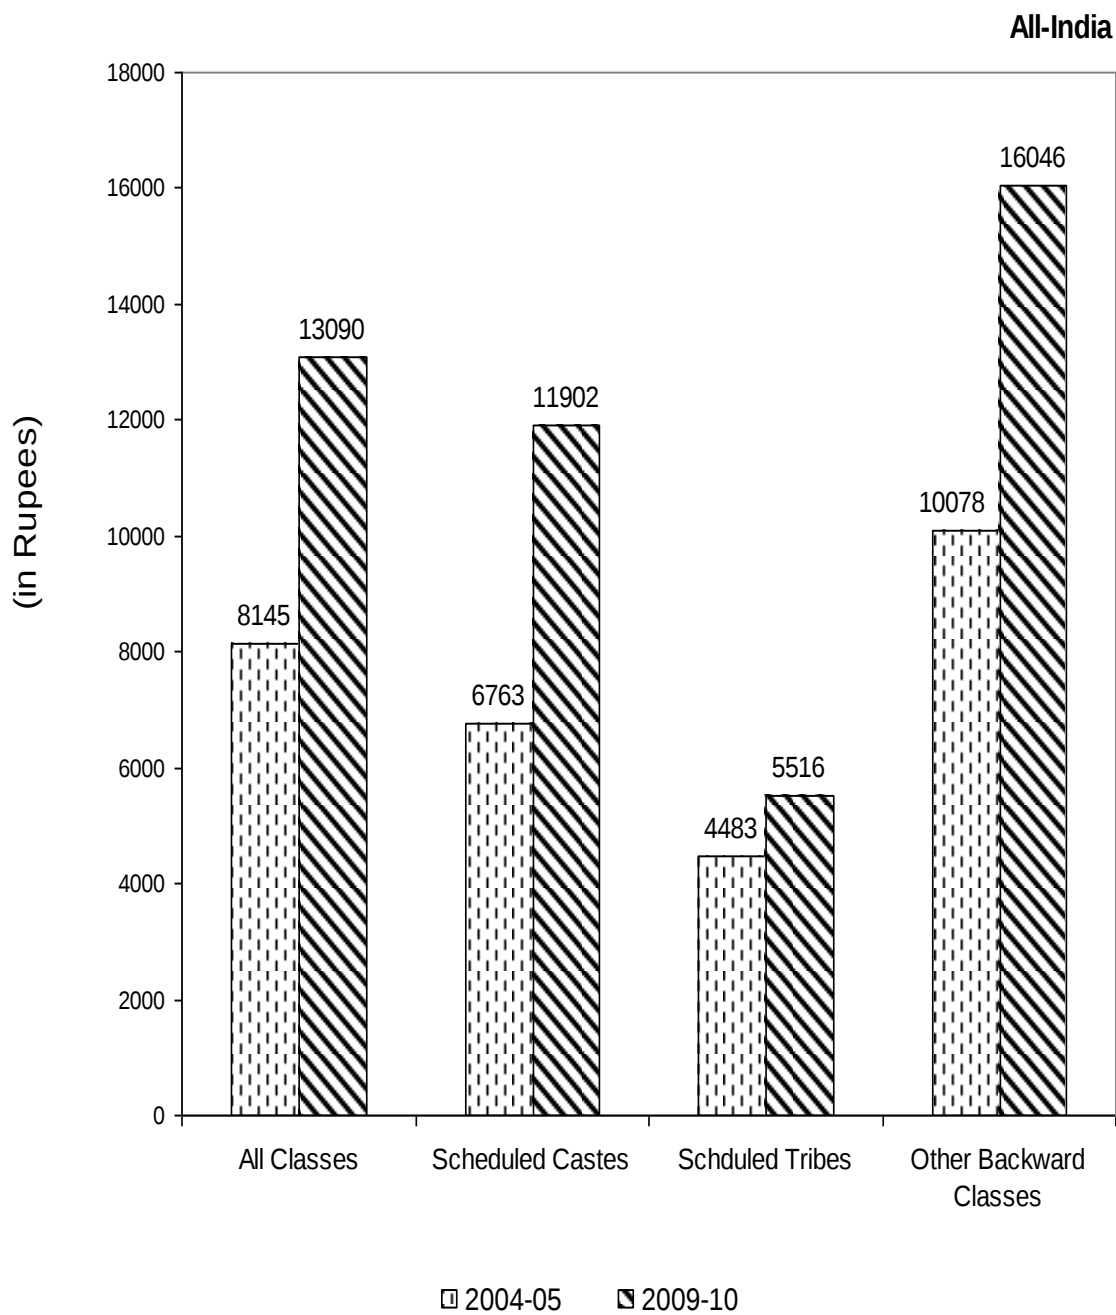

Sl. No.	Range of average amount of debt	States/Union Territories	No. of States/UTs.
1.	Rs.20,001/- & above	Haryana, Kerala, Punjab, Rajasthan, Uttarakhand and A & N Islands	6
2.	Rs.15,001/- to Rs.20,000/-	Andhra Pradesh, Maharashtra, Uttar Pradesh and Himachal Pradesh	4
3.	Rs.10,001/- to Rs.15,000/-	Karnataka, Tamil Nadu, Goa and Nagaland	4
4.	Rs.5,001/- to Rs.10,000/-	Gujarat, Madhya Pradesh, Odisha, Manipur, Tripura and Puducherry	6
5.	Rs.1,001/- to Rs.5,000/-	Bihar, Chhattisgarh, Jharkhand, West Bengal, Jammu & Kashmir, Meghalaya, Sikkim and Daman & Diu	8
6.	Rs.501/- to Rs.1,000/-	Assam	1
7.	Rs.1/- to Rs.500/-	Arunachal Pradesh and Mizoram	2
8.	Nil or not reported	Chandigarh, D & N Haveli, Delhi and Lakshadweep	4
	Rs.13,090	All India	

The bar diagrams given in the succeeding pages depict, at a glance, the average amount of debt per indebted rural and agricultural labour households in the years 2004-05 and 2009-2010.

Average Debt Per Indebted Rural Labour Household During 2009-10

Average Debt Per Indebted Agricultural Labour Household During 2009-10

CHAPTER III

NATURE OF DEBT

Introduction

This chapter deals with the nature of outstanding loan raised by the Rural/Agricultural Labour Households. Debt/loan taken by these beneficiaries has been classified in two category viz; i) Hereditary, and ii) Contracted. Hereditary loan is the one which generally passed on from one generation to another. In other words, debt of this nature is not contracted or taken by the present incumbents of the household, yet the liability to payoff such loans automatically falls on the shoulder of the present members of the household. The second type of loan/debt classified as 'contracted loan' is directly contracted or raised by the present member(s) of the household. This type of loan can be raised in three ways viz; i) in cash, ii) in kind; and iii) partly in cash and partly in kind.

Nature of Outstanding Loan

(i) Rural Labour Households (RLHs)

a) All Classes

Statement 3.1 (a) reveals the average amount of debt per indebted Rural Labour Households by nature of loan. The average debt per indebted household worked out to be Rs.16,265 in 2009-2010 as compared to Rs.10,259 in 2004-05 thereby showing an increase of around 59 percent. Out of the total loan of Rs.16,265 per indebted household, the contracted loan was high of Rs.15,831 (97 per cent) against the hereditary loan of Rs.434 (3 per cent) as compared to Rs.9,955 and Rs.304 respectively during the previous survey (2004-05). The hereditary loan increased by about 43 percent (from Rs.304 to Rs.434) whereas the contracted loan increased by about 59 per cent (from Rs.9,955 to Rs.15,831) in 2009-10 as compared to 2004-05. Of the total contracted loan of Rs.15,831 in 2009-2010, about 94 per cent was in cash, 3 per cent in kind and the rest 3 per cent was partly in cash and partly in kind.

Analysis of major states reflected that the average loan per indebted household was again highest in the State of Kerala. It was reported as Rs.54,460 in 2009-2010 as compared to Rs.38,939 in 2004-05 showed an increase of about 40 percent. The second highest average loan per indebted household was registered in the State of Haryana, which was reported as Rs.39,728 in 2009-2010 as against Rs.20,247 in 2004-05 showing high increase of 96 percent. However, the average loan per indebted household, revealed a declining trend in some of States/UTs of Chhattisgarh (Rs.6,573 to Rs.4,562), Arunachal Pradesh (Rs.1,312 to Rs.619), Goa (Rs.14,542 to Rs.13,954), Mizoram (Rs.13,387 to Rs.759), and Puducherry (Rs.21,247 to Rs. 16,978).

Among all the States, the highest amount of hereditary loan per indebted household of Rs.1973 was observed in Rajasthan state however the lowest of Rs.10 was registered by Assam. Similarly, the high amount of contracted loan per indebted household of Rs.53,648 was reported by Kerala and lowest of Rs.467 was observed in Delhi.

The summary table of the percentage distribution of average debt per indebted RLH by nature of loan for 2009-2010 is presented in Table 3.1.

TABLE 3.1

Percentage Distribution of Loan of Indebted Rural Labour Households by Nature of Loan (2009-10)

b) Scheduled Caste

The average amount of debt by nature of loan among the indebted Scheduled Caste Rural Labour Households has been presented in Statement 3.1(b). At all-India level, the average loan per indebted household in 2009-2010 increased by 74.26 percent over 2004-05 (from Rs.7,845 to Rs.13,671). Out of the total loan of Rs.13,671 per indebted household, a major part of it as Rs.13,299 (97.28 percent) was of contracted loan and Rs.372 (2.72 percent) was hereditary. Although the increase was observed in both the categories of loans but the extent of increase was more in case of contracted loan (77.4 percent) than in hereditary loan (6.6 percent). Of the total contracted loan of Rs.13,299 in 2009-2010, about 91 percent was in cash, 4 per cent in kind and remaining 5 per cent was partly in cash and partly in kind. State-wise analysis revealed the highest amount of contracted loan was in the State of Haryana (Rs.31,987) and the lowest was in Delhi (Rs.454). However, in some States/UTs like Arunachal Pradesh, Goa, Meghalaya, Mizoram, Nagaland, A & N Islands, D & N Haveli, Daman & Diu and Lakshadweep no loan of contracted nature was reported. As compared to 2004-05 survey, all the States/UTs, except Gujarat, Sikkim and Puducherry reported an increase in contracted loan during 2009-2010. The similar increasing trend was also observed in case of hereditary loan for all the States/UTs except Odisha, Punjab, Tamil Nadu, Uttar Pradesh and West Bengal.

c) Scheduled Tribe

Statement 3.1(c) reflects the average amount of debt per indebted Scheduled Tribe Rural Labour Households by its nature of loan. At all-India level, the average loan per indebted household increased by 38 percent during 2009-2010 over 2004-05 (from Rs.4735 to Rs.6547). The hereditary loan during 2009-2010 increased by 436.36 percent (from Rs.110 to Rs.590), and the contracted loan by 28.80 percent (from Rs.4,625 to Rs.5,957). Of the total contracted loan of Rs.5,957, 92 percent was in cash, 6 percent was in kind and the rest 2 percent was partly in cash and partly in kind. State-wise analysis (major States) revealed that the highest amount of hereditary loan was in Tamil Nadu (Rs.4,896) and the lowest was in Jharkhand (Rs.15). In respect of contracted loan, the highest amount was reported from Kerala (Rs.32,600) and the lowest from Chhattisgarh (Rs.713). All major States during 2009-2010 reflected increase in the contracted loan except Chhattisgarh, Gujarat and Tamil Nadu.

d) Other Backward Classes

Statement 3.1(d) reveals the average amount of debt among indebted Rural Labour Households pertaining to the Other Backward Classes. At all-India level, the average loan per indebted household during 2009-2010 was reported at Rs.19,912 as compared to Rs.14,086 during 2004-05 which reflected an increase of 41.4 percent. Out of the total loan of Rs.19,912 per indebted household, a major part of it as Rs.19,477 (97.8 percent) was contracted debt and Rs.435 (2.2 percent) was hereditary loan. The contracted loan was primarily in cash (95 percent) followed by in kind (3 percent) and then partly in cash and partly in kind (2 per cent).

The highest amount of loan per indebted household among the major states was observed in the State of Kerala (Rs.58,834) followed by Haryana (Rs.56,872), Rajasthan (Rs.30,745), Andhra Pradesh (Rs.21,664) and Maharashtra (Rs.20,423). The lowest amount of loan per indebted household was, however, observed in the State of Assam (Rs.1116). In all the States/UTs, the contracted loan was higher than the hereditary loan and cash formed the major component of this loan.

(ii) Agricultural Labour Households

The nature of loan (comprising hereditary and contracted loan) and average loan per indebted household in respect of the Agricultural Labour Households is presented in Statements 3.2(a) to 3.2(d). The trend in nature of debt among these households has

revealed almost a similar picture to that of Rural Labour Households as would be seen in the given Table 3.2.

TABLE 3.2

Percentage Distribution of Indebted Agricultural Labour Households by Nature of Loan (2009-10)

CHAPTER IV

PURPOSE OF DEBT

Introduction

One of the important aspects of a loan is the purpose for which it is utilised. Generally loans are raised by the economically weak & vulnerable segment of the households to bridge the gap between income and expenditure. The repayment of loan by a borrower depends mainly upon the purpose for which the loan is obtained. Loans raised and utilised for productive purposes results in accelerating the economic activity of the borrower and also generating an additional income thereby enhancing the repaying capacity of the borrower to a considerable extent. On the contrary, the loans taken for non-productive purposes do not generate income and ultimately convert in to a debt burden. The unproductive form of debt obviously perpetuates the miseries of a significant proportion of the Agricultural and Rural Labour Households.

Productive loans are utilised for varied productive purposes such as buying or improvement of land, purchase of improved hybrid seeds, fertilisers, agricultural implements, digging of wells, construction of minor canals for irrigation, fencing of land, banking of fields or for setting up of small business like dairy farming, rearing of livestock, development of horticulture, poultry farming, bee-keeping, basket or rope making, etc. Non-productive loans are those which are raised generally to fulfil household consumption needs, performance of religious and social functions like births and deaths, meeting the other obligations like litigation or settling the disputes, buying of jewellery, etc. Therefore, this chapter exclusively deals with the distribution of debt in respect of different purposes.

Purpose of Debt

(i) Rural Labour Households (RLHs)

a) All Classes RLHs

Statement 4.1(a)1 presents distribution of debt for different purposes among all social classes of the Rural Labour Households during 2009-2010 survey. The purpose of debt has been classified as below.

- i) Household consumption (including medical, educational, legal, marriage and other ceremonial expenses)
- ii) Purchase of land and construction of building;
- iii) Other Productive purpose
- iv) Repayment of debt and
- v) Other purposes.

At all-India level, out of the average debt of Rs. 16,265 per indebted rural labour household, a major proportion was accounted for the loan raised for household consumption (Rs.8,292 or 51 percent of total debt) followed by 'purchase of land and construction of building' (28 per cent of total debt). The amount of loan for the purpose of household consumption among the States/UTs was the highest in Haryana (Rs.29,546) and lowest in Delhi (Rs. 467). The amount of loan for household consumption was higher for households with cultivated land than those without cultivated land.

At all India level, the second highest amount of debt per indebted RLH w.r.t. purpose was reported for purchase of land and construction of building (Rs.4,618). At the State/UT level, the highest debt per indebted household for this purpose was reported by Kerala (Rs.23,835) and the lowest in Assam (Rs.137). The amount of debt for purchase of land and construction of building was higher in case of the households having cultivated land than those without cultivated land.

The percentage distribution of debt at all-India level among the indebted Rural Labour Households by purposes of loan, with and without cultivated land, is shown in Table 4.1 below:

TABLE 4.1

Percentage Distribution of Debt by Purpose among Indebted Rural Labour Households (2009-10)

Purpose of debt		Rural Labour Households		
		With Cultivated Land	Without Cultivated Land	All Households
(a)	Household Consumption	42.5	58.4	51.0
(b)	Purchase of land and construction of building	29.8	27.2	28.4
(c)	Productive purposes	20.4	7.4	13.5
(d)	Repayment of debt	2.1	2.0	2.1
(e)	Other purposes	5.2	5.0	5.0
	Total	100.0	100.0	100.0

It can be seen from the table given above that the highest proportion of debt for different purposes among the Rural Labour Households was for 'household consumption' (51.0 percent) followed by 'purchase of land and construction of building' (28.4 percent), 'productive purposes' (13.5 percent), 'other purposes' (5.0 percent) and 'repayment of debt' (2.1 percent). The similar trend was also observed for households with cultivated land and without cultivated land.

b) Scheduled Caste RLHs

Statement 4.1(a)2 presents the average amount of debt per indebted Scheduled Caste RLHs by purpose of debt. It reveals that out of the average loan of Rs.13,664, at all-India level, the highest proportion of debt (58.5 percent) was for 'household consumption' during 2009-2010 which is higher than the proportion of all rural labour household (51.0 percent). This problem seems to be more acute among the households without cultivated land as the borrowings for this purpose by these households was more than that of the borrowings of the households without cultivated land. Among States/UTs., the average amount of debt per indebted SC RLH raised for 'household consumption' purpose was highest in Haryana (Rs.21,795) and lowest in Sikkim (Rs.407) during 2009-2010.

The second and third important purposes of the loan among the Scheduled Caste RLHs were for 'purchase of land and construction of building' and 'productive purposes' respectively. The loan raised for these purposes accounted for about 22.4 and 12.8 percent of the total debt during 2009-2010.

c) Scheduled Tribe RLHs

Statement 4.1(a)3 presents the average amount of debt per indebted Scheduled Tribe Rural Labour Households by purpose of debt. The average debt per indebted Scheduled Tribe RLH was Rs.6,543 during 2009-2010 as compared to Rs.4,737 during 2004-05 which recorded an increase of about 38 percent. In this class of households, the highest proportion of debt (Rs.4,024) was for household consumption which accounted for 61.5 percent of the total debt during 2009-2010. The households with cultivated land raised more loan (Rs.4,337) for this purpose as compared to the households without cultivated land (Rs.3,762). Uttarakhand recorded the highest amount of average debt to the tune of Rs.23,718 among States/UTs, and Bihar recorded the lowest debt of Rs.263 for the household consumption purpose.

The second major component of the debt raised by the Scheduled Tribe RLHs was for productive purposes which accounted for about 13 percent of the total debt raised by them during 2009-2010 as against 17 percent during 2004-05. Among all the States / UTs, Kerala accounted for the highest average debt of Rs.13,947 for this purpose, while it was lowest for Chhattisgarh (Rs.22). In comparison to previous enquiry, majority of the States and UTs recorded an increase in the average amount of debt for this purpose.

The average debt raised for 'purchase of land and construction of building' purpose by the Scheduled Tribe RLHs accounted for Rs.791 which constitutes 12 percent of the total debt during 2009-2010 as compared to 13 percent for 2004-05. Goa reported the highest amount of debt (Rs.20,000) among the States / UTs, whereas Tripura reported the lowest amount of debt (Rs.8) during 2009-2010.

d) Other Backward Classes RLHs

The average amount of debt per indebted Other Backward Classes of RLHs by purpose of debt is presented in Statement 4.1(a)4. It is observed that at all-India level, the average amount of debt at Rs.19,912 raised by this class was high as compared to the other social classes of households viz. the Scheduled Caste, the Scheduled Tribe and All Classes of households at Rs.13,664, Rs.6,543 and Rs.16,262 respectively. It is also observed that the highest proportion of debt (about 50 percent) raised by this class was for 'household consumption'. The amount of debt taken for this purpose was, however, higher in case of those households who owned cultivated land (Rs.11,489) as compared to households without cultivated land (Rs.9,246). The highest amount of debt among the States/UTs for this purpose was reported in the State of Haryana (Rs.50,346) and the lowest was reported in the UT of National Capital of Delhi (Rs. 491).

The loan raised for 'purchase of land and construction of building' was the second largest purpose of debt among the Other Backward Class RLHs at all-India level, which accounted for about 29 percent (Rs.5,722) of the total debt of these households during 2009-2010. UT of Chandigarh reported the highest amount of debt (Rs.70,005) and Madhya Pradesh reported the lowest (Rs.160) on this account.

The third important purpose of the loan among the Other Backward Classes of RLHs was for productive purposes, which accounted for 14 percent (Rs.2,703) of the total debt during 2009-2010. Among States/UTs Karnataka constituted the highest amount of average debt at Rs.10,477 for this purpose and Sikkim the lowest at Rs.38.

The loan raised for repayment of debt by the Other Backward Classes Rural Labour Households during 2009-2010 was Rs.477 or 2 percent of the total debt.

(ii) Agricultural Labour Households (ALHs)

Statement 4.1(b)1 to 4.1(b)4 presents the details of average borrowings per indebted ALH for different classes of households by purpose of debt. These statements reveal that the distribution of loan by purpose is almost similar to the one observed for the RLHs.

The table 4.2 gives the percentage distribution of debt raised by indebted ALHs with cultivated land and without cultivated land for different purposes during 2009-10 at all-India level.

TABLE 4.2

Percentage Distribution of Debt by Purpose among Indebted Agricultural Labour Households (2009-2010)

Purpose of debt		Agricultural Labour Households		
		With Cultivated Land	Without Cultivated Land	All Households
(a)	Household consumption	45.8	62.4	54.4
(b)	Purchase of land and construction of building	20.0	23.1	21.6
(c)	Productive purposes	27.7	7.8	17.4
(d)	Repayment of debt	1.5	2.0	1.7
(e)	Other purposes	5.0	4.7	4.9
Total		100.0	100.0	100.0

The Pie charts (given at the end of this chapter) depict that, at all-India level, the Agricultural Labour Households in order of their purposes, borrowed 54.4 per cent for household consumption, 21.6 per cent for purchase of land and construction of building, 17.4 per cent for productive purposes, 1.7 per cent for repayment of debt and 4.9 per cent for other unspecified purposes during 2009-2010.

The order of purposes of credit in respect of all the Rural Labour Households during 2009-2010 was 51.0 per cent for household consumption purposes, 28.4 per cent for purchase of land and construction of building, 13.5 per cent for productive purposes, 2.1 per cent for repayment of debt and 5.0 per cent for other unspecified purposes

It can be seen from the charts that during 2009-2010, the debt taken for the purpose 'purchase of land and construction of building' gained priority over the 'productive purposes' for both Rural and Agricultural Labour Households when compared to the previous round of survey (2004-05).

CHAPTER V

SOURCE OF DEBT

Introduction

The early and timely access to credit has always made a perceptible impact on the economic status of rural labour households. Therefore, the source of debt from where the borrower has raised the loan is an important concern along with the nature, purpose and amount of debt. Huge debt of hereditary nature raised by households for unproductive purposes that too from non-institutional sources apparently add to absolute misery of poor borrowers as they can not afford to repay the loan because of exorbitant rates of interest charged by these non-institutional sources. At the same time, the unproductive loans fail to generate additional income to the borrower by which the loans can be paid off. Such loans only add & multiply the problems of the poor borrowers and obviously increase intensity of their indebtedness. On the contrary, the debt raised from established institutional sources such as banks and Government credit agencies are usually for productive purposes as these institutions discourage the borrowers from raising unproductive loans. Moreover, the rates of interest charged by these institutions are regulated by the Government and concessional rates are also charged from the weaker section of the society with regard to their productive loan investment. Therefore, it becomes essential to study the various sources of debt together with nature and purposes of debt in order to have a clear picture of the pattern of rural indebtedness among RLHs. The sources of debt or credit agency may be classified into two broad categories.

i) Institutional Sources:

- (a) **Banking Institutions:** The loans raised from commercial banks, co-operative societies usually for productive purposes are included in this category;
- (b) **Government Agencies:** The loans advanced by the Government under various rural development programmes;

ii) Non-Institutional or Private Sources:

The loans raised from professional money lenders, shopkeepers, employers, friends and relatives, etc. both for productive and unproductive purposes are generally considered as private loans.

Source of Debt

(i) Rural Labour Households (RLHs)

a) All Classes

Statement 5.1(a)1 depicts the average amount of debt per indebted rural labour household (All Classes) by source of debt. It reveals that most of the rural labour households prefer to raise loan from the non-institutional sources. During 2009-2010, about 63 percent of the total debt requirement of these households was met from the non-institutional sources and reflects the marginal decline of 8 percent as compared to 71 percent during 2004-05. Traditional/professional Money lenders alone provided debt to the tune of Rs.5,378 in 2009-10 which was about 33 percent of total debt as against 44 percent during 2004-05. Other two sources of debt, relatives & friends and employers together accounted for about 23 percent of the total debt at all-India level.

The institutional sources provided 37 percent of the total credit requirement of the rural labour households during 2009-2010, 8 per cent higher than in 2004-05, when the 29 percent of the total credit requirement was met through institutional sources. Among the institutional sources of debt, the banks continued to be the single largest source of debt meeting about 21 percent of the total debt requirement and shown an increase of about 5 percentage points over the previous survey (2004-05). Similarly, other institutional source 'co-operative societies' also reflected an increase in its share from 9.27 percent during 2004-05 to 13.61 percent during 2009-10. However, percentage share of credit from Government agencies slightly declined from 3.17 percent during 2004-05 to 1.58 percent during 2009-2010.

Table 5.1 gives information on main sources of debt among all classes of indebted rural labour households with and without cultivated land during 2009-2010 at all-India level.

TABLE 5.1
Percentage Distribution of Debt among Indebted Rural Labour Households by Source of Debt during 2009-2010

Sr. No.	Source of debt	Rural Labour Households		
		With cultivated land	Without cultivated land	All
1	Government	1.69	1.48	1.58
2	Co-operative Societies	19.00	8.88	13.61
3	Banks	28.04	15.59	21.41
4	Employers	4.92	8.94	7.06
5	Money lenders	27.35	38.08	33.06
6	Shop-keepers	3.01	4.90	4.01
7	Relatives/Friends	14.05	18.49	16.42
8	Other Sources	1.94	3.64	2.85
	Total	100.00	100.00	100.00

It is seen from the table that the households without cultivated land were more dependent on non-institutional sources for their credit requirements than the households with cultivated land.

The State-wise analysis reveals that the non-institutional sources of credit still dominate the rural credit scene. Among these sources, the money lenders and relatives/friends continued to be the most important sources of debt in majority of States/UTs. However, Banking institutions provided the highest proportion of debt in some of the States/UTs like Kerala (41 percent), Himachal Pradesh (45 percent), A & N Island (68 percent) and Lakshadweep (55 percent).

b) Scheduled Caste RLHs

The distribution of average amount of debt for the indebted Scheduled Caste RLHs by source of debt is presented in Statement 5.1 (a)2. This class of households also preferred to raise loan from the non-institutional sources during 2009-2010. About 78 percent of total debt requirement at all-India level was met from these non-institutional sources. Again money lenders were the most important source of debt contributing about 41 per cent of the total debt requirement of these households during 2009-2010. It reflects that money lenders are still holding their influence in the rural areas. Money lenders were the main source in the States of Andhra Pradesh (54.1 percent), Bihar (54.3 percent), Jharkhand (40.8 percent), Haryana (42.3 percent), Rajasthan (76.8 percent), Tamil Nadu (53.2

percent), Uttar Pradesh (47.7 percent), West Bengal (30.7 percent) and Puducherry (41.7 percent) where the per cent of debt from money lenders among the total debt was high.

The Scheduled Caste RLHs during 2009-2010 raised about 16 percent of total loan requirement from relatives & friends. This source was most popular in the States of Manipur (100 percent) followed by Uttarakhand (75.9 percent), Gujarat (67.3 percent), Jammu & Kashmir (64.8 percent), Jharkhand (46.1 percent), Maharashtra (37.1 percent) and Uttar Pradesh (31.2 percent). Employers provided about 11 percent of the total debt to these households. This source was prevalent in the States of Karnataka (43.9 percent), Chhattisgarh (37.0 percent) and Haryana (26.7 percent). Shopkeepers, however, accounted for about 6 percent of the total debt of Scheduled Caste RLHs during 2009-2010. Dependency on this source mainly remained significant in the States/UTs of Delhi (100 percent), Sikkim (88.7 percent), Chandigarh (67.2 percent), Jammu & Kashmir (35.2 percent), Madhya Pradesh (32.3 percent) and Gujarat (20.3 percent). During 2009-2010, the proportion of average debt at all India level taken from other sources (unspecified) constituted only 5.0 percent.

The institutional sources of credit were not much popular among the Scheduled Caste RLHs. At all-India level during 2009-2010, the loan raised from these sources worked out only 22 percent of the total debt requirement of these households. The banks contributed the highest proportion (about 14 per cent) of the total loan requirement of these households among all institutional sources and were the popular source in the States of Assam, Chhattisgarh, Kerala, Himachal Pradesh and Tripura. The co-operative societies occupied second position with 7 percentage share of total debt. The government agencies contributed only 2 percent of the total credit requirement of the Scheduled Caste RLHs. Among all the States, Maharashtra received the highest loan (38.0 percent) from the co-operative societies followed by Himachal Pradesh (27.5 percent).

c) Scheduled Tribes RLHs

The Scheduled Tribe Rural Labour Households during 2009-2010 also preferred to raise loan from the non-institutional sources. These households took about 79 percent of the debt at all-India level from non-institutional sources. Money lenders alone contributed about 32.34 percent of the total debt requirement of these RLHs. The proportion of debt raised from money lenders was maximum in the States of Uttar Pradesh (100.0 percent) followed by Uttarakhand (98.5 percent) and Bihar (93.7 percent). The source-wise comparative picture of debt in respect of all indebted RLHs is presented in Table 5.2.

TABLE 5.2

Percentage Distribution of Debt of Indebted Rural Labour Households by Source of Debt during 2009-2010

Sr. No.	Source of debt	All Classes	Scheduled Castes	Scheduled Tribes	Other Backward Classes
1	Government	1.58	1.65	0.28	1.85
2	Co-operative Societies	13.61	6.66	8.78	13.73
3	Banks	21.41	13.81	12.37	23.39
4	Employers	7.06	10.80	15.37	4.10
5	Money lenders	33.06	40.79	32.34	35.85
6	Shop-keepers	4.01	5.70	9.23	2.44
7	Relatives/Friends	16.42	15.56	19.49	16.78
8	Other Sources	2.85	5.03	2.14	1.86
	Total	100.00	100.00	100.00	100.00

The second most important source of debt among Scheduled Tribe RLHs was relatives & friends providing about 19.5 percent of the total debt at all-India level during 2009-2010.

The other important sources of debt at all India level among the Scheduled Tribe RLHs during 2009-2010 were Employers (15.4 percent), Banks (12.4 percent), Shopkeepers (9.2 percent) and Co-operative Societies (8.8 percent).

d) Other Backward Classes RLHs

Statement 5.1(a) 4 presents the average amount of debt per indebted Other Backward Classes RLHs by source of debt. The Other Backward Classes of RLHs were also raised maximum portion of their loan requirement from the non-institutional sources in line with all other classes of RLHs. Out of the total debt, about 68 percent was raised from non-institutional sources; money lenders alone contributed about 41 percent of the total debt to these households during 2009-2010. Among institutional sources, the banks and co-operative societies together contributed about 31 percent of the total debt requirement of these households. Friends and Relatives, another significant source of debt, had financed about 19 percent of the total loan at all-India level.

(ii) Agricultural Labour Households (ALHs)

Statements 5.1(b)1 to 5.1(b)4 present the average amount of debt per indebted ALH by source of debt for All classes, Scheduled Castes, Scheduled Tribes and Other Backward Classes. The general pattern and proportion of borrowing of the ALHs from various sources was more or less similar to that observed for the RLHs. This can be seen from the summary Table 5.3 given below:

TABLE 5.3
Percentage Distribution of Debt of Indebted Agricultural Labour Households
by Source of Debt during 2009-2010

Sr. No.	Source of debt	All Classes	Scheduled Castes	Scheduled Tribes	Other Backward Classes

CHAPTER VI

INDEBTEDNESS OF HOUSEHOLDS BY EXPENDITURE CLASSES

Introduction

In this chapter, efforts have been made to study the relationship between monthly per capita expenditure of households' and family size of agricultural and rural labour households vis-à-vis extent and magnitude of their indebtedness. There are many factors such as income vis-à-vis expenditure, size of households, possession of land holding and other income generating enterprises, etc. which influence the indebtedness among the rural labourers. But there is a positive correlation between the degree of indebtedness among the households and household expenditure, given the level of income. Higher the expenditure, higher will be the amount of debt, subject to other things remaining the same. The households with higher income are always able to raise loans from various available sources because of their better repaying capacity. At the same time, there is a class of destitute for whom raising a loan is a difficult task due to their low repaying capacity. In studies where cross tabulation of data by income and expenditure classes is done, the intensity of indebtedness can be explained in terms of income-expenditure gap. However, where intensity is studied only in relation to expenditure class, this kind of analysis is not possible because income and expenditure classes are mixed up. As is well known, in statistical research, expenditure is highly correlated with income and as such higher expenditure class represents higher income class also to a great extent. Thus, here expenditure classes may be taken as a proxy for income classes also. In addition, the burden of indebtedness may also increase with the increase in the size of the household. This is due to the fact that the larger households may have to meet more social obligations and liabilities with other pressing economic needs which may otherwise remain unfulfilled if loans for such purposes are not raised. The degree of indebtedness may also go up, to some extent, with an increase in per capita expenditure.

Extent of Indebtedness by Expenditure Classes

(i) Rural Labour Households (RLHs)

a) All Classes

Statement 6.1 (a) reveals the relationship between different decile classes of monthly per capita expenditure (MPCE) with percentage of indebted households, average amount of debt per indebted household and average size per indebted households. A fluctuating trend was observed between decile classes of MPCE and percentage of indebted households. Here, the first decile of the distribution of MPCE over the population of any region or domain is the level of MPCE below which 10% of the population lie, the second decile, the level below which 20% of the population lie, and so on. Thus the population can be divided into 10 'decile classes of MPCE' as follows: those with MPCE below the 1st decile of the MPCE distribution (the bottom 10% of the population ranked by MPCE), from the 1st decile to the 2nd decile (the next 10%), from the 2nd decile to the 3rd decile (the next 10%), and so on. At all India level, total indebted households constituted 34.0 percent of the total RLHs in 2009-10 as compared to 47.3 percent during 2004-05. Expenditure class-wise, 32.4 percent of all households in first decile class of MPCE (0-10%) were indebted, which went upto 36 percent

in the 7th decile class (60-70%) and remained at 29% in the last decile class (10th; 90-100%) of MPCE. It can also be observed from Statement 6.1(a) that the average size of the household is negatively correlated to monthly per capita expenditure as was evident from the fact that the size of a household goes on declining with the increase in monthly per capita expenditure.

When the extent of indebtedness by expenditure classes across States is examined, it gives a very diverse picture. However, one aspect that needed to be highlighted is that the percentage of indebted Rural Labour Households at the lower end of decile classes of MPCE in some of the States like Andhra Pradesh, Gujarat, Tamil Nadu and Sikkim was higher than that of the higher decile classes of MPCE.

b) Scheduled Caste RLHs

The extent of indebtedness among the Scheduled Caste Households was somewhat similar to that of all classes of the Rural Labour Households. The percentage of indebted households among the Scheduled Caste RLHs was 34.6 percent in 2009-2010 as compared to 48 percent during 2004-05. The percentage of indebted households to total Scheduled Caste RLHs showed a fluctuating trend with the increase in decile classes of MPCE. In this class of the RLHs, highest percentage of indebted households (37.9 percent) was at the 6th (50-60%) decile class of MPCE. The average size of the Scheduled Caste RLHs is smaller in higher decile classes and larger in lower decile classes.

c) Scheduled Tribe RLHs

The trend of the Scheduled Tribe RLHs was almost same as reported for 'All Classes' and 'Scheduled Caste' Rural Labour Households. The percentage of indebted households among the Scheduled Tribe Rural Labour Households was 27.5 percent in 2009-2010 in comparison with the 39.4 percent during 2004-05.

d) Other Backward Classes RLHs

The percentage of indebted household among Other Backward Classes Rural Labour Households almost showed similar trend as to 'All classes', 'Scheduled Caste' and 'Scheduled Tribe' RLHs. The percentage of indebted households among Other Backward Classes household stood at 33.7 percent in 2009-2010 at all-India level as compared to 46.7 percent during 2004-05. As in the case of other classes of households, the percentage of indebted households showed a fluctuating trend with the increase in decile classes of expenditure. However, the percentage of indebted households at the lowest level of decile class was 34.7 percent as against 26.8 percent at the highest level of decile class.

(ii) Agricultural Labour Households (ALHs)

As the Rural Labour Households include the Agricultural Labour Households also, the extent, trend and pattern of indebtedness by decile classes of MPCE were almost similar as reported for Rural Labour Households during 2009-2010.

Magnitude of Indebtedness by Expenditure Classes

(i) Rural Labour Households (RLHs)

a) All Classes

Statement 6.1(a) brings out another feature regarding the magnitude of debt by decile classes of monthly per capita expenditure (MPCE). Like earlier rounds, this round also noticed that the average amount of the debt per indebted household goes on increasing with the increase in the expenditure of households. It was Rs.9,644 for the lowest decile class of MPCE (0-10%) as compared to Rs. 34,831 for the highest decile class of MPCE (90-100%) during 2009-2010. This trend is, however, in conformity with the need and capacity of the households to borrow. When the pattern of magnitude of indebtedness by decile classes is studied across the states, it displays a perplexing picture which makes it difficult to draw specific inferences.

b) Scheduled Castes RLHs

The average size of the debt per indebted household of this class of households also goes up with the increase in the expenditure classes. It was reported as Rs.8,203 for the lowest decile class as compared to Rs.26,251 for the highest decile class of expenditure. In so far as the pattern and trend across the states is concerned, no clear cut picture emerges as in the case of all classes of RLHs.

c) Scheduled Tribe RLHs

This class of households displayed almost the same trend as was displayed by other classes of households. The average amount of debt per indebted household was Rs.5,268 in the 1st decile class of MPCE (0-10%), which increased to Rs.9,128 in the 10th decile class of MPCE (90-100%).

d) Other Backward Classes RLHs

This class of households also observed the similar trend, like all other classes of households. The average amount of debt per indebted household was reported at Rs.13,547 for the lowest decile class and Rs.46,877 for the highest decile class of MPCE. It was also noticed that average amount of debt raised by this class of households was higher when compared with the other three classes of households viz All Classes, Scheduled Caste and Scheduled Tribe Rural Labour households.

(ii) Agricultural Labour Households (ALHs)

The pattern of debt vis-à-vis expenditure classes of ALHs was almost same as reported in respect of RLHs.

Estimated Number of Indebted Households

The total estimated number of indebted Rural/Agricultural Labour Households in the country during 66th round survey (2009-2010) was 223.6 lakh and 150.9 lakh respectively. Given the average household size of 4.39 for RLHs and 4.32 for ALHs, the estimated number of indebted persons worked out to be 982 lakh and 652 lakh respectively. The

estimated number of indebted Rural/Agricultural Labour Households by different expenditure classes may be seen in the tables given below:

TABLE 6.1

Estimated Number of Indebted Rural Labour Households

All-India (Number in Lakh)						
Sl. No.	Decile Class of monthly per capita expenditure	Rural Labour Households				
		Scheduled Caste	Scheduled Tribe	Other Backward Classes	Others	All Classes
1	2	3	4	5	6	7

8	70 – 80%	3.99	0.64	5.30	3.27	13.21
9	80 – 90%	3.14	0.99	4.59	2.21	10.94
10	90 – 100%	1.90	0.40	2.52	1.05	5.86
(a)	Total (in lakh)	50.36	16.96	57.31	26.17	150.91
(b)	Per Capita Debt (Rs.)	2782	1163	3740	3320	3032
(c)	Size per indebted Households (No.)	4.28	4.76	4.29	4.19	4.32
(d)	per cent of indebted households	37.8	28.7	35.8	41.0	36.2

Note:- Total may not tally due to rounding off.

It may be seen from the Tables 6.1 and 6.2 that about 223.61 lakh Rural Labour Households (which also includes 150.91 Agricultural Labour Households) are indebted. Of these, 73.72 lakh were Scheduled Castes, 22.70 lakh Scheduled Tribes, 86.32 lakh Other Backward Classes and 40.77 lakh were Others. The per capita debt of the Scheduled Caste

Rural and Agricultural Labour Households was around Rs.3,108 and Rs.2,782 respectively during 2009-10 at all-India level. For the Scheduled Tribe Households, the respective figures were Rs.1,438 and Rs.1,163. The per capita debt in case of Other Backward Classes of Household was highest among all the classes i.e. Rs. 4,566 and Rs.3,740 for RL and AL respectively during 2009-10. Precisely, it may be said that about 34/36 percent of all the Rural/Agricultural and 35/38 per cent of the Scheduled Caste Rural/Agricultural Labour Households were indebted during 2009-10. In the case of the Scheduled Tribe and Other Backward Classes Rural/Agricultural Labour Households, the percentage was about 28/29 and 34/36 per cent respectively.

STATEMENT 2.1 (a)

PERCENTAGE INCIDENCE OF INDEBTEDNESS AMONG RURAL LABOUR HOUSEHOLDS

SL. NO.	STATES/ UNION TERRITORIES	PERCENTAGE OF INDEBTED HOUSEHOLDS AMONG DIFFERENT SOCIAL CLASSES
